OPTICAL WAVEGUIDES

Optical data transfer system for crossing a rotary joint
[NASA-CASE-LAR-13613-1-SB] p 621 N87-24984

OPTIMAL CONTROL

Optimal control of viscous flow at high Reynolds numbers p 5 A87-10620

A direct method for enforcing equality constraints in optimal output feedback p 134 A87-13353

Combined guidance - Flight control of atmospheric vehicles p 110 A87-13654

The method of calculating the desired flight path of terrain following technique with circular arc spline p 111 A87-14136

Optimal guidance law with first order lag loop and normal constraint p 86 A87-14140

Optimal discrete design of digital flight control system p 111 A87-14142

Aircraft control input optimization for aerodynamic derivative estimation in dynamic manoeuvres p 113 A87-16183

On optimal periodic control and nested optimization problems p 204 A87-16422

The use of discrete minimization in the design of a straight control section in the fuselage of transport aircraft p 358 A87-28151

Singular perturbations in systems and control p 473 A87-31550

The application of quadratic optimal cooperative control synthesis to a CH-47 helicopter p 444 A87-32072

Stability robustness improvement using constrained optimization techniques p 474 A87-32231

Adaptive methods for control system design --- Book p 474 A87-33249

Synthesis of optimal discrete multidimensional systems under random perturbations p 547 A87-39016

Suboptimal control of distributed systems in the case of incomplete measurements --- for wing vibration damping p 619 A87-42126

An approximate analysis of the accuracy of the optimal discrete control of nonlinear stochastic systems using the method of seminvariants p 619 A87-42138

Analytical determination of the optimal parameters of automatic pilots p 596 A87-42139

Optimization and acceleration guidance of flight trajectories in a windshear p 765 A87-47807

Quasi-steady flight to quasi-steady flight transition in a windshear - Trajectory optimization and guidance p 765 A87-47884

Optimal control of helicopter aeromechanical stability p 747 A87-48958

Optimization of the controlled rotations of a rigid body with an elastic rod using first integrals of a free system p 859 A87-50915

A method for controlling a centrifuge cabin p 857 A87-52823

Flight test of a digital controller used in a helicopter autoland system p 835 A87-53079

Simultaneous active controls on wind tunnel model p 836 A87-54190

Optimal descending, hypersonic turn to heading [US-88-010989] p 120 N87-12577

The application of quadratic optimal cooperative control synthesis to a CH-47 helicopter [NASA-TM-88353] p 313 N87-17715

Optimal and insensitive control of hyperbolic distributed parameter systems with applications to wing flutter problems [AD-A174954] p 362 N87-18564

Optimal control concepts in design sensitivity analysis p 390 N87-18864

Analysis of NLR configurations using OCM for pilot modeling [NASA-CR-180656] p 449 N87-20289

Safe microburst penetration techniques: A deterministic, nonlinear, optimal control approach p 504 N87-22620

The application of optimal control techniques to the UTIAS research simulator p 599 N87-23637

A combined stochastic feedforward and feedback control design methodology with application to autoland design [NASA-CR-4078] p 705 N87-25806

Singular trajectories in airplane cruise-dash optimization p 659 N87-26035

Optimal flight trajectories in the presence of windshear, 1984-86 [NASA-CR-180316] p 682 N87-26047

Modeling and computational algorithms for parameter estimation and optimal control of aeroelastic systems and large flexible structures [AD-A183302] p 852 N87-29893

OPTIMIZATION

Optimal stochastic observers applied to hydraulic actuation systems p 87 A87-13354

Performance and optimisation of an airblast nozzle - Drop size distribution and volumetric air flow p 125 A87-13828

Propeller design by optimization p 105 A87-14123

A system model, a logic design diagram, and a general synthesis algorithm for optimal systems of onboard electrical equipment in computer-aided design p 96 A87-15214

Formulating an integrated flight control law synthesis strategy [AIAA PAPER 86-2711] p 189 A87-17941

Application of design optimization techniques to rotor dynamics problems p 167 A87-19204

Automated tuning of airframe vibration by structural optimization p 168 A87-19208

A new class of circulation control airfoils [AIAA PAPER 87-0003] p 216 A87-22351

Application of multiple objective optimization techniques to finite element model tuning p 266 A87-22819

Automated optimum design of wing structures - A probabilistic approach p 241 A87-22823

Transonic wing optimization using evolution theory [AIAA PAPER 87-0520] p 284 A87-24977

Unitary optimization design for the large aircraft structure p 381 A87-28328

Transonic wave drag estimation and optimization using the nonlinear area rule p 348 A87-31295

Dynamic optimization problems with bounded terminal conditions p 474 A87-31682

Optimizing aircraft fuel thermal management p 440 A87-32068

A design method of an aircraft with ACT by nonlinear optimization p 427 A87-32103

The principles of composite optimum design of compound aggregate complexes p 474 A87-32463

Application of a dynamic optimization package [AIAA PAPER 87-0825] p 474 A87-33612

Optimization and analysis of gas turbine engine blades [AIAA PAPER 87-0827] p 475 A87-33614

Multilevel/multidisciplinary optimization scheme for sizing a transport aircraft wing [AIAA PAPER 87-0714] p 428 A87-33651

Aircraft availability optimization --- tradeoffs in optimal systems design p 475 A87-35009

A solution to the variational problem of the optimal shape of supersonic nozzles p 484 A87-35817

An integrated approach to advanced conceptual design [SAWE PAPER 1716] p 545 A87-36288

Weight estimation of unconventional structures by structural optimization [SAWE PAPER 1718] p 532 A87-36290

Interactive/optimization weight prediction model --- interactive/optimization computer model for helicopter weight prediction [SAWE PAPER 1731] p 545 A87-36297

The influence of inflation rates and fuel prices on optimized aircraft design [DGLR PAPER 86-110] p 506 A87-36765

FAS multigrid employing ILU/SIP smoothing - A robust fast solver for 3D transonic potential flow p 555 A87-41419

Performance seeking control for cruise optimization in fighter aircraft [AIAA PAPER 87-1929] p 681 A87-45307

HALE thermal balance --- High Altitude Long Endurance remotely piloted vehicles [AIAA PAPER 87-2172] p 656 A87-45452

Stress analysis and optimisation of turbine rotor blade shrouds p 699 A87-46250

Sparing to optimize naval airship availability p 625 A87-46716

Interdisciplinary optimum design --- of aerospace structures p 657 A87-47009

Optimization of airplane wing structures under taxiing loads p 785 A87-47192

Possibilities and methods of structural optimization [DGLR PAPER 86-166] p 787 A87-48164

Structural optimization of landing gears using STARSTRUC [SAE PAPER 871047] p 745 A87-48772

Optimization of aircraft structures using STARSTRUC [SAE PAPER 871049] p 788 A87-48773

Optimization of wing tip store modeling p 730 A87-50338

Development of a turbomachinery design optimization procedure using a multiple-parameter nonlinear perturbation method [NASA-CR-3831] p 2 N87-10003

Recent Experiences in Multidisciplinary Analysis and Optimization, part 1 [NASA-CP-2327-PT-1] p 96 N87-11717

Optimization in the systems engineering process p 96 N87-11719

Practical considerations in aeroelastic design p 97 N87-11720

Flutter optimization in fighter aircraft design p 97 N87-11721

Optimization process in helicopter design p 98 N87-11726

STAEBL: Structural tailoring of engine blades, phase 2 p 106 N87-11731

Optimization of cascade blade mistuning under flutter and forced response constraints p 106 N87-11732

Sizing-stiffened composite panels loaded in the postbuckling range p 129 N87-11733

Application of optimization techniques to the design of a flutter suppression control law for the DAST ARW-2 p 115 N87-11736

Influence of analysis and design models on minimum weight design p 98 N87-11739

Aircraft configuration optimization including optimized flight profiles p 98 N87-11743

Multidisciplinary optimization applied to a transport aircraft p 84 N87-11746

Design enhancement tools in MSC/NASTRAN p 136 N87-11748

Recent Experiences in Multidisciplinary Analysis and Optimization, part 2 [NASA-CP-2327-PT-2] p 99 N87-11750

Overview: Applications of numerical optimization methods to helicopter design problems p 99 N87-11751

Regression analysis as a design optimization tool p 136 N87-11754

A rotor optimization using regression analysis p 136 N87-11755

Optimization of helicopter rotor blade design for minimum vibration p 99 N87-11756

Application of numerical optimization to rotor aerodynamic design p 99 N87-11757

Aeroelastic-aerodynamic optimization of high speed helicopter-compound rotor p 99 N87-11758

The structural optimization of a spreader bar for twin lift helicopter operations p 100 N87-11759

Optimization applications in aircraft engine design and test p 106 N87-11768

On optimal design for the blade-root/hub interface in jet engines p 106 N87-11769

Comments on gust response constrained optimization p 115 N87-11774

Applying optimization software libraries to engineering problems p 136 N87-11775

Carburizing steel for high temperature service [AD-A168327] p 122 N87-11877

Interdisciplinary and multilevel optimum design [NASA-TM-89077] p 243 N87-15205

Optimum bearing surfaces of wings with intricate geometry for supersonic flight p 245 N87-16187

Industrial application of structural optimization in aircraft construction [MBB-UT-270-86] p 302 N87-17697

Optimization of aircraft interior panels [NASA-TM-88340] p 353 N87-18547

Application of decomposition techniques to the preliminary design of a transport aircraft [NASA-CR-178239] p 362 N87-18563

Optimal and insensitive control of hyperbolic distributed parameter systems with applications to wing flutter problems [AD-A174954] p 362 N87-18564

Sensitivity Analysis in Engineering [NASA-CP-2457] p 390 N87-18855

Sensitivity derivatives and optimization of nodal point locations for vibration reduction p 390 N87-18869

A perspective of mathematical simulation and optimization techniques in computer aided design [NLR-MP-85088-U] p 396 N87-19018

Optimization of hypersonic waveriders derived from cone flows including viscous effects p 413 N87-20193

Development of optimization system OPTSYS: Implementation of static aeroelastic constraints [FFA-TN-1986-40] p 434 N87-20994

The aerodynamic optimization of wings at subsonic speeds and the influence of wingtip design [NASA-TM-88534] p 493 N87-22627

Design optimization for a family of multi-role combat aircraft p 586 N87-24450

Design optimization of fighter aircraft p 586 N87-24451

Optimization methods applied to the aerodynamic design of helicopter rotor blades [NASA-TM-89155] p 660 N87-26042

Industrial application of computer aided structural optimization in aircraft construction [MBB-UT-273/86] p 706 N87-26523

On the conceptual design of subsonic transport aircraft for cruising flight optimized for different merit functions [VTH-LR-451] p 753 N87-27654
Models for the description of holding procedures in air traffic as an aid for optimization with respect to safety and efficiency p 822 N87-28536
Transonic rotor tip design using numerical optimization [NASA-TM-86771] p 816 N87-29431

ORBITAL MECHANICS

Guidebook for analysis of tether applications [NASA-CR-178904] p 38 N87-10169

ORBITAL SPACE STATIONS

Design and test of a prototype thermal bus evaporator reservoir aboard the KC-135 0-g aircraft [AIAA PAPER 87-1503] p 603 A87-42477
National Aeronautics and Space Administration p 61 N87-10774

ORGANIC COMPOUNDS

The 1-((diorganoxy phosphonyl) methyl)-2,4- and -2,6-diamino benzenes and their derivatives [NASA-CASE-ARC-11425-2] p 844 N87-28605

ORGANIZATIONS

The role of the International Civil Aviation Organization on deregulation, discrimination, and dispute resolution p 550 A87-37566

ORIFICE FLOW

Effects of multiple rows and noncircular orifices on dilution jet mixing p 608 A87-39805
Qualitative evaluation of a flush air data system at transonic speeds and high angles of attack [NASA-TP-2716] p 827 N87-29497

ORTHOGONALITY

The solution of unstationary viscous flow in turbomachine by orthogonal finite element methods p 412 A87-34048
Geometries for roughness shapes in laminar flow [NASA-CASE-LAR-13255-1] p 291 N87-16793

OSCILLATING FLOW

Excitation of the natural oscillations of a boundary layer by an external acoustic field p 4 A87-10610
Theoretical treatment of gust simulation in the wind tunnel p 9 A87-12148
Asymptotic solutions for unsteady flow in cascades p 215 A87-21542
Unsteady wake measurements of an oscillating flap at transonic speeds p 278 A87-23652
Nonplanar, supersonic, three-dimensional, oscillatory, piecewise continuous-kernel function method p 342 A87-28073

A general family of generalized variational principles for 2-D unsteady fully potential transonic flow with shocks around oscillating airfoils p 342 A87-28334
Computation of dynamic stall of a NACA-0012 airfoil p 347 A87-31160

Structure and pulsation characteristics of a compressible turbulent boundary layer behind a fan of rarefaction waves p 484 A87-35813
Interaction of an oscillating vortex with a turbulent boundary layer p 564 A87-42340

Numerical simulation of supersonic flow over a three-dimensional cavity [AIAA PAPER 87-1288] p 565 A87-42363

Numerical simulation and comparison with experiment for self-excited oscillations in a diffuser flow p 693 A87-43381

The pitching damping derivatives measured by force-oscillation method at transonic and supersonic wind tunnel p 686 A87-46958

Numerical solution of three-dimensional transonic flows past an oscillating thin body p 717 A87-47660

Investigation of supersonic multiple circular arc (MCA) airfoil cascade of axial-flow compressor p 729 A87-49980

Forced oscillations in a boundary layer at frequencies close to the upper branch of the neutral curve p 803 A87-50890

A verification of unsteady Navier-Stokes solutions around oscillating airfoils [NASA-TM-88341] p 153 N87-14279

OSCILLATION DAMPERS

Equivalent linearization of a squeeze film damper p 198 A87-17965

OSCILLATIONS

Numerical simulations of unsteady, viscous, transonic flow over isolated and cascaded airfoils using a deforming grid [AIAA PAPER 87-1316] p 729 A87-49649

An experimental investigation of free-tip response to a jet [NASA-TM-88250] p 76 N87-12539

Cavitation research. Cavitation developed and boundary layers for the NACA 16-012 profile with oscillating incidence (stress measurements) [ETN-86-98435] p 151 N87-13413

Numerical simulations of unsteady, viscous, transonic flow over isolated and cascaded airfoils using a deforming grid [NASA-TM-89890] p 575 N87-24435

Calculation of viscous effects on transonic flow for oscillating airfoils and comparisons with experiment [NASA-TP-2731] p 734 N87-27622

Supersonic flow over elastic bodies in oscillation p 817 N87-29464

OSCILLATORS

Low-cost FM oscillator for capacitance type of blade tip clearance measurement system [NASA-TP-2746] p 594 N87-24481

OUTER SPACE TREATY

The Warsaw Convention system regarding air carrier responsibility - New developments in jurisprudence p 709 A87-42864

OUTLET FLOW

Aerodynamics of a vortex chamber with gas flow rate adjustment at the outlet p 343 A87-29085

OUTPUT

Reachable outputs in systems with bounded parameter uncertainties - Application to failure detection p 134 A87-13326

Auxiliary data input device [NASA-CASE-LAR-13626-1] p 700 N87-25584

OXIDATION

High-temperature behavior of different coatings in high-performance gas turbines and in laboratory tests p 317 A87-26105

Blackening of petroleum-based aviation oils - Causes and consequences p 604 A87-40925

OXIDATION RESISTANCE

Semi-interpenetrating networks of LARC-TPI p 529 A87-38602

Military aircraft 4-cst gas turbine engine oil development p 841 A87-52403

Alpha silicon carbide components for heat engine applications p 842 A87-53354

Corrosion/oxidation protection of high temperature material --- gas turbine engines [PNR90355] p 319 N87-16905

High temperature protective coatings for aero engine gas turbine components [AD-A176001] p 442 N87-20286

OXIDE FILMS

Burner rig tests on coated anisotropic high temperature alloys p 783 A87-49553

OXYGEN

Flammability and sensitivity of materials in oxygen-enriched atmospheres; Proceedings of the Symposium, Washington, DC, April 23, 24, 1985, Volume 2 p 38 A87-10859

OXYGEN SUPPLY EQUIPMENT

Case study of Royal Australian Air Force P3B Orion aircraft ground oxygen fire incident p 16 A87-10866

Cleaning methods and procedures for military oxygen equipment - Investigation results p 46 A87-10867

Incompatibility of the M-1 maneuver with US Navy tactical aircraft oxygen systems [AD-A183731] p 856 N87-30072

OXYNITRIDES

Microstructural engineering of ceramics for high-temperature application p 783 A87-50097

OZONOMETRY

In situ ozone instrumentation for 10-Hz measurements - Development and evaluation p 611 A87-42185

P**P.A.C.M. TELEMETRY**

Application of low-power, high-rate PCM telemetry in a helicopter instrumentation system p 356 A87-31100

P-3 AIRCRAFT

Case study of Royal Australian Air Force P3B Orion aircraft ground oxygen fire incident p 16 A87-10866

PAINTS

Improved durability airline paint schemes p 40 A87-12660

Stripping paint from composite structures - Experience acquired and problems to solve p 379 A87-29355

Aircraft skin that bruises p 691 A87-46874

Factors affecting the sticking of insects on modified aircraft wings [NASA-CR-180957] p 659 N87-26037

Development of a primer/topcoat and flexible primer for aluminum [AD-A182132] p 784 N87-27806

PALMGREN-MINER RULE

Prediction of fatigue life for aircraft loading and importance of the relative method in the case of Local Strain Approach p 238 A87-22333

PANEL FLUTTER

Resonant and non-resonant acoustic properties of elastic panels. I - The radiation problem p 49 A87-13026

Exploratory flutter test in a cryogenic wind tunnel p 314 A87-25721

Effect of static inplane loads and boundary conditions on the flutter of flat rectangular panels p 321 A87-25869

Vibrations of a cylindrical panel in a turbulent pressure pulsation field p 333 A87-26332

Effect of static inplane loads and boundary conditions on the flutter of flat rectangular panels [NAL-TM-ST-8604] p 50 N87-10404

PANEL METHOD (FLUID DYNAMICS)

An exact integral (field panel) method for the calculation of two-dimensional transonic potential flow around complex configurations p 9 A87-12267

An aerodynamic analysis and the subsequent motion of external store p 66 A87-13501

On the utilization of vortex methods for parachute aerodynamic predictions [AIAA PAPER 86-2455] p 68 A87-13795

Vortex panel calculation of wake rollup behind a large aspect ratio wing p 70 A87-14102

Analysis of V-22 tilt-rotor aircraft using panel methods p 149 A87-19226

Review of the historical development of surface source methods p 319 A87-23628

Panel methods - PAN AIR p 276 A87-23629

Some new developments in exact integral equation formulations for sub- or transonic compressible potential flow p 278 A87-23644

PAN AIR analysis of a transport high-lift configuration p 348 A87-31292

Application of a panel method (QUADPAN) to the prediction of propeller blade loads [SAE PAPER 861743] p 440 A87-32618

Nonlinear programming extensions to rational function approximations of unsteady aerodynamics [AIAA PAPER 87-0854] p 412 A87-33694

3 D wing analysis using a low order panel method p 488 A87-37213

Doublet-panel method for half-model wind-tunnel corrections p 598 A87-39893

A panel method for counter rotating propfans [AIAA PAPER 87-1890] p 668 A87-45279

A panel method for predicting the dynamic stability derivatives of an oscillating wing in high subsonic flow p 641 A87-46951

Analysis of the wake dynamics of a typical tilt-rotor configuration in transition flight p 720 A87-48926

Application of a Fourier panel method to 3-D spoiler calculations [AIAA PAPER 87-2417] p 725 A87-49087

Application of the TranAir full-potential code to the F-16A p 730 A87-50342

Application of a panel code to unsteady wing-propeller interference p 731 A87-50347

Application of a potential code to general steady flows in three dimensions p 50 N87-10262

How to make your aerodynamics in flutter calculations cheaper [NLR-MP-85056-U] p 152 N87-13416

An assessment of the use of low-order panel methods for the calculation of supersonic flows p 476 N87-20204

The Aeronautical Research Institute (FFA) wing body 85 computer program. A panel method for determination of aeroelastic characteristics applying direct block iterative solution techniques [FFA-TN-1986-28] p 642 N87-25298

Development of a geometry handling program for the FFA subsonic higher order panel method [FFA-TN-1985-48] p 699 N87-25534

Viscid/inviscid separated flows [AD-A179858] p 699 N87-25536

Steady and unsteady aerodynamic forces from the SOUSSA surface-panel method for a fighter wing with tip missile and comparison with experiment and PANAIR [NASA-TP-2736] p 645 N87-26032

Comparing an improved first order panel method results with wind-tunnel measurements for a complete airplane configuration [INPE-4132-PRE/1043] p 735 N87-27633

Development of supersonic computational aerodynamic program using panel method [NASA-TT-20113] p 813 N87-28526

Application of a panel method to wake-vortex/wing interaction and comparison with experimental data [NASA-TM-88337] p 817 N87-29461

Supersonic flow over elastic bodies in oscillation p 817 N87-29464

PANELS

[NASA-TM-89147] p 776 N87-26919
Integration of altitude and airspeed information into a primary flight display via moving-tape formats: Evaluation during random tracking task p 758 N87-27665
[NASA-TM-4010] p 758 N87-27665
Refinement of the eye-point-of-regard measurements with helicopter pilots in a flight experiment [DFVLR-FB-86-61] p 855 N87-29115
Automation at the man-machine interface p 855 N87-29504
Incompatibility of the M-1 maneuver with US Navy tactical aircraft oxygen systems [AD-A183731] p 856 N87-30072
- PILOT TRAINING**
Advanced trainer aircraft design for fighter-attack-recce roles p 165 A87-17947
[AIAA PAPER 86-2729] p 165 A87-17947
Mission simulators p 314 A87-24611
Obstacles to meeting Army National Guard aviator training requirements p 420 A87-33054
Towards total simulation p 452 A87-34768
The big picture - visually coupled airborne system simulator helmet design for combat pilots p 589 A87-41599
Simulator design features for helicopter landing on small ships. 1: A performance study [AD-A169514] p 119 N87-12572
Simulator design and instructional features for carrier landing: A field transfer study [AD-A169962] p 119 N87-12573
The simulator: The perfect illusion - flight simulator [FACHTHEMEN-9] p 193 N87-14354
Implementation of turbulence models into simulators p 527 N87-22354
Advanced visuals in mission simulators p 599 N87-23636
The application of optimal control techniques to the UTIAS research simulator p 599 N87-23637
Simulator motion characteristics and perceptual fidelity p 600 N87-23639
Radar simulators p 601 N87-23651
Operational training: Application and experience p 601 N87-23653
Application of data to piloted simulators p 687 N87-25275
Simulator manufacturers' requirements p 687 N87-25280
Accident investigation p 647 N87-25285
- PILOTLESS AIRCRAFT**
Linear-quadratic-Gaussian with loop-transfer recovery methodology for an unmanned aircraft [AIAA PAPER 85-1927] p 371 A87-28912
Aerodynamics of unmanned aircraft at full-scale in the RAE 24ft wind-tunnel [RAE-TM-AERO-2081] p 645 N87-26027

Structures technology of modern general aviation aircraft
[SAE PAPER 871025] p 712 A87-48689

Impact response of composite fuselage frames
[SAE PAPER 871009] p 744 A87-48696

Use of composites in propulsion systems
p 761 A87-49633

Interactive development of structural components for lightweight fiber-reinforced composite designs - The case of the Airbus vertical tails
[MBB-UT-023-86] p 750 A87-49964

Around-the-world flight
p 801 A87-53553

Investigation into the attenuation and velocity of acoustic emissions in carbon fiber composite aircraft structures
[BAE-KGT-R-GEN-01349] p 41 A87-10180

PLASTIC COATINGS
Development of a primer/topcoat and flexible primer for aluminum
[AD-A182132] p 784 A87-27806

PLASTIC DEFORMATION
Strain determination during the explosive expansion of pipes
p 460 A87-31727

Analysis of elastic and plastic deformation in a layered structure subjected to rolling-sliding contact
p 534 A87-38555

Composites - What next
p 841 A87-51807

PLASTIC FLOW
Characterization and modeling of the high temperature flow behavior of aluminum alloy 2024
p 455 A87-32032

PLASTIC PROPERTIES
High-strength, high-temperature intermetallic compounds
p 840 A87-51301

On contact problems of elasticity theory
[NASA-TM-88491] p 203 A87-14729

Nonlinear fracture mechanics analysis with boundary integral method
[AD-A173216] p 328 A87-18124

PLASTICS
Comparative rates of heat release from five different types of test apparatuses
p 317 A87-23431

Plastics - A birdseye view into the future
p 318 A87-27242

Carbon fibers
[AD-A171370] p 123 A87-12622

PLATE THEORY
Determination of the regime coefficients in the local theory of interaction from plate data
p 74 A87-15561

Equivalent plate analysis of aircraft wing box structures with general planform geometry
p 297 A87-24035

Further generalization of an equivalent plate representation for aircraft structural analysis
[NASA-TM-89105] p 327 A87-18113

PLATES
Development of powder metallurgy 2XXX series Al alloy plate and sheet materials for high temperature aircraft structural applications, FY 1983/1984
[NASA-CR-172521] p 458 A87-20406

PLATES (STRUCTURAL MEMBERS)
The finite contour method --- for transient heat conduction in plate
[AIAA PAPER 87-0148] p 270 A87-22442

Advanced aluminum alloy plate materials for damage tolerant aircraft structures
[NLR-MP-85078-U] p 379 A87-18660

PLUG NOZZLES
Free-jet acoustic investigation of high-radius-ratio conannular plug nozzles
[NASA-CR-3818] p 59 A87-10753

PLUMES
Boron slurry-fueled jet engine exhaust plume infrared signatures
p 183 A87-17839

Model and full scale study of twin supersonic plume resonance
[AIAA PAPER 87-0244] p 249 A87-22507

Two-dimensional nozzle plume characteristics
[AIAA PAPER 87-2111] p 636 A87-45413

Secondary stream and excitation effects on two-dimensional nozzle plume characteristics
[AIAA PAPER 87-2112] p 637 A87-45414

Secondary stream and excitation effects on two-dimensional nozzle plume characteristics
[NASA-TM-89813] p 349 A87-18539

Two-dimensional nozzle plume characteristics
[NASA-TM-89812] p 349 A87-18540

PLY ORIENTATION
Composite Ply Management
p 261 A87-20080

Vertical deflection characteristics of aircraft tyres
[ESDU-86005] p 129 A87-11992

PNEUMATIC EQUIPMENT
Further development of pneumatic powered-lift systems with capability for thrust deflection and recovery
[AIAA PAPER 87-0005] p 248 A87-22353

Advanced pneumatic start systems for APUs
[SAE PAPER 861713] p 368 A87-29579

Formulation and minimality of nonlinear discrete time control systems
p 254 A87-15233

PNEUMATIC PROBES
High-angle-of-attack pneumatic lag and upwash corrections for a hemispherical flow direction sensor
[NASA-TM-86790] p 590 A87-23616

PODS (EXTERNAL STORES)
Single or dual pod concepts for tactical reconnaissance
p 29 A87-10939

Ground and flight tests of Tornado reconnaissance pod
p 22 A87-10940

A ram air driven air cycle cooling system for avionics pods
[SAE PAPER 860912] p 514 A87-38704

POISSON DENSITY FUNCTIONS
The effects of flight hours and sorties on failure rates
[AD-A182084] p 716 A87-27611

POISSON EQUATION
An exterior Poisson solver using fast direct methods and boundary integral equations with applications to nonlinear potential flow
p 125 A87-13872

POISSON RATIO
The effect of material compressibility (Poisson ratio) on the elasto-plastic solution to the problem of a cylinder under internal pressure (coldworking situation)
p 124 A87-13642

POLAR NAVIGATION
Polar navigation assisted by satellite
p 20 A87-11663

POLARIZATION (WAVES)
JPL multipolarization workstation - Hardware, software and examples of data analysis
p 858 A87-53231

POLICIES
Will the aerospace plane work?
p 339 A87-28613

Overview of the integrated Federal Aviation Administration (FAA) wind shear program plan
[SAE PAPER 861702] p 351 A87-29589

Japan Report: Science and technology
[JPRS-JST-86-014] p 391 A87-19541

POLLUTION MONITORING
Aircraft measurements of medium-range transport of air pollutants over complex terrain
p 203 A87-16599

Realization of an airport noise monitoring system for determining the traffic flow in the surroundings of a military airbase
p 329 A87-27108

POLLUTION TRANSPORT
Aircraft measurements of medium-range transport of air pollutants over complex terrain
p 203 A87-16599

Large-scale distribution of peroxyacetyl nitrate results from the STRATOZ III flights
p 702 A87-46481

POLYAMIDE RESINS
TORLON engineered parts cut weight in half --- poly (amide-imide) resin
[SAWE PAPER 1690] p 528 A87-36278

POLYGONS
Some features of the approximate calculation of the integral aerodynamic characteristics of polygonal lifting configurations at supersonic flight velocities
p 344 A87-29086

POLYIMIDE RESINS
TORLON engineered parts cut weight in half --- poly (amide-imide) resin
[SAWE PAPER 1690] p 528 A87-36278

Semi-interpenetrating networks of LARC-TPI
p 529 A87-38602

POLYMER CHEMISTRY
High-temperature polymers for adhesive and composite applications
p 843 A87-53888

The 1-((diorganoxy phosphonyl) methyl)-2,4- and -2,6-diamino benzenes and their derivatives
[NASA-CASE-ARC-11425-2] p 844 A87-28605

POLYMER MATRIX COMPOSITES
Composites for aerospace dry bearing applications
p 454 A87-31373

High-temperature polymers for adhesive and composite applications
p 843 A87-53888

POLYMER PHYSICS
High-temperature polymers for adhesive and composite applications
p 843 A87-53888

POLYMERIC FILMS
Composite curing with semi-permeable membranes
p 120 A87-13121

Factors affecting the sticking of insects on modified aircraft wings
[NASA-CR-180957] p 659 A87-26037

POLYMETHYL METHACRYLATE
Geometric effects on the combustion in solid fuel ramjets
p 457 A87-35024

POLYNOMIALS
How to make your aerodynamics in flutter calculations cheaper
[NLR-MP-85056-U] p 152 A87-13416

POLYSULFIDES
Polymer systems for rapid sealing of aircraft structures at low temperature
[AD-A167667] p 41 A87-12029

POLYTETRAFLUOROETHYLENE
PTFE (polytetrafluoroethylene) resin selection for high performance wire and cable
[AD-P005211] p 846 A87-29227

POLYURETHANE RESINS
High-performance adhesives on the line
p 783 A87-50617

POROSITY
Variations in ultrasonic backscatter attributed to porosity
p 45 A87-10768

Viscous-inviscid interaction in transonic separated flow over solid and porous airfoils and cascades
p 76 A87-12535

Development of laminar flow control wing surface porous structure
[NASA-CR-172424] p 802 A87-28502

POROUS BOUNDARY LAYER CONTROL
Passive shock wave/boundary layer control of a helicopter rotor airfoil in a contoured transonic wind tunnel
[AIAA PAPER 87-0438] p 225 A87-22632

Porous aerofoil analysis using viscous-inviscid coupling at transonic speeds
p 410 A87-33164

Effect of porosity strength on passive shock-wave/boundary-layer control
p 533 A87-37116

Passive drag reduction on a complete NACA 0012 airfoil at transonic Mach numbers
[AIAA PAPER 87-1263] p 564 A87-42352

A tentative option for ventilation ratio of slotted wall in two-dimensional transonic wind tunnel
p 777 A87-47691

POROUS MATERIALS
Rheological characteristics of parts of MR material used in gas turbine engines --- porous metallic wire analog of resin
p 460 A87-31722

POROUS PLATES
Aerodynamic characteristics of porous disks at subsonic incoming flow velocities
p 145 A87-17589

PORTABLE EQUIPMENT
Measurement capability of moving-receiver radio interferometry
p 159 A87-19360

Modeling interference effects for land-mobile and air-mobile communications
p 385 A87-30319

Practical application to composite materials of a portable digital ultrasound device controlled by a microprocessor
p 849 A87-53585

Development of a portable precision landing system
[NASA-TM-88247] p 160 A87-14310

Acoustic guide for noise-transmission testing of aircraft
[NASA-CASE-LAR-13111-1-CU] p 477 A87-21652

Portable fuel leak detector
[AD-A180095] p 700 A87-25550

PORTS (OPENINGS)
Effect of port corner geometry on the internal performance of a rotating-vane-type thrust reverser
[NASA-TP-2624] p 77 A87-12541

POSITION (LOCATION)
Polar navigation assisted by satellite
p 20 A87-11663

Navigational coordinate systems - How to get your surface and air positioning very precise and still be off by 20 nautical miles
p 157 A87-16750

Determination of optimal position of actuators for flexible flight vehicles
p 190 A87-18528

Digital program for calculating static pressure position error
[NASA-TM-86726] p 301 A87-16821

Investigation of air transport technology at Massachusetts Institute of Technology, 1983
p 352 A87-18521

Controlled diffusion compressor blade wake measurements
[AD-A175141] p 350 A87-19355

Test plan for helicopter GPS (Global Positioning System) applications
[AD-A183299] p 823 A87-29488

Evaluation of the F/A-18 head-up-display for recovery from unusual attitudes
[AD-A183303] p 829 A87-29532

POSITION ERRORS
High precision differential GPS navigation
p 581 A87-41394

Geostationary satellite navigation systems
p 648 A87-42786

Probabilistic Modeling of Loran-C for nonprecision approaches
p 503 A87-22607

Modeling of the fault situation in navigation systems
p 821 A87-28534

POSITION INDICATORS
MTFCS (multiple target formation flight control system) Formation position sensor trade-off analysis
p 110 A87-13536

Flight inspection procedures and position fixing techniques
p 499 A87-38874

- PLRS development testing - An update
p 579 A87-41371
- United States Navy - Canadian Forces solid state flight data recorder/crash position locator experiment on the B-720 controlled impact demonstration
p 33 N87-10097
- Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 512 N87-22678
- POSITION SENSING**
High angle of attack position sensing for the Southampton University magnetic suspension and balance system
[NASA-CR-178358] p 780 N87-27681
- POSITIONING**
Synthesis and test issues for future aircraft inertial systems integration
p 157 A87-16751
Comparison of methods for expanding the convergence region of SITAN system --- positioning using terrain-aided navigation
p 157 A87-16752
Tracking a laser-projected horizon indicator
[AD-A183384] p 856 N87-30051
- POSTFLIGHT ANALYSIS**
Encircling the earth --- Voyager aircraft circumnavigation
p 402 A87-33136
- POTENTIAL FLOW**
An exact integral (field panel) method for the calculation of two-dimensional transonic potential flow around complex configurations
p 9 A87-12267
An exterior Poisson solver using fast direct methods and boundary integral equations with applications to nonlinear potential flow
p 125 A87-13872
Numerical solution of transonic potential flows with finite elements method using multigrid technique
p 68 A87-13900
Iterative computation of transonic potential flow past aerofoils with boundary layer
p 148 A87-18579
A hybrid method for transonic flow past multi-element aerofoils
p 212 A87-20504
The influence of the choice of computational parameters on the results of three-dimensional potential methods --- transonic flow
[ONERA, TP NO. 1986-169] p 214 A87-21069
Improved algorithms for circulation-control airfoils in transonic flow
[AIAA PAPER 87-0154] p 219 A87-22447
Viscous transonic flow over aerofoils using transonic full potential equation in a system of Cartesian coordinates
[AIAA PAPER 87-0411] p 223 A87-22616
Computational methods in potential aerodynamics
p 276 A87-23626
p 319 A87-23627
Foundation of potential flows
p 276 A87-23631
Basic principles and double lattice applications in potential aerodynamics
p 276 A87-23633
Introduction to the Green's function method in aerodynamics
p 276 A87-23633
Mathematical foundations of integral-equation methods
p 277 A87-23634
Finite difference methods for the solution of unsteady potential flows
p 277 A87-23640
An integral equation method for potential aerodynamics
p 277 A87-23640
Wake dynamics for incompressible and compressible flows
p 278 A87-23643
Some new developments in exact integral equation formulations for sub- or transonic compressible potential flow
p 278 A87-23644
An integral equation for compressible potential flows in an arbitrary frame of reference
p 278 A87-23645
Wavy wall solutions of the Euler equations
p 278 A87-23672
Calculation of transonic potential flow through a two-dimensional cascade using AF 1 scheme
p 278 A87-23728
Unsteady full potential computations for complex configurations
[AIAA PAPER 87-0110] p 281 A87-24920
Analysis of velocity potential around intersecting bodies
p 287 A87-25907
Transonic potential flow computations around finite wings
p 288 A87-27475
A general family of generalized variational principles for 2-D unsteady fully potential transonic flow with shocks around oscillating airfoils
p 342 A87-28334
Fast viscous correction method for full-potential transonic wing analysis
p 348 A87-31297
Calculation of transonic potential flow through a two-dimensional cascade using AF1 scheme
p 408 A87-32105
Aerodynamics of a double membrane airfoil
p 410 A87-33168
Full potential transonic multigrid code for arbitrary configurations
p 413 A87-35013
Aspects of the calculation of potential flow past a slat in a system of airfoil profiles
p 484 A87-35916
- Unsteady aerodynamics of blade rows
p 554 A87-40082
- Multigrid methods for calculating the lifting potential incompressible flows around three-dimensional bodies
p 555 A87-41411
- FAS multigrid employing ILU/SIP smoothing - A robust fast solver for 3D transonic potential flow
p 555 A87-41419
Improvements on a Green's function method for the solution of linearized unsteady potential flows
p 556 A87-41627
A fast implicit MAF scheme for solving 3D transonic potential flow in turbomachines --- multigrid approximate factorization
[AIAA PAPER 87-1153] p 559 A87-42099
Full-potential flow computations using Cartesian grids
[AIAA PAPER 87-1164] p 560 A87-42109
Unsteady full potential aeroelastic computations for flexible configurations
[AIAA PAPER 87-1238] p 563 A87-42335
A unified approach for potential and viscous free-wake analysis of helicopter rotors
p 627 A87-43412
A wake source model for airfoils with separated flow
p 716 A87-47153
Lateral fluid forces on whirling centrifugal impeller. I - Theory. II - Experiment in vaneless diffuser
p 786 A87-47717
Some mathematical problems in the theory of transonic flow
p 718 A87-47850
Development efficient algorithms for the solutions of full potential and Euler equations on vector computers
p 718 A87-47853
Aerodynamic analysis of a complex configuration using a full potential code
[AIAA PAPER 87-2418] p 725 A87-49088
Application of a potential code to general steady flows in three dimensions
p 50 N87-10262
Wing/body interference flow investigation
[NASA-CR-179979] p 153 N87-14278
Multicomponent Aircraft Transonic Inviscid Computation System (MATRICS) transonic potential flow calculations about transport aircraft
[NLR-MP-86019-U] p 349 N87-18544
Full Approximative Scheme (FAS) multigrid employing Incomplete Lower Upper decomposition/Strongly Implicit Procedure (ILU/SIP) smoothing: A robust fast solver for 3D transonic potential flow
[NLR-MP-85072-U] p 389 N87-18798
Numerical treatment of shocks in unsteady potential flow computation
[NLR-MP-85044-U] p 392 N87-19676
Matrices, transonic potential flow calculations about transport aircraft
p 415 N87-20208
Theoretical analysis of flows around helicopter fuselages: Application to design and development
p 415 N87-20221
The integral equation for the time dependent linearized potential flow over a wing
[AD-A176684] p 490 N87-21850
Numerical methods for unsteady transonic flow
p 572 N87-24403
Development of direct-inverse 3-D method for applied aerodynamic design and analysis
[NASA-CR-180646] p 751 N87-26895
Development of supersonic computational aerodynamic program using panel method
[NASA-TT-20113] p 813 N87-28526
- POTENTIAL GRADIENTS**
Full potential modeling of blade-vortex interactions
p 627 A87-43417
Full-potential modeling of blade-vortex interactions
[NASA-TM-88355] p 341 N87-18532
- POTENTIAL THEORY**
Comment on 'Computation of choked and supersonic turbomachinery flows by a modified potential method'
p 71 A87-14129
Wave drag analysis of realistic fighter aircraft using a full potential method
[AIAA PAPER 86-2627] p 147 A87-17886
On the application of linearised theory to multi-element aerofoils. II - Effects of thickness, camber and stagger
p 287 A87-25595
Full-potential circular wake solution of a twisted rotor blade in hover
p 287 A87-25723
Applications of a fast, time accurate full potential scheme to a statically flexible wing in the transonic regime
[AIAA PAPER 87-0707] p 411 A87-33655
Flutter calculations using Doublet Lattice aerodynamics modified by the full potential equations
[AIAA PAPER 87-0882] p 412 A87-33703
Wave drag analysis of realistic fighter aircraft using a full-potential method
p 807 A87-52882
Nonlinear potential analysis techniques for supersonic aerodynamic design
[NASA-CR-172507] p 293 N87-17670
- Unsteady hybrid vortex technique for transonic vortex flows and flutter application
[NASA-CR-180308] p 734 N87-27623
Transonic airfoil computation using the integral equation with and without embedded Euler domains
p 734 N87-27624
- POWDER METALLURGY**
Powder metallurgy of titanium aluminide components
p 455 A87-31399
Elevated temperature mechanical behavior of P/M dispersion strengthened Al-Fe-Ni alloys
p 528 A87-36866
The effect of near net shape processing methods on the titanium industry
p 781 A87-47992
Powder metallurgy (P/M) near-net shape titanium components from prealloyed powder
p 782 A87-48007
Diffusion welding of component parts in the aviation and space industries
[RAE-TRANS-2147] p 324 N87-17032
Development of powder metallurgy 2XXX series Al alloy plate and sheet materials for high temperature aircraft structural applications, FY 1983/1984
[NASA-CR-172521] p 458 N87-20406
Net shape technology in aerospace structures. Volume 1
[AD-A176508] p 406 N87-20957
Net shape technology in aerospace structures. Volume 4. Appendix. Future Composite Manufacturing Technology. Presentations of a workshop held on September 9-12, 1985 in Gaithersburg, Maryland
[AD-A176511] p 407 N87-20960
- POWER CONDITIONING**
1986 American Control Conference, 5th, Seattle, WA, June 18-20, 1986, Proceedings. Volumes 1, 2, & 3
p 133 A87-13301
- POWER CONVERTERS**
The model of the variable speed constant frequency closed-loop system operating in generating state
p 320 A87-24718
- POWER EFFICIENCY**
Improving the energy efficiency of cooled high-temperature turbines
p 104 A87-13990
The effect of the rotation frequency on the efficiency of a centrifugal screw pump under steady and unsteady conditions
p 262 A87-20385
A method for evaluating the effect of the radial clearance on the efficiency of the turbocompressor during the selection of process parameters for a turbofan engine
p 247 A87-20400
The effect of lower and upper overlaps on the efficiency of centripetal radial-flow air microturbines with partial admission
p 460 A87-31732
Flight tests aimed at measuring power reduction in formation flight
[DGLR PAPER 86-128] p 494 A87-36768
Performance of a high-efficiency radial/axial turbine
[ASME PAPER 86-GT-18] p 514 A87-38467
A study on the effect of non-dimensional system parameters on squeeze film damper performance using experimental data
p 698 A87-46229
- POWER SPECTRA**
A technique for the objective measurement of minimum Resolvable Temperature Difference
p 261 A87-19686
Non-linear propagation of broadband noise signals
p 619 A87-41560
Signal processing and interpretation using multilevel signal abstractions
[AD-A169166] p 57 N87-11513
New generation aircraft design problems relative to turbulence stability, aeroelastic loads and gust alleviation
p 509 N87-22344
Measurements of atmospheric turbulence
p 543 N87-22347
Radar target identification techniques applied to a polarization diverse aircraft data base
[AD-A180044] p 614 N87-24599
- POWER SUPPLY CIRCUITS**
The model of the variable speed constant frequency closed-loop system operating in generating state
p 320 A87-24718
- POWER TRANSMISSION**
Gear materials in helicopter transmissions
p 527 A87-35669
- POWERED LIFT AIRCRAFT**
Flight evaluation of augmented controls for approach and landing of powered-lift aircraft
[AIAA PAPER 85-1944] p 188 A87-17755
Sea-based multimission STOVL application of an AIBF/VT hybrid powered-lift system --- Advanced Internally Blown Jet Flap/Vectored Thrust

PREVAPORIZATION

Experimental examination of a prevaporized premixed combustor p 369 A87-31187

PRIMERS (COATINGS)

Development of a primer/topcoat and flexible primer for aluminum [AD-A182132] p 784 N87-27806

PRINTED CIRCUITS

Automated thermal and reliability analysis of avionics designs [AIAA PAPER 86-2730] p 180 A87-17948
Ionic cleaning after wave solder and before conformal coat p 534 A87-38591
Culprits causing avionic equipment failures p 662 A87-46727
Automated thermal and reliability analysis of avionics designs p 757 A87-50335
Microwave Antennas for Avionics [AGARD-LS-151] p 613 N87-23859

PRISMS

Random vertex method and simulation of vortex structure behind a triangular prism p 289 A87-27486

PROBABILITY DENSITY FUNCTIONS

Probabilistic fracture mechanics and reliability --- Book p 530 A87-35286

PROBABILITY THEORY

Statistical classification of radar clutter --- for air traffic control feature extraction p 160 A87-19415
Automated optimum design of wing structures - A probabilistic approach p 241 A87-22823
First attainment of a level by a random process in flight dynamics problems p 443 A87-31731
Probabilistic fracture mechanics and reliability --- Book p 530 A87-35286
Probabilistic Modeling of Loran-C for nonprecision approaches p 503 N87-22607

PROBLEM SOLVING

Solvability condition for the fundamental control problem p 474 A87-31719
Engine-transmission-structural airframe members compatibility p 26 N87-10069
Water facilities in retrospect and prospect: An illuminating tool for vehicle design [NASA-TM-89409] p 150 N87-13403
Unsteady 3-dimensional Euler equations solutions on dynamic blocked grids p 232 N87-15942
Treatment of technical objects as complex systems p 267 N87-16181
The use of the finite element method p 269 N87-16380

Euler solutions using an implicit multigrid technique [NASA-TM-58276] p 290 N87-16792
Navier-Stokes solution for laminar transonic flow over a NACA0012 airfoil [FAA-140] p 291 N87-16794
Progress in Viscous-Inviscid Solvers (VIS) p 537 N87-22152
A history of development in rotordynamics: A manufacturer's perspective p 538 N87-22200

PROCEDURES

Semi-automatic cross-checking between different copies of the same flight plan p 502 N87-21903

PROCESS CONTROL (INDUSTRY)

Fatigue life enhancement and high interference bushing installation using the ForceMate bushing installation technique p 384 A87-30103

PROCUREMENT MANAGEMENT

Air traffic control: FAA's (Federal Aviation Administration's) advanced automation system acquisition strategy is risky [PB86-231743] p 237 N87-15200

PROCUREMENT POLICY

Air traffic control: FAA's (Federal Aviation Administration's) advanced automation system acquisition strategy is risky [PB86-231743] p 237 N87-15200

PRODUCT DEVELOPMENT

Aeronautical manufacturers requirements for new materials p 38 A87-11791
Design considerations for superplastically formed complex aircraft structures p 87 A87-13151
Pilot's associate demonstration one - A look back and ahead --- developing an aircraft expert system p 179 A87-16840
Avco-Pratt - Getting its LHX engine field-ready p 369 A87-30501
Adhesively sealed fuel tanks - R&D to production [SAWE PAPER 1688] p 504 A87-36276
The real world - A maintainer's view --- on military aircraft p 624 A87-46708
Airframe cost engineering p 799 A87-49630

Aircraft Integrated Data Systems (AIDS): Evolution and revolution p 30 N87-10077
Lufthansa's Aircraft Integrated Data Systems (AIDS) based A-310 engine condition monitoring system: Progress achieved between the 12th and 13th AIDS Symposiums p 31 N87-10084

Development of single crystal alloys for specific engine applications [PNR-90320] p 60 N87-11616
Development of novel bearingless rotor systems [MBB-UD-471/86] p 702 N87-26837
Avionics systems for future civil helicopters [MBB-UD-473/86] p 662 N87-26838
Development and testing of highly loaded engine components made of carbon fiber reinforced plastics [ETN-87-90036] p 832 N87-28550

PRODUCTION COSTS

The ten dollar load cell [SAWE PAPER 1724] p 532 A87-36295
Designing for low cost fabrication: Proceedings of the Workshop, Loughborough University of Technology, England, Apr. 16, 17, 1986 p 714 A87-49627
Low cost manufacture in titanium and aluminium alloys using the processes of superplastic forming (SPF) and diffusion bonding p 788 A87-49637
A dynamic model for airframe cost estimation [AD-A168842] p 65 N87-11687

PRODUCTION ENGINEERING

Engineering economic analysis of breakeven in aircraft production p 211 A87-23296
Aircraft production technology --- Book p 463 A87-33250
Aircraft assembly processes --- Russian book p 482 A87-36583
Prediction of the reliability of aircraft part manufacturing processes p 610 A87-42128
Engineering and cost principles for increasing the production efficiency and maintainability of aircraft engines p 664 A87-43620
High-temperature polymers for adhesive and composite applications p 843 A87-53888
A dynamic model for airframe cost estimation [AD-A168842] p 65 N87-11687
Net shape technology in aerospace structures. Volume 1 [AD-A176508] p 406 N87-20957

PRODUCTION MANAGEMENT

Composite Ply Management p 261 A87-20080
Cost effectiveness using conventional materials --- in aircraft production p 788 A87-49628

PRODUCTIVITY

An analysis of the cost-volume relationships within the aircraft program of the Naval Air Rework Facility, Alameda, California [AD-A171729] p 212 N87-15933
To enhance the capability and increase the productivity of a group working on critical problems of high speed fluid mechanics - both experimentally and through numerical calculations [AD-A182559] p 791 N87-27970

PROFILES

Profile measurements using radiographic techniques p 465 A87-35064
Design and verification by nonlinear simulation of a Mach/CAS control law for the NASA TC7 B737 aircraft [NASA-CR-178029] p 449 N87-20290

PROGRAM VERIFICATION (COMPUTERS)

Flight control software for test generation p 472 A87-31507
Part-task simulation techniques [AIAA PAPER 87-2301] p 794 A87-49159
Handbook. Volume 1: Validation of digital systems in avionics and flight control applications [DOT/FAA/CT-82/115-VOL-1-RE] p 243 N87-15204
Evaluation of a flight dynamics computer program [BU-321] p 375 N87-19404
Real time programs. Design implementation of validation: A survey [AD-A182144] p 796 N87-28309

PROGRAMMING LANGUAGES

Advanced avionics display processor architecture p 470 A87-31472
A graphics oriented design language for control software p 471 A87-31475
Engineering and application of the control interface intermediate language imposed by MATE p 547 A87-38680
Some principles of parallel programming p 857 A87-53069
A flight dynamic simulation program in air-path axes using ACSL (Advanced Continuous Simulation Language) [AD-A173849] p 332 N87-18337
The application of parallel processing to real time flight simulation using the OCCAM language [BU-350] p 396 N87-19961

A graphics environment supporting the rapid prototyping of pictorial cockpit displays [AD-A178636] p 548 N87-23182
An expert system for air traffic control system p 742 N87-27607

PROJECT MANAGEMENT

Project management support p 61 A87-11805
AHIP - The OH-58D from conception to production --- Army Helicopter Improvement Program p 144 A87-19248
Reducing the cost of aero engine research and development p 304 A87-25050
Management of United States Air Force (USAF) operational test and evaluation (OT&E) flight test programs p 799 A87-49199
DOD (Department of Defense) acquisition: Case study of the Navy V-22 OSPREY Joint Vertical Lift Aircraft Program [PB86-231388] p 175 N87-14315

PROJECT PLANNING

Repair of composite components - A Navy approach p 117 A87-13122
Overview of the integrated Federal Aviation Administration (FAA) wind shear program plan [SAE PAPER 861702] p 351 A87-29589
Selected problems in the decision making process for future small transport/utility aircraft [SAE PAPER 871045] p 712 A87-48771
Value-oriented product planning - The case of civil-aircraft manufacturing [MBB-UT-002-87-PUB] p 799 A87-49968
Integrated FAA Wind Shear Program plan [DOT/FAA/DL-87/1] p 544 N87-23067

PROJECTILES

A computational method for free time optimal control problems, with application to maximizing the range of an aircraft-like projectile p 372 A87-29677
Drag predictions for projectiles at transonic and supersonic speeds [AD-A171462] p 232 N87-15191
Numerical simulation of supersonic flow over a rotating band using flowfield blanking [AD-A178492] p 493 N87-22624

PROJECTORS

Visual display research tool p 599 N87-23635

PROLATE SPHEROIDS

Navier-Stokes computations of prolate spheroids at angle of attack [AIAA PAPER 87-2627] p 729 A87-49626

PROP-FAN TECHNOLOGY

A review of advanced turboprop transport activity p 24 A87-12650
Technical/economic evaluation of new propfan concepts in comparison with the turbofan of the 1990s p 104 A87-13989
Application of propfan propulsion to general aviation [AIAA PAPER 86-2698] p 184 A87-17934
Revised guidelines for propfan inlet design based on recent analytical and test experience [AIAA PAPER 87-0163] p 249 A87-22452
Flow simulations for a complex airplane configuration using Euler equations [AIAA PAPER 87-0454] p 225 A87-22646
Benefits of blade sweep for advanced turboprops p 303 A87-24007
High-speed propeller noise predictions - Effects of boundary conditions used in blade loading calculations [AIAA PAPER 87-0525] p 333 A87-24978
Boeing J7J design to be frozen in July p 360 A87-30001
Rolls revs up for the new century p 369 A87-31209
Propfan installation aerodynamics studied p 408 A87-32069

A model propulsion simulator for evaluating counter rotating blade characteristics [SAE PAPER 861715] p 440 A87-32607
Aspects of testing with a counter-rotating ultra bypass engine simulator [SAE PAPER 861717] p 440 A87-32608
Flow simulations for an aft-mounted propfan using Euler equations [SAE PAPER 861718] p 408 A87-32609
Installation aerodynamics of wing-mounted, single-rotation propfans [SAE PAPER 861719] p 409 A87-32610
High speed wind tunnel tests of the PTA aircraft --- Propfan Test Assessment Program [SAE PAPER 861744] p 409 A87-32619

Structural tailoring of advanced turboprops [AIAA PAPER 87-0753] p 464 A87-33648
The propfan leads the way to a new generation of propulsion engines p 441 A87-35180
Analytical and experimental investigation of mistuning in propfan flutter [AIAA PAPER 87-0739] p 609 A87-40496

Analytical flutter investigation of a composite propfan model
[AIAA PAPER 87-0738] p 609 A87-40497

Importance of broadband noise for advanced turboprops p 620 A87-41631

Three-dimensional unsteady Euler solutions for propfans and counter-rotating propfans in transonic flow
[AIAA PAPER 87-1197] p 562 A87-42314

Countdown to the propfan p 664 A87-44272

Propfan propulsion systems for the 1990's
[AIAA PAPER 87-1729] p 665 A87-45168

Engine design and systems integration for propfan and high bypass turbofan engines
[AIAA PAPER 87-1730] p 665 A87-45169

Preparing a propfan propulsion system for flight test
[AIAA PAPER 87-1731] p 665 A87-45170

UDF/727 flight test program
[AIAA PAPER 87-1733] p 666 A87-45171

A panel method for counter rotating propfans
[AIAA PAPER 87-1890] p 668 A87-45279

Wind tunnel tests on a one-foot diameter SR-7L propfan model
[AIAA PAPER 87-1892] p 635 A87-45281

Results of acoustic tests of a Prop-Fan model
[AIAA PAPER 87-1894] p 707 A87-45282

Transmission efficiency in advanced aerospace powerplant
[AIAA PAPER 87-2043] p 671 A87-45376

Propfan propulsion system development
p 675 A87-46247

Countdown to the propfan. II p 758 A87-47307

PTA - Research at full scale --- Propfan Test Assessment p 758 A87-47867

Wind tunnel testing of counter-rotating props
p 777 A87-48277

A study of the leading edge vortex and tip vortex on prop-fan blades
[ASME PAPER 87-GT-234] p 719 A87-48718

Static tests of the propulsion system --- Propfan Test Assessment program
[AIAA PAPER 87-1728] p 830 A87-52245

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[AIAA PAPER 87-1893] p 806 A87-52251

UHB demonstrator flight test program
[AIAA PAPER 87-1732] p 824 A87-52844

PTA test bed aircraft engine inlet model test report, revised
[NASA-CR-174845] p 35 N87-10866

Prop-fan slipstream effects using static simulators: Low speed task, phase 1
[BAE-B59R/R-D/610/13498] p 37 N87-10875

Analytical flutter investigation of a composite propfan model
[NASA-TM-88944] p 327 N87-18115

Analytical and experimental investigation of mistuning in propfan flutter
[NASA-TM-88959] p 327 N87-18116

Summary of studies to reduce wing-mounted propfan installation drag on an M = 0.8 transport
[NASA-TP-2678] p 433 N87-20990

Unstalled flutter stability predictions and comparisons to test data for a composite propfan model
[NASA-CR-179512] p 519 N87-21955

Structural and aeroelastic analysis of the SR-7L propfan
[NASA-TM-86877] p 540 N87-22273

Predictions of wing and pylon forces caused by propeller installation
[NASA-CR-178298] p 620 N87-24966

Aircraft technologies of the nineties in MBB passenger aircraft projects
[MBB-UT-21/86] p 625 N87-25291

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[NASA-TM-89917] p 642 N87-25294

A comparison of the structureborne and airborne paths for propfan interior noise
[NASA-CR-180289] p 708 N87-26612

Rolls Royce civil engines, the next generation
[PNR90370] p 763 N87-26912

A study of environmental noise with a view to aircraft with prop-fans
[FFA-TN-1987-15] p 798 N87-27491

A computational procedure for automated flutter analysis
[NASA-TM-100171] p 791 N87-28058

Propfan experimental data analysis
[NASA-CR-166582] p 826 N87-28545

Advanced Prop-fan Engine Technology (APET) single- and counter-rotation gearbox/pitch change mechanism
[NASA-CR-168114-VOL-1] p 833 N87-28552

Advanced Propfan Engine Technology (APET) definition study, single and counter-rotation gearbox/pitch change mechanism design
[NASA-CR-168115] p 833 N87-28554

Advanced Prop-fan Engine Technology (APET) single- and counter-rotation gearbox/pitch change mechanism
[NASA-CR-168114-VOL-2] p 833 N87-28556

Propfan test assessment testbed aircraft flutter model test report
[NASA-CR-179458] p 814 N87-29413

Propfan test assessment propfan propulsion system static test report
[NASA-CR-179613] p 834 N87-29536

PROPAGATION MODES
Acoustic mode measurements in the inlet of a turbofan engine p 859 A87-52877

PROPELLANT COMBUSTION
An experimental study on solid fuel ramjet type combustion p 378 A87-29390

PROPELLANT PROPERTIES
A variable geometry combustor for broadened properties fuels
[AIAA PAPER 87-1832] p 830 A87-52246

PROPELLER BLADES
Comparison of two propeller source models for aircraft interior noise studies p 88 A87-13596

The development of balance tubes for Dowty Rotol composite bladed propellers p 63 A87-13630

Finite element Navier-Stokes calculation of three-dimensional turbulent flow near a propeller
p 70 A87-14101

Numerical determination of the dynamic characteristics of a composite blade p 305 A87-25911

Propfan installation aerodynamics studied
p 408 A87-32069

Application of a panel method (QUADPAN) to the prediction of propeller blade loads
[SAE PAPER 861743] p 440 A87-32618

Structural tailoring of advanced turboprops
[AIAA PAPER 87-0753] p 464 A87-33648

Structural dynamic modeling of advanced composite propellers by the finite element method
[AIAA PAPER 87-0740] p 441 A87-33664

Predicting propeller blade loads without testing
p 552 A87-39483

Computation of the flow fields of propellers and hovering rotors using Euler equations p 628 A87-43418

Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades p 674 A87-46228

Investigations of the aerodynamic performance and noise characteristics of a Dowty Rotol R212 propeller at full-scale in the 24 ft wind tunnel p 763 A87-50588

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[AIAA PAPER 87-1893] p 806 A87-52251

Effect of angular inflow on the vibratory response of a counter-rotating propeller
[NASA-CR-174819] p 15 N87-10840

An experimental investigation of the interior noise control effects of propeller synchrophasing
[NASA-CR-178185] p 60 N87-11577

La Recherche Aerospaciale, bimonthly bulletin, number 1986-2, 231/March-April
[ESA-TT-998] p 419 N87-20974

Structural dynamic modeling of advanced composite propellers by the finite element method
p 515 N87-21926

Dynamic response and stability of a composite prop-fan model
[NASA-CR-179528] p 519 N87-21956

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[NASA-TM-89917] p 642 N87-25294

Propfan test assessment propfan propulsion system static test report
[NASA-CR-179613] p 834 N87-29536

PROPELLER DRIVE
Comparisons of predicted propeller noise with windtunnel and flyover data
[AIAA PAPER 87-0527] p 272 A87-22687

Determination of the flight performance of the hybrid aircraft Helitruck
[DGLR PAPER 86-144] p 507 A87-36789

Interaction of airborne and structure-borne noise radiated by plates p 796 A87-47352

Propeller aircraft interior noise model utilization study and validation
[NASA-CR-172428] p 60 N87-11576

Separation of airborne and structureborne noise radiated by plates constructed of conventional and composite materials with applications for prediction of interior noise paths in propeller driven aircraft p 60 N87-11579

Introduction to installation effects on thrust and drag for propeller-driven aircraft
[ESDU-85015] p 751 N87-26896

Rolls Royce civil engines, the next generation
[PNR90370] p 763 N87-26912

PROPELLER EFFICIENCY

Effect of an upstream wake on a pusher propeller
[AIAA PAPER 86-2602] p 69 A87-14035

Determination of the thrust and net efficiency of a propeller and flow parameters behind the propeller
p 105 A87-15204

Extension of local circulation method to counter rotation propeller
[AIAA PAPER 87-1891] p 635 A87-45280

Investigation of the aerodynamic performance and noise characteristics of a 1/5th scale model of the Dowty Rotol R212 propeller p 640 A87-46265

Study of the aerodynamics of high-speed propellers
[ONERA, TP NO. 1987-61] p 640 A87-46761

Evaluation of icing drag coefficient correlations applied to iced propeller performance prediction
[SAE PAPER 871033] p 737 A87-48761

Optimized turboprop propulsion system thrust and fuel burn by integrated design
[SAE PAPER 871054] p 760 A87-48777

Propeller/body interaction for thrust and drag
[ESDU-86017] p 76 N87-12537

Over-the-wing propeller
[NASA-CASE-LAR-13134-2] p 307 N87-16828

Aerodynamic and structural aspects of propeller and drive for a 1/5 scale wind tunnel program
[NLR-MP-84091-U] p 377 N87-18579

PROPELLER FANS

Holographic interferometry of rotating components
Decorrelation limitations of the double pulsed technique
p 261 A87-19807

Computational aeroacoustics of propeller noise in the near and far field
[AIAA PAPER 87-0254] p 304 A87-24944

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[AIAA PAPER 87-1893] p 806 A87-52251

Dynamic response and stability of a composite prop-fan model
[NASA-CR-179528] p 519 N87-21956

Dynamic response of two composite prop-fan models on a nacelle/wing/fuselage half model
[NASA-CR-179589] p 585 N87-23615

Predictions of wing and pylon forces caused by propeller installation
[NASA-CR-178298] p 620 N87-24966

Wind tunnel performance results of an aeroelastically scaled 2/9 model of the PTA flight test prop-fan
[NASA-TM-89917] p 642 N87-25294

Integration of the propfan concept in aircraft design
[MBB-UT-0001/86] p 677 N87-26835

Cruise noise of the 2/9th scale model of the Large-scale Advanced Propfan (LAP) propeller, SR-7A
[NASA-TM-100175] p 798 N87-28398

Propfan experimental data analysis
[NASA-CR-166582] p 826 N87-28545

PROPELLER SLIPSTREAMS
Propeller swirl effect on single-engine general-aviation aircraft stall-spin tendencies p 447 A87-34515

Flow behind single- and dual-rotation propellers at angle of attack
[AIAA PAPER 87-1750] p 634 A87-45183

A free wake analysis for hovering rotors and advancing propellers p 720 A87-48927

Detection of in-flight propeller-induced structure-borne noise p 838 A87-53779

Prop-fan slipstream effects using static simulators: Low speed task, phase 1
[BAE-B59R/R-D/610/13498] p 37 N87-10875

Investigation of flow under the fuselage of a powered light aircraft model
[BU-351] p 418 N87-20247

Thrust and drag accounting for propeller/airframe interaction
[ESDU-85017] p 751 N87-26897

Flow energizers. Task A
[NASA-CR-176202] p 812 N87-28523

PROPELLERS

The evolution of methods for noise prediction of high speed rotors and propellers in the time domain
p 58 A87-11770

Propeller design by optimization p 105 A87-14123

Aerodynamic design of low-speed aircraft with a NASA fuselage/wake-propeller configuration
[AIAA PAPER 86-2693] p 165 A87-17930

Prediction of added noise due to the effect of unsteady flow on pusher propellers
[AIAA PAPER 87-0255] p 250 A87-22514

Test procedures for detection of in-flight propeller-induced structure-borne noise
[AIAA PAPER 87-0528] p 272 A87-22688

Numerical and experimental investigation of a propeller flowfield with a 3-D non-uniform inflow
[AIAA PAPER 87-0607] p 228 A87-22735

Measurement of a counter rotation propeller flowfield using a Laser Doppler Velocimeter [AIAA PAPER 87-0008] p 280 A87-24901

Experimental and theoretical study of propeller spinner/shank interference [AIAA PAPER 87-0145] p 281 A87-24929

High-speed propeller noise predictions - Effects of boundary conditions used in blade loading calculations [AIAA PAPER 87-0525] p 333 A87-24978

Propeller aircraft noise legislation - A comprehensive review p 336 A87-25926

Propeller pseudonoise p 306 A87-27536

Off-design analysis of counter-rotating propeller configurations p 366 A87-27989

Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions [AIAA PAPER 87-0526] p 397 A87-31109

Structureborne noise control in advanced turboprop aircraft [AIAA PAPER 87-0530] p 397 A87-31110

Euler analysis of transonic propeller flows p 553 A87-39813

Numerical simulation of transonic propeller flow using a three-dimensional small disturbance code employing novel helical coordinates [AIAA PAPER 87-1162] p 560 A87-42107

Performance calculation of counter rotation propeller [AIAA PAPER 87-1889] p 635 A87-45278

Euler analysis of the three-dimensional flow field of a high-speed propeller - Boundary condition effects [ASME PAPER 87-GT-253] p 719 A87-48719

Potential performance gains for light aircraft by the application of a stator behind the propeller [SAE PAPER 871029] p 745 A87-48759

Measured sound levels of the Raisbeck quiet turbofan propellers on medium-twin aircraft [SAE PAPER 871034] p 796 A87-48762

Calculation of frictionless flow about airfoil wings and propellers by numerical solution of the Euler equations p 809 A87-53563

Propeller/body interaction for thrust and drag [ESDU-86017] p 76 A87-12537

Aerodynamic characteristics of general aviation at high angle of attack with the propeller slipstream [NASA-TM-88503] p 153 A87-14280

High lift, low pitching moment airfoils [NASA-CASE-LAR-13215-1] p 153 A87-14282

SIMPROP: A system for simple aerodynamic analysis of propellers in axial flow. Description of method and user's guide [NLR-TR-84128-U] p 154 A87-14288

High-speed propeller noise predictions: Effects of boundary conditions used in blade loading calculations [NASA-TM-88913] p 208 A87-14957

Structureborne noise control in advanced turboprop aircraft [NASA-TM-88947] p 272 A87-16587

Measured noise of a scale model high speed propeller at simulated takeoff/approach conditions [NASA-TM-88920] p 272 A87-16588

Euler analysis of the three dimensional flow field of a high-speed propeller: Boundary condition effects [NASA-TM-88955] p 291 A87-16798

Propeller pseudonoise p 336 A87-18517

Aerodynamic and structural aspects of propeller and drive for a 1/5 scale wind tunnel program [NLR-MP-84091-U] p 377 A87-18579

Noise reduction for model counterrotation propeller at cruise by reducing aft-propeller diameter [NASA-TM-88936] p 398 A87-19057

Numerical simulation of transonic propeller flow using a 3-dimensional small disturbance code employing novel helical coordinates [NASA-TM-89826] p 350 A87-19350

Natural rotor icing on Mount Washington, New Hampshire [AD-A175276] p 363 A87-19383

The 1985 small propeller-driven aircraft noise test program [AD-A175596] p 477 A87-20799

Structural dynamic modeling of advanced composite propellers by the finite element method p 515 A87-21926

Coupled aerodynamic and acoustical predictions for turboprops [NASA-TM-87094] p 571 A87-23598

Extension of Kirchhoff's formula to radiation from moving surfaces [NASA-TM-89149] p 620 A87-24160

Evaluation of installed performance of a wing-tip-mounted pusher turboprop on a semispan wing [NASA-TP-2739] p 659 A87-26041

A comparison of the structureborne and airborne paths for propfan interior noise [NASA-CR-180289] p 708 A87-26612

The effect of front-to-rear propeller spacing on the interaction noise of a model counterrotation propeller at cruise conditions [NASA-TM-100121] p 798 A87-28396

Low-speed aerodynamic characteristics of a twin-engine general aviation configuration with aft-fuselage-mounted pusher propellers [NASA-TP-2763] p 817 A87-29462

PROPORTIONAL CONTROL

Development and evaluation of a proportional displacement sidearm controller for helicopters p 445 A87-33047

Restructurable control using proportional-integral implicit model following --- for fighter aircraft [AIAA PAPER 87-2312] p 771 A87-50433

PULSION

Theory and analysis of aircraft turbomachines (2nd revised and enlarged edition) --- Russian book p 304 A87-25265

Aerospace highlights 1986 p 399 A87-28399

Wind tunnel test of the modified goldschmidt model with propulsion and empenage: Analysis of test results [AD-A167360] p 13 A87-10045

Current capabilities and future directions in computational fluid dynamics [NASA-CR-179946] p 200 A87-13663

SHARP (Stationary High Altitude Relay Platform). Part A: Technical feasibility of microwave-powered airplanes [CRC-1393-PT-A] p 361 A87-18562

Newest developments in planning, testing reported p 399 A87-20145

PULSION SYSTEM CONFIGURATIONS

Tactical aircraft payoffs for advanced exhaust nozzles [AIAA PAPER 86-2660] p 163 A87-17906

Critical propulsion system parameters for future STOVL combat aircraft p 185 A87-19280

Supersonic STOVL fighter concepts featuring the hybrid tandem-fan propulsion system p 172 A87-19281

Installation aerodynamics of ejectors in combat aircraft p 367 A87-29265

The Boeing 7J7 advanced technology airplane p 444 A87-32118

Integrated flight/propulsion control for next generation military aircraft [SAE PAPER 861726] p 437 A87-32615

Propfan propulsion systems for the 1990's [AIAA PAPER 87-1729] p 665 A87-45168

Propfan propulsion system development p 675 A87-46247

Advances in technology for low cost turbomachinery - A potential to enhance the economy of future propulsion system for general and helicopter aviation p 676 A87-46261

Advanced technology payoffs for future small propulsion systems p 758 A87-47081

A variable geometry combustor for broadened properties fuels [AIAA PAPER 87-1832] p 830 A87-52246

Certification of the PIK30 powered glider [REPT-5/CEV/IS/SE/AV/86] p 174 A87-13436

Thermodynamic and Flow Mechanical Problems in Aircraft and Spacecraft Drives. Summary of conference reports for 1974, 1975, 1976 [ETN-87-98750] p 251 A87-15223

Over-the-wing propeller [NASA-CASE-LAR-13134-2] p 307 A87-16828

Future trends in propulsion --- aircraft [PNR90349] p 308 A87-16840

Propulsion system technologies for thrust vectoring p 519 A87-22670

Application of CFD codes to the design and development of propulsion systems p 677 A87-26009

Design applications for supercomputers p 706 A87-26010

The value of early flight evaluation of propulsion concepts using the NASA F-15 research airplane [NASA-TM-100408] p 763 A87-26913

Low speed wind tunnel test of a propulsive wing/canard concept in the STOL configuration. Volume 1: Test description and discussion of results [NASA-CR-178348] p 735 A87-27641

Low speed wind tunnel test of a propulsive wing/canard concept in the STOL configuration. Volume 2: Test data [NASA-CR-178349] p 735 A87-27642

Propulsion and airframe aerodynamic interactions of supersonic V/STOL configurations, phase 1 [NASA-CR-177369] p 812 A87-28521

Advanced Propfan Engine Technology (APET) and single-rotation gearbox/pitch change mechanism [NASA-CR-168113] p 833 A87-28553

Low-speed aerodynamic characteristics of a twin-engine general aviation configuration with aft-fuselage-mounted pusher propellers [NASA-TP-2763] p 817 A87-29462

PROPULSION SYSTEM PERFORMANCE

Thermochemical evaluation of fuel candidates for ramjet propulsion p 121 A87-13659

Propeller design by optimization p 105 A87-14123

Fighter aircraft/propulsion integration [AIAA PAPER 86-2658] p 142 A87-17905

ATF propulsion tests will drive operations at Arnold facility p 314 A87-23746

Parameters for the evaluation of combined engine thrust vector control systems p 439 A87-31725

2000 is (nearly) now --- development of new fighter engines p 439 A87-32003

A model propulsion simulator for evaluating counter rotating blade characteristics [SAE PAPER 861715] p 440 A87-32607

Impact of engine technology on supersonic STOVL [AIAA PAPER 87-1709] p 665 A87-45157

Preparing a propfan propulsion system for flight test [AIAA PAPER 87-1731] p 665 A87-45170

High performance turbofan afterburner systems [AIAA PAPER 87-1830] p 666 A87-45234

Flight test of the F100-PW-220 engine in the F-16 [AIAA PAPER 87-1845] p 667 A87-45245

System performance approach to air breathing propulsion design - A new undergraduate design competition [AIAA PAPER 87-1869] p 668 A87-45264

Integration of propulsion/integration test results through the use of reference plane transfers [AIAA PAPER 87-1964] p 670 A87-45333

Thrust/drag accounting for aerospace plane vehicles [AIAA PAPER 87-1966] p 656 A87-45335

Standing oblique detonation wave engine performance [AIAA PAPER 87-2002] p 670 A87-45347

Flight test and evaluation of propulsion system operability characteristics [AIAA PAPER 87-2092] p 656 A87-45400

Cycle selection considerations for high Mach applications [AIAA PAPER 87-2105] p 672 A87-45410

A study of some factors affecting the performance of a contra-rotating axial compressor stage p 639 A87-46211

Application of a fuzzy controller in fuel system of turbojet engine p 674 A87-46227

Performance and noise analyses of advanced turbo-prop p 760 A87-48914

Static tests of the propulsion system --- Propfan Test Assessment program [AIAA PAPER 87-1728] p 830 A87-52245

Specialists' Meeting on Rotary Wing Propulsion Systems, Williamsburg, VA, Nov. 12-14, 1986, Technical Papers p 801 A87-53413

Aeronautical facilities assessment [NASA-RP-1146] p 37 A87-10876

Future trends in propulsion --- aircraft [PNR90349] p 308 A87-16840

Experimental investigation on small turboprop behaviour under compressor rotating stall for different inlet flow conditions p 594 A87-24476

Unsteady inlet distortion characteristics with the B-1 p 575 A87-24478

Development of intake swirl generators for turbo jet engine testing p 603 A87-24480

Integration of the propfan concept in aircraft design [MBB-UT-0001/86] p 677 A87-26835

Advanced Propfan Engine Technology (APET) single- and counter-rotation gearbox/pitch change mechanism [NASA-CR-168114-VOL-1] p 833 A87-28552

High accuracy thrust measurement of aeronautical propulsion systems with particular consideration to a hydraulic force measuring device, part 1 [NASA-TT-20080] p 834 A87-28558

Fiscal year 1988 technical objective document [AD-A180311] p 861 A87-29364

Holographic interferometry at Wright Aeronautical Laboratories p 851 A87-29435

PROPULSIVE EFFICIENCY

Basic analyses for optimum propulsion efficiency of a counter rotating ATP --- Advanced Turbo Prop p 590 A87-39266

QUATERNARY ALLOYS

The effect of prestrain and of ageing at room temperature on the mechanical properties of an Al-Li-Cu-Mg alloy
p 842 A87-52683

R

RADAR

Multifunction Radar for Airborne Applications --- conference
[AGARD-CP-381] p 387 N87-18721
A coordinate conversion algorithm for multisensor data processing
[AD-A176368] p 476 N87-21603
Radar simulators p 601 N87-23651

RADAR ANTENNAS

Electronically steerable antenna technology and its application to airborne radars p 178 A87-16745
Errors in the measurement of the course angles of radar reference points due to the imprecise stabilization of the antenna mounting in bank and pitch p 649 A87-44312
EHF multifunction phased array antenna p 388 N87-18752
Aircraft radar antennas p 613 N87-23661

RADAR APPROACH CONTROL

Evaluation of alternatives for Army precision landing system: Ground guidance
[AD-A174093] p 237 N87-15956
Efficient conduct of individual flights and air traffic or optimum utilization of modern technology for the overall benefit of civil and military airspace users
[AGARD-AR-236] p 582 N87-23608

RADAR BEACONS

Mode S beacon system: Functional description
[DOT/FAA/PM-86/19] p 87 N87-11715
Air traffic control radar beacon system transponder performance study and analysis. Vol. 1: Transponder test methodology results, analysis and recommendations
[DOT/FAA/FS-86/1-VOL-1] p 236 N87-15198
Air traffic control radar beacon system transponder performance study and analysis. Volume 2: Appendixes
[DOT/FAA/FS-86/1-VOL-2] p 296 N87-16812

RADAR CROSS SECTIONS

Instrumentation for RCS measurements of modulation spectra of aircraft blades p 182 A87-19414
An automated radar-signature measurement system p 698 A87-45886

RADAR DATA

Stochastic modelling of radar returns p 18 A87-10143
Statistical classification of radar clutter --- for air traffic control feature extraction p 160 A87-19415
Storm structure during aircraft lightning strike events p 329 A87-25548
A high resolution spatial and temporal multiple Doppler analysis of a microburst and its application to aircraft flight simulation p 392 A87-28020
Experimental detection of anomalous mode-C reports using radar data p 497 A87-35340
The quality of radar data and its determination at the radar installations of the Bundesanstalt fuer Flugsicherung p 650 A87-45878
JPL multipolarization workstation - Hardware, software and examples of data analysis p 858 A87-53231
A quick look at the first NRL short pulse 95 GHz radar flight data p 468 N87-21214
A high resolution spatial and temporal multiple Doppler analysis of a microburst and its application to aircraft flight simulation
[DOT/FAA/PM-87/11] p 854 N87-29060

RADAR DETECTION

The methodology and tools for processing radar data p 19 A87-11662
ECCM/advanced radar test bed (E/ARTB) system definition --- Electronic Counter CounterMeasures p 157 A87-16749
Airborne pulse-Doppler radar - False-alarm control p 499 A87-37577
Low altitude wind shear detection with Doppler radar p 615 A87-40247
An airborne collision avoidance system - The TCAS p 649 A87-44231
An automated radar-signature measurement system p 698 A87-45886
Obstacle-warning radar for helicopters p 132 N87-13149
About the future of airborne radar p 387 N87-18722
Dual frequency MM-wave radar for antitank helicopter p 389 N87-18756
Requirements and applications for radar simulations: A standpoint of an airframe company p 389 N87-18759

JAWS multiple Doppler derived winds p 703 N87-25271

RADAR ECHOES

Radar reflectivity
[AD-A173508] p 268 N87-16204

RADAR EQUIPMENT

Near-field radar for helicopter obstacle avoidance p 365 A87-29631
Flight measurement data p 355 A87-29633
Testing and instrumentation used in the AN/APG-67 multimode radar
[SAE PAPER 861823] p 437 A87-32659
The equipping of the AVIA-D radar installation with a weather channel as a contribution to the modernization of the radar complex AVIA-D/KOREN p 425 A87-33330
Radar Technology 1986; Symposium, 6th, Bremen, West Germany, Nov. 4-6, 1986, Reports p 697 A87-45876
Radar requirements for future avionics systems p 662 A87-45879
Multifunction Radar for Airborne Applications --- conference
[AGARD-CP-381] p 387 N87-18721
Multimission airborne radar for the 1990s p 387 N87-18724
Multifunction millimetre-wave radar for all-weather ground attack aircraft p 387 N87-18725
MM wave SAR sensor design: Concept for an airborne low level reconnaissance system p 388 N87-18729

RADAR FILTERS

Homomorphic filtering for the resolution of radio-navigation signals and rereflections p 355 A87-29759

RADAR GEOLOGY

Preliminary simultaneous L/C-band images from the JPL aircraft synthetic aperture radar p 853 A87-53159

RADAR IMAGERY

Oil slick detection with an airborne SLAR p 178 A87-16746
ROSAR - A SAR concept based on rotating antennas p 179 A87-16747
Features of antenna aperture synthesis for an arbitrary flight-vehicle trajectory p 158 A87-17586
Airborne radar sensor and display processing p 435 A87-31510
Preliminary simultaneous L/C-band images from the JPL aircraft synthetic aperture radar p 853 A87-53159
Phase noise from aircraft motion: Compensation and effect on synthetic aperture radar images p 615 N87-24802

RADAR MEASUREMENT

Flight measurement data p 355 A87-29633
Airborne multibeam radar altimetry --- of oceans p 853 A87-53115
Doppler Radar Detection of Wind Shear
[NASA-CP-2435] p 17 N87-10054
A quick look at the first NRL short pulse 95 GHz radar flight data
[AD-A176182] p 468 N87-21214
Activities report in aerospace sciences
[ETN-87-99369] p 478 N87-21845

RADAR NAVIGATION

Homomorphic filtering for the resolution of radio-navigation signals and rereflections p 355 A87-29759
Aircraft accident report: Henson Airlines Beech B99, N339HA, Grottoes, Virginia, September 23, 1985
[PB86-910409] p 155 N87-13419
Multifunction Radar for Airborne Applications --- conference
[AGARD-CP-381] p 387 N87-18721
About the future of airborne radar p 387 N87-18722
Multifunction millimetre-wave radar for all-weather ground attack aircraft p 387 N87-18725
Dual frequency MM-wave radar for antitank helicopter p 389 N87-18756
Requirements and applications for radar simulations: A standpoint of an airframe company p 389 N87-18759

RADAR RECEIVERS

Approach to study of PRF sensitivity in airborne pulse-Doppler radar p 829 A87-53802
Development of a portable precision landing system
[NASA-TM-88247] p 160 N87-14310

RADAR RESOLUTION

Novel accuracy and resolution algorithms for the third generation MTD p 160 A87-19408
Preliminary simultaneous L/C-band images from the JPL aircraft synthetic aperture radar p 853 A87-53159
Motion compensation requirements for a high resolution spotlight SAR p 388 N87-18727

RADAR SCATTERING

An automated radar-signature measurement system p 698 A87-45886

RADAR SIGNATURES

Instrumentation for RCS measurements of modulation spectra of aircraft blades p 182 A87-19414
An automated radar-signature measurement system p 698 A87-45886
Experimental and theoretical Doppler-lidar signatures of aircraft wake vortices p 14 N87-10330
Radar target identification techniques applied to a polarization diverse aircraft data base
[AD-A180044] p 614 N87-24599

RADAR TARGETS

Airborne radar sensor and display processing p 435 A87-31510
Multiple Object Tracking Radar p 578 A87-41281
Radar reflectivity
[AD-A173508] p 268 N87-16204
Radar target identification techniques applied to a polarization diverse aircraft data base
[AD-A180044] p 614 N87-24599

RADAR TRACKING

A new concept in air traffic control - The multi-radar tracking (MRT) p 21 A87-12689
Radar-supported traffic monitoring systems for maritime and air safety p 158 A87-16988
Real-time wind estimation and tracking with transponder downlinked airspeed and heading data p 648 A87-42779
Aircraft accident report: Henson Airlines Beech B99, N339HA, Grottoes, Virginia, September 23, 1985
[PB86-910409] p 155 N87-13419
Radar reflectivity
[AD-A173508] p 268 N87-16204
Multifunction millimetre-wave radar for all-weather ground attack aircraft p 387 N87-18725
Requirements and applications for radar simulations: A standpoint of an airframe company p 389 N87-18759

RADIAL DISTRIBUTION

A prescribed radial distribution circulation of a hovering rotor blade p 627 A87-43414

RADIAL FLOW

Theoretical and experimental description for a radial supersonic flowfield p 213 A87-20880
Turbulence measurements in a radial upwash
[AIAA PAPER 87-1435] p 568 A87-42455
Effect of swirl on the performance of a radial vaneless diffuser with compressible flow at Mach numbers of 0.7 and 0.8
[ASME PAPER 86-WA/FE-6] p 629 A87-43704
A two-dimensional finite element stress analysis of radial impellers p 847 A87-51472
On sound propagation in centrifugal fan casings
[ESA-TT-957] p 138 N87-12326
Flow of gas through turbine stage with spherical nozzle segment p 592 N87-23582

RADIANT FLUX DENSITY

An improvement of the calibration of the Epley pyrgometer for the case of airborne measurements p 365 A87-28966

RADIATION ABSORPTION

Modeling the effects of wind tunnel wall absorption on the acoustic radiation characteristics of propellers
[AIAA PAPER 86-1876] p 208 A87-17991

RADIATION EFFECTS

The influence of radiation on the thermal equilibrium of a feeder turbine of a turbojet
[ONERA, TP NO. 1986-190] p 248 A87-21089

RADIATION MEASUREMENT

The application of radiation physics and photogrammetric techniques for the diagnosis and solution of mechanical engineering problems and performance improvements in the development of aero gas turbine engines at Rolls-Royce
[PNR90388] p 764 N87-27669

RADIATION MEASURING INSTRUMENTS

A new pyrgometer --- for infrared irradiance measurement p 263 A87-20952

RADIATION SOURCES

Sources and observers in motion. II - Acoustic radiation from a small rigid body in arbitrary motion. III - Acoustic radiation from non-compact rigid bodies moving at high speed p 59 A87-12995

RADIATION TOLERANCE

Radiation resistance of thin antennas of arbitrary elevation and configuration over perfectly conducting ground
[AD-A170945] p 267 N87-15397

RADIATIVE HEAT TRANSFER

The influence of radiation on the thermal equilibrium of a feeder turbine of a turbojet
[ONERA, TP NO. 1986-190] p 248 A87-21089
Volume interchange factors for hypersonic vehicle wake radiation
[AIAA PAPER 87-1520] p 707 A87-43044
Natural convection flow of a radiating rarefied gas between concentric rotating spheres
[AIAA PAPER 87-1523] p 693 A87-43046

SUBJECT INDEX

Radiation heat transfer in combustion systems p 785 A87-47165

Three-dimensional flow around and radiative heating of blunt bodies p 804 A87-51653

Combustion overview p 43 A87-11181

Radiative and convective heat transfer over ablating composite flat surface in hypersonic flow regime [AD-A182119] p 810 A87-28503

Thermal fatigue tests of a radiative heat shield panel for a hypersonic transport [NASA-TM-87583] p 845 A87-28643

RADIO BEACONS

United States Navy - Canadian Forces solid state flight data recorder/crash position locator experiment on the B-720 controlled impact demonstration p 33 A87-10097

RADIO COMMUNICATION

Radio Technical Commission for Aeronautics, Annual Assembly Meeting and Technical Symposium, Washington, DC, November 19-21, 1985, Proceedings p 1 A87-11801

Laboratory measurements and a theoretical analysis of the TCT fading channel radio system --- Tone Calibrated Technique p 385 A87-30321

RADIO CONTROL

Use of the updated NASA Langley radio-controlled drop-model technique for high-alpha studies of the X-29A configuration [AIAA PAPER 87-2559] p 768 A87-49609

Operating and support hazard analysis for self-contained navigation system LSI model 6216A, B and C, group B [AD-A169381] p 22 A87-10855

RADIO DIRECTION FINDERS

Geoloc long range spread spectrum accurate radiolocation system operational results p 580 A87-41385

RADIO FREQUENCY INTERFERENCE

Interference of the aeronautical nav aids (frequency band 108-118 MHz) from F.M broadcasting service (88-108 MHz) p 21 A87-12690

Ground testing of an operational fighter aircraft for p-static discharge effects p 824 A87-52522

RADIO INTERFEROMETERS

Measurement capability of moving-receiver radio interferometry p 159 A87-19360

Aided-airborne Gravity Gradiometer Survey System (GGSS) study [AD-A170749] p 203 A87-14766

Lightning strikes on aircraft. Exploitation of Landes (France)-Front '84 campaign and complementary development of airborne electrical sensors [ONERA-RF-91/7154-PY] p 470 A87-20706

RADIO NAVIGATION

Navigation and environment; Proceedings of the Fifth International Congress, Tokyo, Japan, October 1-5, 1985 p 20 A87-12676

Integration of GPS with other radionavigation systems p 21 A87-12680

The U.S. Federal Radionavigation Plan p 21 A87-12684

A low cost commercial GPS set p 21 A87-12685

Interference of the aeronautical nav aids (frequency band 108-118 MHz) from F.M broadcasting service (88-108 MHz) p 21 A87-12690

Radio-navigation meters based on the K588 series microprocessor unit p 86 A87-15569

The cost-effectiveness of terrestrial radio-navigation p 158 A87-17244

Automated aircraft navigation --- Russian book p 158 A87-17702

Modeling of radio navigation systems in the neighborhood of airports p 821 A87-28533

Modeling of the fault situation in navigation systems p 821 A87-28534

RADIO RECEIVERS

Synthesis of devices for the optimal processing of pulsed radio signals in LORAN systems p 86 A87-15563

Universal receiver for ICNIA p 434 A87-31460

The MLS angle receiver p 820 A87-51231

RADIO RELAY SYSTEMS

An airborne telemetry relay system for the Gulf Range p 498 A87-37415

UC-880 telemetry relay airborne command system p 499 A87-37416

RADIO SPECTRA

Frequency spectrum allocation for a potential land mobile-satellite service p 267 A87-15380

RADIO TRANSMISSION

Supplemental data transmission in AM radio broadcasting p 425 A87-33332

RADIOGRAPHY

High-X-ray flux, high-contrast radiography of carbon fiber-reinforced epoxy aircraft structures p 200 A87-19595

Microfocus radiography of jet engines p 321 A87-25822

Profile measurements using radiographic techniques p 465 A87-35064

RADIOMETERS

Quantitative thermal diffusivity measurements of composites p 45 A87-10750

Experimental comparison of radiometric scales from laboratory standards and solar radiation p 849 A87-53576

RADOME MATERIALS

Review of the role of thermoplastics in airborne radomes for the 1990s p 604 A87-41305

RADOMES

Microwave Antennas for Avionics [AGARD-LS-151] p 613 A87-23859

RAIL TRANSPORTATION

Evaluation of transport alternatives p 399 A87-31145

Cost characteristics of tilt-rotor, conventional air and high speed rail short-haul intercity passenger service [NASA-CR-181421] p 828 A87-29501

RAIN

Airborne infrared wind shear detector performance in rain obscuration [AIAA PAPER 87-0186] p 247 A87-22471

Comparative low Reynolds number tests of NACA 64-210, NACA 0012, and Wortmann FX67-K170 airfoils in heavy rain [AIAA PAPER 87-0259] p 222 A87-22518

Scaling laws for testing airfoils under heavy rainfall p 342 A87-28071

Development and experiment of airborne microwave rain-scatterometer/radiometer system. I - Hardware system. II - Experimental data processing software system p 365 A87-28435

Development and experiment of airborne microwave rain-scatterometer/radiometer system. III - Rain measurement and its data analysis p 393 A87-28436

The potential influence of rain on airfoil performance p 346 A87-31128

Low Reynolds number tests of NACA 64-210, NACA 0012, and Wortmann FX67-K170 airfoils in rain p 730 A87-50345

Rain effects at low Reynolds number p 808 A87-52884

The effects of heavy rain on profile aerodynamics [ETN-87-98848] p 292 A87-16809

The effect of heavy rain on an airfoil at high lift [NASA-CR-178248] p 417 A87-20232

An experimental low Reynolds number comparison of a Wortmann FX67-K170 airfoil, a NACA 0012 airfoil and a NACA 64-210 airfoil in simulated heavy rain [NASA-CR-181119] p 644 A87-25997

RAIN IMPACT DAMAGE

Potential influences of heavy rain on general aviation airplane performance [AIAA PAPER 86-2606] p 94 A87-14036

Rain effects at low Reynolds number [AIAA PAPER 87-0258] p 221 A87-22517

Wind tunnel test results of heavy rain effects on airfoil performance [AIAA PAPER 87-0260] p 222 A87-22519

RAMAN SPECTRA

Mobile CARS instrument for combustion and plasma diagnostics p 319 A87-23614

RAMAN SPECTROSCOPY

CARS applications to combustion diagnostics p 323 A87-26679

Application of spatially precise laser diagnostics to fundamental and applied combustion research p 608 A87-39804

Molecular flow velocity using Doppler shifted Raman spectroscopy [AIAA PAPER 87-1531] p 693 A87-43053

Advanced Instrumentation for Aero Engine Components [AGARD-CP-399] p 467 A87-21170

CARS approaches to simultaneous measurements of H2 and H2O concentration and temperature in H2-air combustion systems p 605 A87-23792

RAMJET ENGINES

Thermochemical evaluation of fuel candidates for ramjet propulsion p 121 A87-13659

Combustion studies of metallized fuels for solid-fuel ramjets p 121 A87-14982

Ramjet application in atmospheres of different celestial bodies [IAF PAPER 86-181] p 120 A87-15920

Prospective, characteristics and problems of the use of boron in different air augmented propulsion modes [IAF PAPER 86-191] p 122 A87-15924

Acoustic-vortex interactions and low frequency oscillations in axisymmetric combustors --- of ramjet engines [AIAA PAPER 87-0165] p 249 A87-22454

Finite amplitude waves in ramjet combustors [AIAA PAPER 87-0221] p 304 A87-24940

RANDOM VIBRATION

Analysis of the air flow into ramjet combustion chambers p 288 A87-27474

An experimental study on solid fuel ramjet type combustion p 378 A87-29390

Temperature and concentration measurements in a solid fuel ramjet combustion chamber p 369 A87-31278

Geometric effects on the combustion in solid fuel ramjets p 457 A87-35024

Simulations of ramjet combustor flow fields. I - Numerical model, large-scale and mean motions [AIAA PAPER 87-1421] p 633 A87-44949

Simulations of ramjet combustor flow fields. II - Origin of pressure oscillations [AIAA PAPER 87-1422] p 633 A87-44950

Vortex-nozzle interactions in ramjet combustors [AIAA PAPER 87-1871] p 668 A87-45266

Pressure oscillations and acoustic-entropy interactions in ramjet combustion chambers [AIAA PAPER 87-1872] p 668 A87-45267

Application of ceramics to ramjet engine nozzles p 690 A87-46221

Thermodynamic study of ramjet engines [INPE-4071-RPE/527] p 370 A87-18567

Combustion, simulation and test statistics on solid-fueled ramjet engines [INPE-4095-RPE/531] p 370 A87-19395

Mechanisms of exciting pressure oscillations in ramjet engines [AD-A174608] p 370 A87-19396

The effects of metallized fuel composition on the combustion characteristics of Solid Fuel Ramjets (SFRJ) [AD-A176744] p 515 A87-21922

Plasma torch igniter for scramjets p 605 A87-23789

Response of transonic diffuser flows to abrupt increases of back pressure: Wall pressure measurements p 611 A87-23793

Downstream boundary effects on the frequency of self-excited oscillations in transonic diffuser flows p 611 A87-23794

Linear coupling of acoustics and entropy and acoustic stability in ramjet combustion chambers containing a plane flame p 603 A87-23795

Analysis of pressure oscillations in ramjets. Review of research: 1985-1986 p 604 A87-23796

Tones generated due to the impingement of two jets on each other p 620 A87-23797

Passive shear-flow control to minimize ramjet combustion instabilities p 605 A87-23798

Acoustic response of turbulent reacting recirculatory flows p 620 A87-23799

Vortex-nozzle interactions in ramjet combustors p 612 A87-23800

Computational studies of the effects of acoustics and chemistry on the flow field in an axisymmetric ramjet combustor p 612 A87-23801

Numerical simulations of cold flow in a ramjet dump combustor with a choked exit nozzle p 612 A87-23802

Combustion instabilities in dump type ramjet combustors p 605 A87-23803

Effects on fuel spray characteristics and vaporization on energy release rates and flow field structure in a dump combustor p 612 A87-23804

Spray combustion: A driving mechanism for ramjet combustion instability p 606 A87-23805

Functionalization of cubane using hypervalent iodine p 606 A87-23807

RANDOM LOADS

Response of structures to random excitations in time domain p 382 A87-28562

RANDOM NOISE

State estimation of flying vehicle p 114 A87-16209

A secure data link for RPV and other applications p 578 A87-41279

RANDOM PROCESSES

First attainment of a level by a random process in flight dynamics problems p 443 A87-31731

Synthesis of time-invariant linear systems under determinate and random excitations --- for flight vehicle motion stability p 521 A87-39009

Influence of large deflection and transverse shear on random response of rectangular symmetric composite laminates to acoustic loads [NASA-CR-178313] p 798 A87-27489

RANDOM SAMPLING

Aircraft accident reports. Brief format, US civil and foreign aviation, issue number 2, 1986 accidents [PB87-916904] p 818 A87-28528

Aircraft accident reports. Brief format, US civil and foreign aviation, issue number 3, 1986 accidents [PB87-916905] p 819 A87-28529

RANDOM VIBRATION

Bounded random oscillations - Model and numerical solution for an airfoil p 311 A87-27532

- Stochastic response of nonlinear structures with parameter random fluctuations p 385 A87-30297
Experimental investigation of structural autoparametric interaction under random excitation
[AIAA PAPER 87-0779] p 464 A87-33675
Bounded random oscillations - Model and numerical resolution for an airfoil
[ONERA, TP NO. 1987-73] p 681 A87-46767
Fatigue of gas turbine blades under random vibrations p 832 A87-53442
La Recherche Aerospaciale, bimonthly bulletin, number 1986-2, 231/March-April
[ESA-TT-998] p 419 N87-20974

RANGE (EXTREMES)

- The problem of the maximum flight range of aircraft p 494 A87-35919
Once around the earth without refueling p 801 A87-54252

RANGE ERRORS

- Measurement errors in GPS observables p 159 A87-19357

RANKINE CYCLE

- Compound cycle engine for helicopter application [NASA-CR-175110] p 677 N87-25323

RANKINE-HUGONOT RELATION

- The Jacobi matrix technique in computational fluid dynamics p 796 N87-28348

RAPID QUENCHING (METALLURGY)

- New rapidly solidified titanium alloys produced by melt-spinning p 454 A87-31379
Characteristics of oxide dispersions in rapidly solidified titanium alloys p 454 A87-31385
Rare earth oxide dispersions in rapidly solidified titanium-aluminum alloys p 455 A87-31388
The effect of thermal treatment on properties of rapidly solidified AA2024 p 528 A87-36855
The preparation and properties of vapor deposited Al-Cr-Fe alloys p 841 A87-51634
Mechanical properties of rapidly solidified Al-4Be p 842 A87-52658

RARE EARTH COMPOUNDS

- Characteristics of oxide dispersions in rapidly solidified titanium alloys p 454 A87-31385
Rare earth oxide dispersions in rapidly solidified titanium-aluminum alloys p 455 A87-31388

RARE GASES

- Fighter aircraft OBIGGS (On-Board Inert Gas Generator System) study, volume 1 [AD-A183690] p 826 N87-29493
Fighter aircraft OBIGGS (On-Board Inert Gas Generator System) study, volume 2 [AD-A183781] p 826 N87-29494

RAREFIED GAS DYNAMICS

- A study of the shape of the cross-section profile of a minimum-drag three-dimensional conical body moving in a rarefied gas p 286 A87-25231
Natural convection flow of a radiating rarefied gas between concentric rotating spheres [AIAA PAPER 87-1523] p 693 A87-43046
Flow of a monoatomic rarefied gas around a rotating circular cylinder p 803 A87-50880

RAREFIED GASES

- An analysis of the approximation of the aerodynamic coefficients of thin bodies in a rarefied gas p 808 A87-53526

RATIONAL FUNCTIONS

- Nonlinear programming extensions to rational function approximations of unsteady aerodynamics [AIAA PAPER 87-0854] p 412 A87-33694

RAY TRACING

- Simulation and analysis of airborne antenna radiation patterns [NASA-CR-181250] p 790 N87-27870

RAYLEIGH SCATTERING

- Applications of laser velocimetry and Rayleigh scattering to engine flows p 385 A87-30677
Application of spatially precise laser diagnostics to fundamental and applied combustion research p 608 A87-39804

RAYLEIGH-RITZ METHOD

- Vibration characteristics of non-uniform rotor blades with discontinuities p 531 A87-35659

REACTION KINETICS

- Numerical study of finite-rate supersonic combustion using parabolized equations [AIAA PAPER 87-0088] p 259 A87-22407
A simple model for finite chemical kinetics analysis of supersonic turbulent shear layer combustion [AIAA PAPER 87-1879] p 696 A87-45273
Elementary-reaction and flow-mechanical problems in aircraft and spacecraft drives p 196 N87-14333
Fuels combustion research [AD-A172429] p 260 N87-16093
Computational chemistry p 706 N87-26023

READ-ONLY MEMORY DEVICES

- Grundy - Parallel processor architecture makes programming easy p 135 A87-13703

REAL GASES

- An analysis of flux-split algorithms for Euler's equations with real gases [AIAA PAPER 87-1117] p 617 A87-42066

REAL TIME OPERATION

- Rapid target locator p 18 A87-10944
Data compression for IR reconnaissance p 18 A87-10947

- Management of airborne reconnaissance images through real-time processing p 19 A87-10949
Reconnaissance interface - The near real time is now p 29 A87-10950

- The ASPRO parallel inference engine (A real-time expert system) p 29 A87-12218
A real-time simulation evaluation of an advanced detection, isolation and accommodation algorithm for sensor failures in turbine engines p 103 A87-13318

- The high speed interconnect system p 204 A87-16733
Dynamic holography for real-time 3-D cockpit display p 178 A87-16741

Aircraft ground vibration testing at NASA Ames-Dryden Flight Research Facility [NASA-TM-88272] p 753 A87-27655

AI at Ames: Artificial Intelligence research and application at NASA Ames Research Center, Moffett Field, California, February 1985 p 858 A87-29140

The ACEE program and basic composites research at Langley Research Center (1975 to 1986): Summary and bibliography [NASA-RP-1177] p 846 A87-29612

RESEARCH MANAGEMENT

Air Force technical objective document fiscal year 1987 [AD-A167324] p 62 A87-10779

Overview of the support of the aeronautics research and technology by the Bundesministerium fuer Forschung und Technologie (BMFT) [ETN-86-98215] p 144 A87-13402

Aerodynamics research and development at the Royal Aircraft Establishment (RAE), Farnborough in the United Kingdom [AD-A171837] p 258 A87-15982

Loads and Aeroelasticity Division research and technology accomplishments for FY 1986 and plans for FY 1987 [NASA-TM-89084] p 291 A87-16796

Compendium of NASA Langley reports on hypersonic aerodynamics [NASA-TM-87760] p 291 A87-16802

Research on structural analysis at the DFVLR, Brunswick p 326 A87-17078

Some innovations and accomplishments of Ames Research Center since its inception [NASA-TM-88348] p 716 A87-27609

Weather Research Program [PB87-196390] p 854 A87-29065

RESEARCH PROJECTS

Fatigue in aircraft corrosion testing: The first 10 years [NLR-MP-86009-U] p 380 A87-18662

RESIDENTIAL AREAS

Reaction to aircraft noise in residential areas around Australian airports p 54 A87-10116

How to limit the residential area affected by aircraft noise around an airport p 330 A87-27113

An international study of the influence of residual noise on community disturbance due to aircraft noise p 330 A87-27114

Ldn dictates local options - Why? --- sociological effect of artificially-modeled noise standards p 331 A87-27117

Aircraft noise descriptor and its application p 334 A87-27118

RESIDUAL STRENGTH

Evaluation of composite components on the Bell 206L and Sikorsky S-76 helicopter [SAE PAPER 861671] p 360 A87-29641

Long-term environmental effects and flight service evaluation of composite materials [NASA-TM-89067] p 319 A87-17858

RESIDUAL STRESS

Impact fracture of chemically tempered glass helicopter windshields p 195 A87-17824

Fatigue crack growth predictions of welded aircraft structures containing flaws in the residual stress field p 692 A87-42853

Fatigue and fracture mechanics analysis of compression loaded aircraft structure p 692 A87-42854

The role and the detection of residual stress in helicopter and aircraft components p 788 A87-48966

Residual stresses in 2024-T81 aluminum using caustics and moire interferometry p 843 A87-53785

RESIDUES

Carbon residue studies with a micro carbon residue tester [AD-A171153] p 259 A87-15306

RESIN BONDING

British Airways experience with composite repairs p 143 A87-18197

RESIN MATRIX COMPOSITES

Resin-hardener systems for resin transfer molding p 120 A87-13093

Polymer, metal, and ceramic matrix composites for advanced aircraft engine applications p 121 A87-15187

Review of the role of thermoplastics in airborne radomes for the 1990s p 604 A87-41305

Damage tolerance of toughened resin graphite composites p 604 A87-41305

Use of composites in propulsion systems p 761 A87-49633

RESONANCE TESTING

Validation of a method for air resonance testing of helicopters at model scale using active control of Pylon dynamic characteristics p 683 A87-43462

RESONANT FREQUENCIES

Natural frequency analysis of compressor rotor blades p 34 A87-10899

Natural frequency analysis of pretwisted plates p 46 A87-10900

Resonant and non-resonant acoustic properties of elastic panels. I - The radiation problem p 49 A87-13026

Investigation of the possibility of avoiding the resonance of a helicopter rotor blade by the modification of its parameters. I p 299 A87-25971

Investigation of the possibility of avoiding the resonance of a helicopter rotor blade by the modification of parameters. II p 299 A87-25974

The use of discrete minimization in the design of a straight control section in the fuselage of transport aircraft p 358 A87-28151

Pitching oscillating derivatives of wedges in supersonic and hypersonic p 371 A87-28343

A microcomputer based system for measuring natural frequencies and mode shapes of structures p 394 A87-28566

Minimizing the vibration amplitude of a symmetrical rotor at a specified resonance frequency p 460 A87-31734

A mathematical model for estimating the natural vibration frequency of the disks of gas turbine engines in the case of a slight change in the disk thickness p 591 A87-41911

- Research on the stress analysis method of rubber structure - Calculation of the frequency adapter stresses p 693 A87-43453
- Free vibration of a thin cylindrical shell with periodic circumferential stiffeners p 785 A87-47355
- A new model of a self-controlled system --- cross-flow excited elastically suspended body vibration p 847 A87-51158
- Self-excited oscillations in jet engine test cells p 859 A87-51215
- Wind tunnel resonance by the finite element method p 348 A87-18533
- Application of a system modification technique to dynamic tuning of a spinning rotor blade p 390 A87-18871
- Supersonic flow induced cavity acoustics p 476 A87-20601

RESONANT VIBRATION

- Spectral composition of the forces exciting vibrations in turbomachines p 262 A87-20388
- A discrete model of a deformable aeroplane with moving control surfaces for natural vibrations analysis p 428 A87-32934
- On the natural vibration of the aircraft structural model p 532 A87-36898
- Analysis of asymmetric natural vibrations of a deformable aeroplane with suspended bodies by the method of finite elements p 583 A87-39768
- A mathematical model for estimating the natural vibration frequency of the disks of gas turbine engines in the case of a slight change in the disk thickness p 591 A87-41911
- Substantiation of the analytical prediction of ground and air resonance stability of a bearingless rotor, using model scale tests p 654 A87-43463

RESOURCE ALLOCATION

- The FAA 'Buy-Sell' slot rule - Airline deregulation at the crossroads p 210 A87-19297
- Integrated communication, navigation, and identification avionics resource allocation [AD-A170357] p 182 A87-13439
- Net shape technology in aerospace structures. Volume 1 [AD-A176508] p 406 A87-20957

RESPIRATION

- Incompatibility of the M-1 maneuver with US Navy tactical aircraft oxygen systems [AD-A183731] p 856 A87-30072

RESPONSES

- Annoyance response to simulated advanced turboprop aircraft interior noise containing tonal beats [NASA-TP-2689] p 620 A87-24161

RETICLES

- The art of reticulation and applicable adhesives p 529 A87-38616

RETINAL IMAGES

- The retinal image of the fresnel lens optical landing system [AD-A176090] p 426 A87-20258

RETIREMENT FOR CAUSE

- Manufacturing technology for nondestructive evaluation (NDE) system to implement retirement for cause (RFC) procedures for gas turbine engine components p 44 A87-10727

RETROFITTING

- Assessing technologies for fighter aircraft preplanned-product improvement and retrofit [AIAA PAPER 86-2688] p 164 A87-17925

RETROREFLECTION

- Homomorphic filtering for the resolution of radio-navigation signals and rereflections p 355 A87-29759

REVERSED FLOW

- Numerical solution of the 3-dimensional boundary layer equations in the inverse mode using finite differences p 11 A87-10005
- Effects of thrust reversing in ground proximity p 573 A87-24416
- STOL landing thrust: Reverser jet flowfields p 573 A87-24417

REVISIONS

- Constructional improvements in a turboprop engine p 306 A87-27492
- Are general aviation modifiers needed? p 401 A87-31619
- Innovative aerodynamics - The sensible way of restoring growth capability to the EA-6B Prowler [AIAA PAPER 87-2362] p 748 A87-49079
- UH-60 Black Hawk engineering simulation model validation and proposed modifications [NASA-CR-177360] p 312 A87-17710
- Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane [NASA-TP-2691] p 585 A87-23614

REYNOLDS NUMBER

- Effect of Reynolds number on upper cowl flow separation p 347 A87-31289
- A summary of Reynolds number effects on some recent tests in the Langley 0.3-meter transonic cryogenic tunnel [SAE PAPER 861765] p 409 A87-32626
- A summary of the effects of Reynolds number on drag divergence for airfoils tested in the Langley 0.3-meter transonic cryogenic tunnel [SAE PAPER 861767] p 409 A87-32627
- Influence of Reynolds number on forebody side forces for 3.5-diameter tangent-ogive bodies [AIAA PAPER 87-2274] p 722 A87-49056
- Review of vortex flow flight projects on the F-106B [AIAA PAPER 87-2346] p 748 A87-49065
- Pseudo Reynolds number trends --- and transonic wind tunnel mach number errors [AIAA PAPER 87-2612] p 778 A87-49111
- Performance of two 10-lb/sec centrifugal compressors with different blade and shroud thicknesses operating over a range of Reynolds numbers [AIAA PAPER 87-1745] p 762 A87-50188
- Report on tests of a CAST 10 airfoil with fixed transition in the T2 transonic cryogenic wind tunnel with self-adaptive walls [RT-OA-63/1685] p 14 A87-10834
- Transition fixing and simulation of high Reynolds number flow at transonic velocities p 229 A87-15169

ROUTES
Extended Range Twin Operations (ETOPS) --- twin engine aircraft [CAP-513] p 422 N87-20976
Strategic control to improve efficiency of air traffic management p 501 N87-21894

RUBBER
Research on the stress analysis method of rubber structure - Calculation of the frequency adapter stresses p 693 A87-43453
Criteria for asphalt-rubber concrete in civil airport pavements: Mixture design [DOT/FAA/PM-86/39] p 129 N87-11910
Asphalt-rubber SAMI (Stress-Absorbing Membrane Interlayers) field evaluation [AD-A169700] p 194 N87-14356
Criteria for asphalt-rubber concrete in civil airport pavements. Vol. 2: Evaluation of asphalt-rubber concrete [DOE/FAA/PM-86/39-VOL-2] p 526 N87-21964

RUDDERS
Ten years of flight service with DC-10 composite rudders - A backward glance [SAE PAPER 861674] p 360 A87-29643
Lessons learned from the DC-10 carbon-epoxy rudder program [SAE PAPER 861675] p 360 A87-29644
A decade of composite rudder service reviewed p 689 A87-44861
Helicopter having a disengageable tail rotor [NASA-CASE-LAR-13609-1] p 588 N87-24460

RUN TIME (COMPUTERS)
Computational enhancements to a 4D algorithm --- for aircraft trajectory optimization p 134 A87-13359
How to make your aerodynamics in flutter calculations cheaper [NLR-MP-85056-U] p 152 N87-13416

RUNGE-KUTTA METHOD
Numerical solution of the Euler equations using rational Runge-Kutta method p 7 A87-11538
Acceleration to a steady state for the Euler equations p 70 A87-14096
Spectral methods for modeling supersonic chemically reacting flowfields p 70 A87-14110

A numerical study of viscous transonic flows using RRK scheme --- Rational Runge-Kutta [AIAA PAPER 87-0426] p 283 A87-24963
Computation of transonic flows in turbomachines using the Runge-Kutta integration scheme p 341 A87-27938
Improved integration procedures for flight simulation [DGLR PAPER 86-154] p 545 A87-36773
An easily vectorizable numerical solution of the Euler equations p 207 N87-14258
Runge-Kutta finite-volume simulation of laminar transonic flow over a NACA 0012 airfoil using the Navier-Stokes equations [FFA-TN-1986-60] p 574 N87-24429
Computational methods for vortex dominated compressible flows [NASA-CR-181144] p 789 N87-27130

RUNWAY ALIGNMENT
Loran-C approach considerations p 503 N87-22612

RUNWAY CONDITIONS
Numerical simulation of a flexible aircraft taking-off and landing on uneven runway p 190 A87-18529
Tire and runway surface research [SAE PAPER 861618] p 451 A87-32577
Flow rate and trajectory of water spray produced by an aircraft tire [SAE PAPER 861626] p 451 A87-32582
Alternate launch and recovery surface traction characteristics [SAE PAPER 861627] p 452 A87-32583
Classification of the load-carrying capacity of runway surfaces by the ACN-PCN method. II p 686 A87-46354
Classification of the load-carrying capacity of runway surfaces by the ACN-PCN method. IV p 777 A87-47316
First results of parallel-runway separation studies in the USSR p 777 A87-47881
An active control landing gear for the alleviation of aircraft taxi ground loads p 824 A87-53573
Runway incursions at controlled airports in the United States [PB86-917003] p 84 N87-11711
Number and duration of Runway Visual Range (RVR) runs for RVR-values lower than 225 m [KNMI-TR-85(FM)] p 119 N87-11805
Accident of the DC-10 EC-DEG aircraft at Malaga on September 13, 1982 [NASA-TM-88007] p 156 N87-14305
An investigation of spray impact forces --- aircraft wheels [BU-340] p 392 N87-19697
Performance of recycled asphalt concrete airport pavement surfaces [DOT/FAA-PM-86-12] p 466 N87-20432
Runway Visual Range (RVR) documentation of the civil airports in the Netherlands [KNMI-TR-84] p 426 N87-20986
Performance of cracked and sealed rigid airport pavements [DOT/FAA/PM-87/4] p 526 N87-21965
Consequence of layer separation on pavement performance [DOT/FAA/PM-86/48] p 602 N87-23661

RUNWAY LIGHTS
Performance of three visual approach landing light systems p 424 A87-33052
A simulator evaluation of alternative heliport approach lighting systems [AIAA PAPER 87-2635] p 838 A87-52290

RUNWAYS
Classification of the load-carrying capacity of runway surfaces by the ACN-PCN method. I p 686 A87-46353
Potential impacts of advanced technologies on the ATC capacity of high-density terminal areas [NASA-CR-4024] p 22 N87-10854
Advanced construction procedures: Confined bases for airport pavements [FAA/PM-86/9] p 118 N87-11799
Vertical deflection characteristics of aircraft tyres [ESDU-86005] p 129 N87-11992
Performance prediction of low volume airfield pavements [AD-A172270] p 193 N87-13454
Asphalt-rubber SAMI (Stress-Absorbing Membrane Interlayers) field evaluation [AD-A169700] p 194 N87-14356
Development of mechanistic flexible pavement design concepts for the heavyweight F-15 aircraft [AD-A170902] p 194 N87-14357
A study to monitor microseismic activity to detect sinkholes [DOT/FAA/PM-86/34] p 204 N87-14792

- Facilities technology application tests: Fuel-resistant pavement sealers
[AD-A17473] p 258 N87-15238
- A proposed single criterion for IFR (Instrument Flight Rules) approaches to converging runways

- DFVLR flight operation acting as a useful service unit for ERS-1 p 331 N87-17378

SCHEDULING

- Computer assisted arrival sequencing and scheduling with the COMPAS system p 502 N87-21897

Next generation of control techniques in advanced TMA p 502 N87-21898

SCHLIEREN PHOTOGRAPHY

Mixing characteristics of a supersonic multiple jet ejector [AIAA PAPER 87-0248] p 249 A87-22510

Aerodynamic research into the high cambered MCA-type supersonic compressor cascade p 343 A87-28417

SCHOOLS

Hover performance of a remotely piloted helicopter [AD-A176587] p 433 N87-20992

SCHROEDINGER EQUATION

Computational chemistry p 706 N87-26023

SCINTILLATION

Airborne laser communications scintillation measurements p 649 A87-45722

SCREENING

A review of modern X-ray screening devices p 314 A87-25846

SCREENS

Experimental evaluation of honeycomb/screen configurations and short contraction section for NASA Lewis Research Center's altitude wind tunnel [NASA-TP-2692] p 602 N87-23662

SEALERS

Polymer systems for rapid sealing of aircraft structures at low temperature [AD-A167667] p 41 N87-10209

Facilities technology application tests: Fuel-resistant pavement sealers [AD-A171473] p 258 N87-15238

SEALING

Development of field level repairs for composite structures p 404 N87-20177

SEALS (STOPPERS)

Alumina-CoCrAlY material as an improved intermediate layer for graded ceramic gas-path sealing in aeroturbine engines p 40 A87-12928

Dynamic stability threshold of contacting mechanical seals [ASLE PREPRINT 86-TC-3B-2] p 199 A87-19507

The rotor dynamic coefficients of coned-face mechanical seals with inward or outward flow [ASME PAPER 86-TRIB-6] p 199 A87-19526

Test results for sawtooth-pattern damper seals - Leakage and rotordynamic coefficients [ASME PAPER 86-TRIB-21] p 200 A87-19530

Why accumulators? --- in aircraft hydraulic systems p 300 A87-27333

Adhesively sealed fuel tanks - R&D to production [SAWE PAPER 1688] p 504 A87-36276

Turbine air seal with full backside cooling [AD-D012405] p 108 N87-12564

Improved vane platform sealing and retention means [AD-D012407] p 131 N87-12881

Ceramic high pressure gas path seal [NASA-CR-180813] p 764 N87-26914

SEAPLANES

Aero-marine design and flying qualities of floatplanes and flying-boats p 508 A87-39146

Design of CCV flight control system of STOL flying boat p 680 A87-45097

Problems in seaplane research [DGLR PAPER 86-126] p 744 A87-48160

SEARCH PROFILES

Search strategy for the potential collision between two aircraft p 351 A87-28152

SEARCH RADAR

About the future of airborne radar p 387 N87-18722

SEARCHING

Irish Dauphin helicopter S.A.R. system flight tests --- Search and Rescue p 648 A87-43455

SEAT BELTS

Static test procedures for restraint anchorages in small aircraft [SAE PAPER 871007] p 737 A87-48694

Computer simulation of a transport aircraft seat and occupant(s) in a crash environment, volume 1 [DOT/FAA/CT-86/25-1] p 156 N87-14306

Computer simulation of a transport aircraft seat and occupant(s) in a crash environment. Volume 2: Program SOM-TA user manual [DOT/FAA/CT-86/25-2] p 156 N87-14307

SEATS

The development of dynamic performance standards for civil rotorcraft seats p 89 A87-13666

Crew seat stroke requirements for helicopter rolled attitude impact crashworthiness p 90 A87-13669

Computer modeling of crashworthy seating systems p 90 A87-13671

Crashworthy crewseat limit load optimization through dynamic testing p 91 A87-13675

The design and qualification testing of an energy-absorbing seat for the Navy's H-53 A/D helicopters p 91 A87-13679

The development of dynamic performance standards for civil rotorcraft seats p 155 A87-19251

Crashworthiness analysis of transport aircraft seats p 352 A87-31135

Dynamic test methodology for aircraft seat and restraint systems [SAE PAPER 871010] p 737 A87-48697

Crash dynamics program transport seat performance and cost benefit study [DOT/FAA/CT-85/36] p 83 N87-11708

Seat experiment results of full-scale transport aircraft controlled impact demonstration [AD-A172245] p 235 N87-15193

SECONDARY FLOW

Study of a bounded jet flow considering the initial turbulence. II - In the case of relatively large nozzle aspect ratio p 71 A87-14263

Effect of a bulge on the secondary instability of boundary layers [AIAA PAPER 87-0045] p 281 A87-24910

Theoretical investigation of secondary instability of three-dimensional boundary-layer flows [AIAA PAPER 87-1338] p 566 A87-42398

Computation of tip and corner region flows p 537 N87-22153

SECONDARY INJECTION

Secondary stream and excitation effects on two-dimensional nozzle plume characteristics [AIAA PAPER 87-2112] p 637 A87-45414

Secondary stream and excitation effects on two-dimensional nozzle plume characteristics [NASA-TM-89813] p 349 N87-18539

SECONDARY RADAR

RSM-870 - An autonomous Mode-S compatible SSR beacon p 295 A87-24172

Mode S data link - Characteristics, capacity, and applications p 423 A87-31522

Developments in air traffic control systems and their relation with meteorology [RAE-TRANS-2143] p 426 N87-20981

SECURITY

Semiannual report to Congress on the effectiveness of the Civil Aviation Security Program [AD-A169813] p 155 N87-13420

SEDIMENTS

Data evaluation and technique development for analysis of JP-5 fuels [DE87-002025] p 380 N87-19534

Techniques to determine particulates in liquid fuels [DE87-002028] p 458 N87-21135

SELECTION

Selection of rolling-element bearing steels for long-life application [NASA-TM-88881] p 129 N87-11993

SELF ADAPTIVE CONTROL SYSTEMS

Helicopter model in flight identification by a real time self adaptive digital process p 680 A87-43458

SELF EXCITATION

Self-excited oscillations in jet engine test cells p 859 A87-51215

Dynamics of a high-speed rotor touching a boundary p 848 A87-51614

SELF OSCILLATION

Self-induced roll oscillations measured on a delta wing/canard configuration p 310 A87-24028

Construction of a generating solution and a generating system of equations in a study of self-oscillatory parachute motion p 408 A87-31729

Numerical simulation and comparison with experiment for self-excited oscillations in a diffuser flow p 693 A87-43381

Self-excited oscillations in jet engine test cells p 859 A87-51215

SELF TESTS

Integrated communications navigation identification avionics moves into the next generation avionics p 588 A87-41404

SEMISPAN MODELS

Evaluation of installed performance of a wing-tip-mounted pusher turboprop on a semispan wing [NASA-TP-2739] p 659 N87-26041

An investigation of tip planform influence on the aerodynamic load characteristics of semispan, upswep wing and wing-tip [NASA-CR-177428] p 731 N87-26865

SENSITIVITY

Optimal and insensitive control of hyperbolic distributed parameter systems with applications to wing flutter problems [AD-A174954] p 362 N87-18564

Sensitivity Analysis in Engineering [NASA-CP-2457] p 390 N87-18855

Sensitivity method for integrated structure/active control law design p 390 N87-18860

The case for aerodynamic sensitivity analysis p 349 N87-18861

Sensitivity of overall vehicle stiffness to local joint stiffness p 390 N87-18862

Design sensitivity analysis of nonlinear structural response p 390 N87-18863

Optimal control concepts in design sensitivity analysis p 390 N87-18864

Sensitivity derivatives and optimization of nodal point locations for vibration reduction p 390 N87-18869

Design sensitivity analysis of rotorcraft airframe structures for vibration reduction p 391 N87-18874

SENSORS

Sensor-based fault diagnosis in a flight expert system p 177 A87-16681

Covert penetration systems future strategic aircraft missions will require a new sensor system approach p 178 A87-16744

Passive fiber-optic coherence multiplexing for aircraft sensors p 459 A87-31506

A unique measurement technique to study laminar-separation bubble characteristics on an airfoil [AIAA PAPER 87-1271] p 631 A87-44921

SENSORY PERCEPTION

System sensory perception (SSP) p 181 A87-19283

Motion software for a research flight simulator p 704 A87-44713

SEPARATED FLOW

Mathematical modeling of separated flow past a wing profile and aerodynamic hysteresis p 5 A87-10619

Computation of turbulent supersonic flows around pointed bodies having crossflow separation p 5 A87-11487

Implicit finite-difference simulation of separated hypersonic flow over an indented nosetip p 7 A87-11533

Computations of separated subsonic and transonic flow about airfoils in unsteady motion p 8 A87-11786

An experimental study on large negative incidence separated flow in two-dimensional turbine cascades p 10 A87-12957

Spanwise variation of laminar separation bubbles on wings at low Reynolds number p 71 A87-14362

Modeling of turbulent separated flows for aerodynamic applications p 73 A87-15454

An antidiffusive numerical method solving supersonic three dimensional viscous separated flows p 148 A87-18576

Dynamic stall of oscillating airfoils p 150 A87-19278

Air intake flow visualization [ONERA, TP NO. 1986-162] p 264 A87-21062

Separation in three-dimensional incompressible flow Experiments for validation and modeling [ONERA, TP NO. 1986-180] p 214 A87-21079

Concerning inviscid solutions for large-scale separated flows p 264 A87-21271

Visualization of three-dimensional forced unsteady separated flow p 215 A87-21530

Computational methods for unsteady transonic flows [AIAA PAPER 87-0107] p 218 A87-22418

A computational analysis of flow separation over five different airfoil geometries at high angles-of-attack [AIAA PAPER 87-0188] p 220 A87-22472

A study of the laminar separation bubble on an airfoil at low Reynolds numbers using flow visualization techniques [AIAA PAPER 87-0242] p 221 A87-22505

An experimental investigation of a laminar separation on a natural laminar flow airfoil [AIAA PAPER 87-0458] p 226 A87-22650

A global marching technique for the prediction of separated flows over arbitrary airfoils [AIAA PAPER 87-0591] p 227 A87-22725

Transonic separated solutions for an augmentor wing p 279 A87-24032

A comparison of inviscid and viscous transonic separated flows [AIAA PAPER 87-0036] p 280 A87-24907

Flat plate delta wing separated flows with zero total pressure losses [AIAA PAPER 87-0038] p 280 A87-24908

Three-dimensional flow produced by a pitching-plunging model dragonfly wing [AIAA PAPER 87-0121] p 275 A87-24922

Visualization of unsteady separated flow about a pitching delta wing [AIAA PAPER 87-0240] p 320 A87-24943

Unsteady separated flows - Novel experimental approach [AIAA PAPER 87-0459] p 283 A87-24966

Solution of the two-dimensional Navier-Stokes equations using sparse matrix solvers [AIAA PAPER 87-0603] p 285 A87-24991

A numerical method for the calculation of incompressible, steady, separated flows around aerofoils p 285 A87-25002

Influence of a heated leading edge on boundary layer growth, stability and transition [DE87-008516] p 700 N87-25538
- SURFACE VEHICLES**
A new range of initial intervention vehicles foreseen --- for airport firefighting p 314 A87-25847
- SURFACES**
Analysis of a composite thin-walled aircraft structure p 127 A87-15226
Prediction of buffeting and calculation of unsteady boundary layer separation over airfoils [ONERA, TP NO. 1986-95] p 213 A87-21021
Nonplanar vortex lattice method for analysis of complex multiple lifting surfaces [NAL-TM-AE-8606] p 491 N87-21866
A structural model for composite rotor blades and lifting surfaces p 784 N87-26989
- SURGES**
Measurements and analysis of surge, stall and surge point parameters in turbojet compressors p 513 A87-37841
J85 surge transient simulation p 675 A87-46240
Microprocessor based surge monitoring system p 686 A87-46241
An experimental investigation of forced surge by water injection in a twin-spool turbojet engine p 762 A87-49993
Composite velocity procedures for flows with pressure interaction [AD-A179602] p 541 N87-22929
Development of model describing unstable operation of turbocompressor and design of antisurge protection for gas turbine engine p 592 N87-23577
New trends in intake/engine compatibility assessment p 593 N87-24467
Unsteady inlet distortion characteristics with the B-1B p 575 N87-24478
- SURVEILLANCE**
Mobile communications, navigation and surveillance [IAF PAPER 86-333] p 86 A87-16027
DFVLR develops inexpensive integrated navigation, communication and airspace surveillance system based on the distance measuring system DME p 425 A87-35177
Integrated navigation, communication and surveillance systems based on standard distance measuring equipment p 649 A87-44039
- SURVEILLANCE RADAR**
Novel accuracy and resolution algorithms for the third generation MTD p 160 A87-19408
Statistical classification of radar clutter --- for air traffic control feature extraction p 160 A87-19415
RSM-870 - An autonomous Mode-S compatible SSR beacon p 295 A87-24172
Mode S data link - Characteristics, capacity, and applications p 423 A87-31522
Experimental detection of anomalous mode-C reports using radar data p 497 A87-35340
Availability and maintainability of the RAMP monopulse SSR systems p 497 A87-35557
Low cost air surveillance radar developed p 497 A87-35559
Mode S beacon system: Functional description [DOT/FAA/PM-86/19] p 87 N87-11715
Possible contributions from the SSR mode S data link to the conduct of efficient aircraft operations p 500 N87-21887
Monopulse secondary radar: Practical realization and achievement. Mode S: The radar of tomorrow p 535 N87-21889
- SURVEYS**
Comparison of the effectiveness of measures of aircraft noise exposure by using social survey data p 54 A87-10117
Technology review of flight crucial flight control systems (application of optical technology) [NASA-CR-172332-SUPPL-1] p 36 N87-10102
General aviation activity and avionics survey [AD-A168582] p 65 N87-11686
Cumulative airport noise exposure metrics: An assessment of evidence for time-of-day weightings [AD-A174848] p 393 N87-19815
Survey of currently available high-resolution raster graphics systems p 705 N87-25771
First article noise survey of the A/F32T-9 large turbo fan engine enclosed noise suppressor system, far-field noise, McConnell AFB, Kansas [AD-A182475] p 860 N87-29308
- SURVIVAL**
Life threat assessment logic for adaptive control of the crest ejection seat p 161 A87-16941

- A preliminary study into the constant drag parachute for aircrew escape systems [BU-345] p 421 N87-20256
- SURVIVAL EQUIPMENT**
Aircraft accidents, survival, and rescue p 78 A87-13581
- SUSPENDING (HANGING)**
A new model of a self-controlled system --- cross-flow excited elastically suspended body vibration p 847 A87-51158
A comprehensive estimate of the static aerodynamic forces and moments of the 8 x 8 x 20 ft. cargo container [NASA-TM-89433] p 492 N87-21875
Airfoil flutter model suspension system [NASA-CASE-LAR-13522-1-SB] p 687 N87-25334
- SUSPENSION SYSTEMS (VEHICLES)**

Transpiration cooling - Contribution of film cooling to the overall cooling effectiveness p 847 A87-51475
- SWEDEN**
JAS39 Gripen - A Swedish solution to a multi-role need p 23 A87-11798
- SWEEP EFFECT**
Benefits of blade sweep for advanced turboprops p 303 A87-24007
- SWEEPBACK**
Quasi-transonic flow past delta wings p 718 A87-47747
- SWEEP FORWARD WINGS**
Aeroelastic divergence of trimmed aircraft p 94 A87-14368
Separation structures on cylindrical wings p 321 A87-25843
The aeroelastic tailoring of swept forward wings with advanced composites p 361 A87-30390
Visualization of three-dimensional structures about a pitching forward swept wing [AIAA PAPER 87-1322] p 631 A87-44929
Experimental aeroelastic behavior of forward-swept graphite/epoxy wings with rigid-body freedom p 824 A87-53781
Performance and quality flight test textbook. Volume 2: Flying qualities [AD-A168124] p 3 N87-10830
X-29A longitudinal and directional force and moment supplemental transonic wind tunnel test results [NASA-TM-85909] p 28 N87-10861
Forward-swept wing configuration designed for high maneuverability by use of a transonic computational method [NASA-TP-2628] p 75 N87-11702
Dynamics and aeroelasticity of composite structures [AD-A172922] p 260 N87-16078
The static aeroelasticity of a composite wing p 326 N87-17085
High performance forward swept wing aircraft [NASA-CASE-ARC-11636-1] p 361 N87-18561
Divergence and flutter of swept-forward wings with crossflexibilities [RAE-TR-80047] p 449 N87-21000
Subsonic longitudinal and lateral-directional characteristics of a forward-swept-wing fighter configuration at angles of attack up to 47 deg [NASA-TP-2727] p 732 N87-26874
Preliminary flight assessment of the X-29A advanced technology demonstrator [NASA-TM-100407] p 752 N87-26906
Dynamics and aeroelasticity of composite structures [AD-A182713] p 825 N87-28543
- SWEPT WINGS**
The stability of the boundary layer on an ellipsoid at angle of attack [AIAA PAPER 86-1045] p 215 A87-21528
Boundary-layer and wake measurements on a swept, circulation-control wing [AIAA PAPER 87-0156] p 219 A87-22449
Wing rock generated by forebody vortices [AIAA PAPER 87-0268] p 240 A87-22523
ADAM - An aeroservoelastic analysis method for analog or digital systems p 310 A87-24034
Unsteady sweep - A key to simulation of three-dimensional rotor blade airloads p 285 A87-25028
Section characteristics of a finite, swept circulation control airfoil p 342 A87-28072
Efficient simulation of separated three-dimensional viscous flows using the boundary-layer equations p 346 A87-31158
Analysis of transitional separation bubbles on infinite swept wings p 347 A87-31162
Induced-drag characteristics of crescent-moon-shaped wings p 410 A87-33244

Aeroelastic characteristics of swept circulation control wings [AIAA PAPER 87-0920] p 428 A87-33724

Stability and transition of three-dimensional flows p 553 A87-40079

An integral method for three-dimensional turbulent boundary layer with large crossflow [AIAA PAPER 87-1254] p 564 A87-42347

Three-dimensional transition studies at ONERA/CERT [AIAA PAPER 87-1335] p 566 A87-42395

Analysis and simplified prediction of primary instability of three-dimensional boundary-layer flows [AIAA PAPER 87-1337] p 566 A87-42397

Theoretical investigation of secondary instability of three-dimensional boundary-layer flows [AIAA PAPER 87-1338] p 566 A87-42398

Measurements of the performance of a helicopter swept tip rotor in flight p 652 A87-43423

Comparisons of unsteady flow fields about straight and swept wings using flow visualization and hotwire anemometry [AIAA PAPER 87-1334] p 631 A87-44932

Effect of a round airfoil nose on leading-edge suction p 809 A87-53784

Applications of CONMIN to wing design optimization with vortex flow effect p 98 A87-11737

Applicability of linearized-theory attached-flow methods to design and analysis of flap systems at low speeds for thin swept wings with sharp leading edges [NASA-TP-2653] p 230 A87-15174

Low-speed wind tunnel study of longitudinal stability and usable-lift improvement of a cranked wing [NASA-CR-178204] p 293 A87-17666

Dynamic stall penetration experiments on a swept wing [AD-A174962] p 363 A87-19380

Aileron reversal of swept wings with crossflexibilities [RAE-TR-83023] p 433 A87-20988

On 3D boundary layer computations on swept wings [NAL-PD-FM-8715] p 490 A87-21862

Some aspects of vortex flows determined from the thin-layer Navier-Stokes equations [NASA-TM-88375] p 571 A87-23595

An experimental investigation of an advanced turboprop installation on a swept wing at subsonic and transonic speeds [NASA-TP-2729] p 733 A87-26883

Contribution of wing dihedral to sideforce, yawing moment and rolling moment derivatives due to rate of roll at subsonic speeds, (Y sub p)sub gamma, (N sub p)sub gamma and (L sub p)sub gamma [ESDU-85006] p 813 A87-29409

SWEPTBACK WINGS

Vibration characteristics of a swept back rotor blade p 299 A87-27330

Spanwise pressure distribution on delta wing with leading-edge vortex flap p 348 A87-13299

Comparison of scaling results obtained for a swept-back wing in a hydrodynamic tunnel and in a wind tunnel [AAAF PAPER NT 86-12] p 526 A87-38036

Blast gust loading on a 35 degree swept-back wing [AD-A169415] p 116 A87-12570

A review of the performance of swept tip helicopter main rotor blades and an analysis of aeroacoustical effects [ETN-87-98936] p 302 A87-17696

Vortex interaction on a canard-wing configuration [AD-A179718] p 574 A87-24430

SWIRLING

Prediction of velocity coefficient and spray cone angle for simplex swirl atomizers p 125 A87-13830

Duct flows with swirl [AIAA PAPER 87-0247] p 265 A87-22509

Design of swirl simulators p 305 A87-27477

Propeller swirl effect on single-engine general-aviation aircraft stall-spin tendencies p 447 A87-34515

Effect of swirl on the performance of a radial vaneless diffuser with compressible flow at Mach numbers of 0.7 and 0.8 [ASME PAPER 86-WA/FE-6] p 629 A87-43704

Influence of fuel temperature on atomization performance of pressure-swirl atomizers p 698 A87-46198

A study of some factors affecting the performance of a contra-rotating axial compressor stage p 639 A87-46211

An experimental and numerical investigation of swirling flows in a rectangular nozzle [AIAA PAPER 87-2108] p 787 A87-48576

Measurement of swirling flow field using the single slanted hot-wire technique p 847 A87-51469

Influence of disk leakage path on labyrinth seal inlet swirl ratio p 538 A87-22210

A novel form of damper for turbo-machinery p 539 A87-22216

Development of intake swirl generators for turbo jet engine testing p 603 A87-24480

SWITCHING CIRCUITS

Component improvement program task 83-01, 36E133 air turbine starter [AD-A169483] p 108 N87-12562

SYMBOLIC PROGRAMMING

Symbolic generation of elastic rotor blade equations using a FORTRAN processor and numerical study on dynamic inflow effects on the stability of helicopter rotors [NASA-TM-86750] p 587 N87-24455

SYMMETRICAL BODIES

High Reynolds Number tests of the NASA SC(2)-0012 airfoil in the Langley 0.3-meter transonic cryogenic tunnel [NASA-TM-89102] p 571 N87-23594

Low-speed wind-tunnel results for symmetrical NASA LS(1)-0013 airfoil [NASA-TM-4003] p 645 N87-26033

SYNCHRONISM

Experience with synchronous and asynchronous digital control systems --- for flight [AIAA PAPER 86-2239] p 595 A87-40274

Real time simultaneous in-line wear and lubricant condition monitoring [AD-A183286] p 852 N87-29842

SYNCHRONOUS SATELLITES

Polar navigation assisted by satellite p 20 A87-11663

Geostationary satellite navigation systems p 648 A87-42786

The Navstar/GPS program - An evolution or a revolution in the world of navigation p 840 A87-53581

SYNCHROPHASING

Comparison of two propeller source models for aircraft interior noise studies p 88 A87-13596

Analytical model for investigation of interior noise characteristics in aircraft with multiple propellers including synchrophasing p 94 A87-14925

An experimental investigation of the interior noise control effects of propeller synchrophasing [NASA-CR-178185] p 60 N87-11577

SYNOPTIC METEOROLOGY

Forecasting and classifying dry microburst activity in the Denver area subjectively and objectively [AIAA PAPER 87-0443] p 269 A87-22636

Weather Research Program [PB87-196390] p 854 A87-29065

SYNTAX

Syntax analysis for a cockpit speech recognition system [DGLR PAPER 86-158] p 498 A87-36784

SYNTHESIS (CHEMISTRY)

Functionalization of cubane using hypervalent iodine p 606 N87-23807

SYNTHETIC APERTURE RADAR

ROSAR - A SAR concept based on rotating antennas p 179 A87-16747

Features of antenna aperture synthesis for an arbitrary flight-vehicle trajectory p 158 A87-17586

Preliminary simultaneous L/C-band images from the JPL aircraft synthetic aperture radar p 853 A87-53159

Multifunction Radar for Airborne Applications --- CONFERENCE [AGARD-CP-381] p 387 N87-18721

Multimission airborne radar for the 1990s p 387 N87-18724

Motion compensation requirements for a high resolution spotlight SAR p 388 N87-18727

Implementation of an airborne SAR motion compensation system p 388 N87-18728

MM wave SAR sensor design: Concept for an airborne low level reconnaissance system p 388 N87-18729

NASA/JPL aircraft SAR operations for 1984 and 1985 [NASA-CR-180237] p 393 N87-18909

Phase noise from aircraft motion: Compensation and effect on synthetic aperture radar images p 615 N87-24802

SYSTEM EFFECTIVENESS

Translating aircraft reliability and maintainability into measures of operational effectiveness [AIAA PAPER 86-2690] p 198 A87-17927

Aircrew automated escape systems requirements formulation, evaluation, test and acceptance p 294 A87-25836

Translating aircraft reliability and maintainability into measures of operational effectiveness p 789 A87-50334

Navy technology requirements for unmanned airborne vehicles p 245 N87-16002

Requirements and applications for radar simulations: A standpoint of an airframe company p 389 N87-18759

SYSTEM FAILURES

Evaluation of detectability and distinguishability of aircraft control element failures using flight test data p 110 A87-13435

Environmental Stress Screening (ESS) demonstrates its value in the field p 127 A87-15403

Sensor failure detection in flight control systems using deterministic observers p 114 A87-16195

GPS failure detection by autonomous means within the cockpit p 159 A87-19353

EMI-fault prevention and self recovery of digital flight control systems p 661 A87-43470

Analysis of typical fault-tolerant architectures using HARP p 704 A87-45771

Failure detection in dynamic systems with modeling errors [AIAA PAPER 87-2604] p 795 A87-50565

Failure detection and isolation for an asynchronous digital flight control system [AD-A179210] p 597 N87-23628

Fault-tolerant flight control system combining expert system and analytical redundancy concepts p 776 N87-27605

The effects of flight hours and sorties on failure rates [AD-A182084] p 716 N87-27611

Investigation of F-16 control surface failures and optimal setting of functional controls [AD-A182667] p 825 N87-28542

SYSTEM IDENTIFICATION

Identification and system parameter estimation 1985; Proceedings of the Seventh Symposium, University of York, England, July 3-7, 1985. Volumes 1 & 2 p 135 A87-16176

Determination of nonlinear aerodynamic coefficients using the estimation-before-modeling methods p 114 A87-16202

Design of adaptive direct digital flight-mode control systems incorporating recursive step-response matrix identifiers for high-performance aircraft p 187 A87-16771

CVR method for identification of nonsteady aerodynamic model --- coupled vibration record p 148 A87-18577

Integrated system identification methodology for helicopter flight dynamics p 190 A87-19239

System identification techniques for helicopter higher harmonic control p 190 A87-19241

Basic research in structural dynamic system identification p 206 A87-19242

Experience with frequency-domain methods in helicopter system identification p 680 A87-43457

UK research into system identification for helicopter flight mechanics p 793 A87-48959

Efficient computation of parameter confidence intervals [AIAA PAPER 87-2624] p 795 A87-49623

Analysis of lateral stability of X-29 drop model using system identification methodology [AIAA PAPER 87-2625] p 769 A87-49624

Identification of a dynamic model of a helicopter from flight tests p 300 N87-16813

SYSTEMS ANALYSIS

Reachable outputs in systems with bounded parameter uncertainties - Application to failure detection p 134 A87-13326

Application of Markov models for RMA assessment --- Reliability, Maintainability and Availability p 120 A87-13433

Computer-aided procedures for analyzing pilot/vehicle/system interactions p 186 A87-16759

A whole-system analysis of recuperated gas turbines p 305 A87-25884

Experience with synchronous and asynchronous digital control systems --- for flight [AIAA PAPER 86-2239] p 595 A87-40274

A system theoretical based method for module failure diagnostic of turbine engines p 35 N87-10085

Theoretical and experimental investigations of sensor location for optimal aeroelastic system state estimation p 115 N87-11794

Helicopter Icing Spray System (HISS) evaluation and improvement [AD-A170732] p 173 N87-13429

Viscous analyses for flow through subsonic and supersonic intakes [NASA-TM-88831] p 229 N87-15173

Treatment of technical objects as complex systems p 267 N87-16181

Air traffic control radar beacon system transponder performance study and analysis. Volume 2: Appendices [DOT/FAA/FS-86/1-VOL-2] p 296 N87-16812

Investigations of flight paths for maneuvers with constant energy and constant changes of energy including different strategies of steering, calculations of energy requirements for given flight paths, determination of the criteria for successful completion of turning maneuvers in the vertical plane [ETN-87-99017] p 362 N87-18565

SYSTEMS STABILITY

Singular perturbations in systems and control
p 473 A87-31550

T

T-37 AIRCRAFT

Performance of three visual approach landing light systems
p 424 A87-33052

T-38 AIRCRAFT

Application of multiple objective optimization techniques to finite element model tuning
p 266 A87-22819
Production implementation of titanium superelastically formed/diffusion bonded structure
p 782 A87-48019

T-56 ENGINE

A derivative engine based on new technology - Low risk; cost effective
[AIAA PAPER 87-1910]
p 669 A87-45292
Digital control development for the T56-A-427
[AIAA PAPER 87-2013]
p 670 A87-45353
Effects of inlet temperature and pressure upon the generalized performance parameters of the T56 engine
p 761 A87-49210

TABLES (DATA)

Census of US civil aircraft, calendar year 1986
[AD-A183423]
p 802 N87-29406
FAA (Federal Aviation Administration) air traffic activity FY 1986
[AD-A183624]
p 802 N87-29407

TACAN

TACAN/INS Performance Evaluation (TIPE) flight test report
[AD-A180138]
p 650 N87-25313

TACTILE DISCRIMINATION

Voice control of cockpit systems
p 837 N87-29526

TAIL ASSEMBLIES

Design and manufacturing of a CFRP tail fin for the A300
[MBB-UT-006-86]
p 93 A87-14026
A method for suppressing the flutter of a tail unit with a nonbalanced control surface
p 252 A87-20404
NOTAR helicopter - A new approach to helicopters
[SAWE PAPER 1734]
p 505 A87-36299
New aerodynamic design of the fenestron for improved performance
p 651 A87-43403
The Airbus rudder - An example of new fabrication technologies
p 623 A87-44228
NOTAR (No Tail Rotor) - Proof of concept
p 742 A87-47836
Interactive development of structural components for lightweight fiber-reinforced composite designs - The case of the Airbus vertical tails
[MBB-UT-023-86]
p 750 A87-49964
Pilot report - A tale about flying the NOTAR
p 750 A87-50224

Wind tunnel test of the modified goldschmied model with propulsion and empennage: Analysis of test results
[AD-A167360]
p 13 N87-10045

Effects of tail span and empennage arrangement on drag of a typical single-engine fighter aft end
[NASA-TP-23521]
p 15 N87-10838

Interference effects of thrust reversing on horizontal tail effectiveness of twin-engine fighter aircraft at Mach numbers from 0.15 to 0.90
[NASA-TP-2350]
p 36 N87-10870

Length adjustable strut link with low aerodynamic drag
[AD-D012279]
p 77 N87-12543

Flight investigation of the effect of tail configuration on stall, spin, and recovery characteristics of a low-wing general aviation research airplane
[NASA-TP-2644]
p 300 N87-16815

Effects of empennage surface location on aerodynamic characteristics of a twin-engine afterbody model with nonaxisymmetric nozzles
[NASA-TP-2392]
p 302 N87-17693

Investigation of empennage buffeting
[NASA-CR-179426]
p 392 N87-19754
Battle damage repair of composite structures
p 405 N87-20189

Effects of afterbody boattail design and empennage arrangement on aeropropulsive characteristics of a twin-engine fighter model at transonic speeds
[NASA-TP-2704]
p 492 N87-21873

On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration
[NASA-TM-89447]
p 643 N87-25305

Design of a composite tail for the Airbus A-320
[MBB-UT-12-86]
p 658 N87-25316

Flight characteristics test of the UH-60A with tail boom mounted strake
[AD-A180791]
p 751 N87-26898

Development of a reduced area horizontal tail for a wide body jet aircraft
[NASA-CR-172278]
p 837 N87-28564

Advanced manufacturing development of a composite empennage component for L-1011 aircraft. Phase 3: Production readiness verification testing
[NASA-CR-172383-PH-3]
p 845 N87-28616
Estimation of sideforce, yawing moment and rolling moment derivatives due to rate of roll for complete aircraft at subsonic speeds
[ESDU-85010]
p 826 N87-29490

TAIL ROTORS

NOTAR helicopter - A new approach to helicopters
[SAWE PAPER 1734]
p 505 A87-36299
An analysis of in-fin tail rotor noise
p 652 A87-43427

Damage tolerance concepts for modern helicopters
p 653 A87-43449

Investigations of blade-vortices in the rotor-downstream
p 721 A87-48970

Flight service evaluation of composite helicopter components
[NASA-CR-178149]
p 41 N87-10182

TAIL SURFACES

Effects of empennage surface location on aerodynamic characteristics of a twin-engine afterbody model with nonaxisymmetric nozzles
[NASA-TP-2392]
p 302 N87-17693

TAILLESS AIRCRAFT

Flying-wing SST for the Pacific
p 162 A87-17144
Flying wing could stealthily reappear
p 657 A87-46870

On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration
[NASA-TM-89447]
p 643 N87-25305

TAKEOFF

Guidance strategies for near-optimum take-off performance in a wind shear
p 24 A87-12138
Airplane flight through wind-shear turbulence
p 80 A87-14371

Bolt-on STOL kit --- for shorter takeoff by attitude controlling struts in landing gear of fighters
p 160 A87-16927

Numerical simulation of a flexible aircraft taking-off and landing on uneven runway
p 190 A87-18529

Wind shear; Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986
[SAE SP-681]
p 351 A87-29584

Takeoff predictions for powered-lift aircraft
[SAE PAPER 861630]
p 359 A87-29635

The optimization of longitudinal aircraft motion control during take-off
p 373 A87-30407

PAN AIR analysis of a transport high-lift configuration
p 348 A87-31292

A quasi-stationary calculation model for simulating helicopter starting and landing procedures with emphasis on the ground effects
[DGLR PAPER 86-152]
p 506 A87-36771

Effect of the longitudinal static stability margin on the take-off mass of aircraft
p 596 A87-42140

Maximum survival capability of an aircraft in a severe wind shear
p 680 A87-44254

Onboard instrumentation for flight test takeoff performance
p 662 A87-45126

Optimization and acceleration guidance of flight trajectories in a wind shear
p 765 A87-47807

Takeoff and landing in a downburst
p 738 A87-50344

Evaluation of a takeoff performance monitoring system
[AIAA PAPER 87-2256]
p 757 A87-50419

Feedback control for penetrating a downburst
[AIAA PAPER 87-2343]
p 771 A87-50462

The problem of the aviation-meteorological prediction of strong surface winds in eastern Bulgaria
p 853 A87-51195

Development of a takeoff performance monitoring system
[AIAA PAPER 86-2145]
p 828 A87-52962

USAF test pilot school. Flying qualities textbook, volume 2, part 2
[AD-A170960]
p 173 N87-13432

Accident of the DC-10 EC-DEG aircraft at Malaga on September 13, 1982
[NASA-TM-88007]
p 156 N87-14305

Survey of track keeping and altitudes on Heathrow and Gatwick Standard Instrument Departure routes --- London airports
[CAA-PAPER-84018]
p 160 N87-14308

Measurements of landing gear loads of a commuter airliner
[FFA-TN-1986-37]
p 176 N87-14323

Boundary layer transition control for takeoff and landing configurations
p 242 N87-15162

Development of a takeoff performance monitoring system
[NASA-CR-178255]
p 437 N87-20264

Aircraft accident report: Southern Air Transport LOGAIR Flight 51, Lockheed L-382G, Kelly Air Force Base, Texas, October 4, 1986
[PB87-910404]
p 576 N87-23604

Interpretation in terms of the response of a one degree-of-freedom oscillator to two successive disturbances
p 585 N87-23610

Simulation of aircraft behaviour on and close to the ground: Summary of AGARD-16c)ograph AG-285
p 600 N87-23640

Aircraft accident report: Midwest Express Airlines, Inc., DC-9-14, N100ME, General Billy Mitchell Field, Milwaukee, Wisconsin, September 6, 1985
[PB87-910401]
p 576 N87-24438

Control of aircraft under severe wind shear conditions
p 682 N87-26050

Simulation of automatic precision departures and missed approaches using the microwave landing system
[NASA-CR-178312]
p 741 N87-26893

Analysis of Convair 990 rejected-takeoff accident with emphasis on decision making, training and procedures
[NASA-TM-100189]
p 819 N87-29471

TAKEOFF RUNS

Dynamic loading of aircraft during ground operations
p 298 A87-25522

Changes in the free flow in the intake of a turbojet engine during the aircraft takeoff run
p 640 A87-46351

Classification of the load-carrying capacity of runway surfaces by the ACN-PCN method. IV
p 777 A87-47316

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, executive summary
[NASA-TM-87356-VOL-1]
p 495 N87-21878

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, facts and analysis
[NASA-TM-87356-VOL-2]
p 496 N87-21879

TANDEM ROTOR HELICOPTERS

Boeing 360 - Helicopter hi-tech
p 583 A87-39951

TANDEM WING AIRCRAFT

Supersonic STOVL fighter concepts featuring the hybrid tandem-fan propulsion system
p 172 A87-19281

Are tandem, diamond, joined and Warren wings related?
p 583 A87-39478

TANGENTS

Drag measurements of blunt stores tangentially mounted on a flat plate at supersonic speeds
[NASA-TP-2742]
p 734 N87-27626

TAPE RECORDERS

The Fairchild CVDR: A new combination voice and data recorder --- Cockpit Voice and Data Recorder (CVDR)
p 33 N87-10095

TAPERING

The effect of gyroscopic forces on dynamic stability and response of spinning tapered blades
[AIAA PAPER 87-0737]
p 464 A87-33663

TARGET ACQUISITION

Rapid target locator
p 18 A87-10944

Precision point target tracking
p 101 A87-13545

Covert penetration systems future strategic aircraft missions will require a new sensor system approach
p 178 A87-16744

In-flight resolution and sensitivity evaluation for airborne thermal imaging systems
p 245 A87-19695

An integrated navigation system for advanced attack helicopters
p 422 A87-31468

Advanced Helmet Integrated Display Systems
p 434 A87-31470

Airborne radar sensor and display processing
p 435 A87-31510

Robust nonlinear control for high angle of attack flight
[AIAA PAPER 87-0346]
p 597 A87-42649

Multifunction millimetre-wave radar for all-weather ground attack aircraft
p 387 N87-18725

TARGET RECOGNITION

AI/expert system processing of sensor information --- for high quality target recognition in military aircraft
p 423 A87-31498

Terminal guidance with low update rates
[AIAA PAPER 87-2592]
p 774 A87-50555

Radar target identification techniques applied to a polarization diverse aircraft data base
[AD-A180044]
p 614 N87-24599

TARS

Combustion by-products on F-4 drogue parachutes
[AD-A182929]
p 819 N87-29472

TASK COMPLEXITY

Case study - Developing an operations concept for future air traffic control
p 424 A87-33030

An assessment of variable format information presentation
p 861 N87-29512

TASKS

Multiple paths in complex tasks
[NASA-CR-180392]
p 619 N87-24911

TAXIING

- The equivalent masses at nose landing-gears during landing-impacts and when taxiing over runway perturbations p 88 A87-13637
- Optimization of airplane wing structures under taxiing loads p 785 A87-47192
- An active control landing gear for the alleviation of aircraft taxi ground loads p 824 A87-53573
- Aircraft Dynamic Response to Damaged and Repaired Runways [AGARD-R-739] p 584 A87-23609
- Interpretation in terms of the response of a one degree-of-freedom oscillator to two successive disturbances p 585 A87-23610
- An experimental-analytical routine for the dynamic qualification of aircraft operating on rough runway surfaces p 585 A87-23611

TAYLOR INSTABILITY

- Constant-density approximation to Taylor-Maccoll solution p 71 A87-14127

TECHNOLOGICAL FORECASTING

- Technical/economic evaluation of new propfan concepts in comparison with the turbofan of the 1990s p 104 A87-13989

Order estimation of linear time invariant system p 394 A87-28351
- TIME LAG**
Long range E-O Reconnaissance System and flight test results p 28 A87-10933
Frequency domain parameter estimation of aeronautical systems without and with time delay p 114 A87-16193
Effect of time delay on flying qualities - An update p 189 A87-17758
Evaluation of GPS ionospheric time delay algorithm for single-frequency users p 580 A87-41378
Some fundamentals of simulator cockpit motion generation p 683 A87-44714
Effect of time delay on manual flight control and flying qualities during in-flight and ground-based simulation [AIAA PAPER 87-2370] p 767 A87-49161
Predictive compensation of visual system time delays [AIAA PAPER 87-2434] p 794 A87-49165
Frequency response identification of a computer-generated image visual simulator with and without a delay compensation scheme [AIAA PAPER 87-2425] p 794 A87-49166
Effect of dynamic stall on helicopter trim and flap-lag response p 835 A87-54139
Piloted simulator study of allowable time delays in large-airplane response [NASA-TP-2652] p 312 N87-16849
High-angle-of-attack pneumatic lag and upwash corrections for a hemispherical flow direction sensor [NASA-TM-86790] p 590 N87-23616
Piloted simulator study of allowable time delay in pitch flight control system of a transport airplane with negative static stability [NASA-TM-89147] p 776 N87-26919
- TIME MARCHING**
A pre-processed implicit algorithm for 3D viscous compressible flow p 6 A87-11510
Application of a 2D time-marching Euler code to transonic turbomachinery flow p 6 A87-11516
An implicit time-marching scheme for transonic flow p 71 A87-14261
Prediction of the installed performance of 2D exhaust nozzles [AIAA PAPER 87-0245] p 249 A87-22508
A global marching technique for the prediction of separated flows over arbitrary airfoils [AIAA PAPER 87-0591] p 227 A87-22725
An efficient time-marching scheme for solving compressible Euler equations p 228 A87-22953
A time marching method of explicit scheme for solving transonic viscous flow within cascades p 278 A87-23755
Computation of transonic flows in turbomachines using the Runge-Kutta integration scheme p 341 A87-27938
Fast time marching approach to cascade transonic flow p 412 A87-34042
The calculations and experiments of aerodynamic characteristics of the radial circular cascades p 486 A87-36918
Computation of three-dimensional flows by viscous-inviscid interaction using the M2M method p 466 N87-20223
Computation of transonic 2D cascade flow and comparison with experiments p 517 N87-21943
Some turbomachinery blade passage analysis methods: Retrospect and prospect p 518 N87-21947
Downstream flow angle correlations for turbine cascades in subsonic and transonic flow conditions p 518 N87-21949

TIME MEASUREMENT

Time-averaged aerodynamic loads on the vane sets of the 40- by 80-foot and 80- by 120-foot wind tunnel complex
[NASA-TM-89413] p 780 N87-27680

TIME OPTIMAL CONTROL

A model comparison of a supersonic aircraft minimum time-to-climb problem
[AIAA PAPER 87-0146] p 240 A87-22441

A highly accurate feedback approximation for horizontal variable-speed interceptions p 310 A87-23988

A computational method for free time optimal control problems, with application to maximizing the range of an aircraft-like projectile p 372 A87-29677

Singular trajectories in airplane cruise-dash optimization
[AIAA PAPER 87-2404] p 772 A87-50488

Time-scale synthesis of a closed-loop discrete optimal control system p 857 A87-52960

Formulation and minimality of nonlinear discrete time control systems p 254 A87-15233

TIME RESPONSE

Time scale analysis of a digital flight control system
p 109 A87-13347

TIME SERIES ANALYSIS

Visualization of three-dimensional forced unsteady separated flow
[AD-A168939] p 51 N87-11129

TIMING DEVICES

Ground-based time-guidance algorithm for control of airplanes in a time-metered air traffic control environment: A piloted simulation study
[NASA-TP-2616] p 34 N87-10864

TIMOSHENKO BEAMS

Timoshenko beams and flexible multibody system dynamics p 786 A87-48044

TIP SPEED

Tip clearance flows. I - Experimental investigation of an isolated rotor. II - Study of various models and comparison with test results p 638 A87-46208

Investigations of the aerodynamic performance and noise characteristics of a Dowty Rotol R212 propeller at full-scale in the 24 ft wind tunnel p 763 A87-50588

Cruise noise of the 2/9th scale model of the Large-scale Advanced Propfan (LAP) propeller, SR-7A
[NASA-TM-100175] p 798 N87-28398

TIP VANES

Measurement of side forces of a H-force rotor p 651 A87-43410

Transonic flow analysis for rotors. Part 2: Three-dimensional, unsteady, full-potential calculation
[NASA-TP-2375-PT-2] p 15 N87-10841

Parametric analysis of a passive cyclic control device for helicopters p 28 N87-10862

Tip vane drag measurements on the full scale experimental wind turbine
[IW-R517] p 294 N87-17683

TIPS

An experimental investigation of free-tip response to a jet
[NASA-IM-88250] p 76 N87-12539

Supplementary calibration test of the tip-aerodynamics-and acoustics-test pressure transducers
[NASA-TM-88312] p 131 N87-12830

Computation of tip and corner region flows p 537 N87-22153

TIRES

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, executive summary
[NASA-TM-87356-VOL-1] p 495 N87-21878

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, facts and analysis
[NASA-TM-87356-VOL-2] p 496 N87-21879

TITANIUM

Superplastic forming/diffusion bonding of titanium p 689 A87-44747

Designing with titanium --- aircraft engines
[PNR90325] p 251 N87-15969

TITANIUM ALLOYS

Superplasticity in aeroengine titanium alloy VT-9 and its modified compositions p 39 A87-12096

New rapidly solidified titanium alloys produced by melt-spinning p 454 A87-31379

Characteristics of oxide dispersions in rapidly solidified titanium alloys p 454 A87-31385

Rare earth oxide dispersions in rapidly solidified titanium-aluminum alloys p 455 A87-31388

Powder metallurgy of titanium aluminide components p 455 A87-31399

Titanium alloy springs p 463 A87-33181

Titanium aluminides - Future turbine materials p 456 A87-33272

Deformation and fracture of the titanium disks of gas-turbine engines due to changes in the frequency and shape of the loading cycle p 604 A87-41913

High temperature titanium alloys p 689 A87-44739

Developments in titanium alloys p 689 A87-44744

The current application of titanium in Japan and an outlook for the future p 781 A87-47978

Mechanical property tailoring titanium alloys for jet engine applications p 781 A87-47985

The effect of near net shape processing methods on the titanium industry p 781 A87-47992

Precision forging of titanium alloys p 781 A87-47993

Electron beam welded titanium alloys in Rolls Royce aero engines p 781 A87-48002

The Rolls-Royce wide chord fan blade p 786 A87-48004

Powder metallurgy (P/M) near-net shape titanium components from prealloyed powder p 782 A87-48007

Developments of melting and casting technology of titanium base alloys p 782 A87-48012

Superplastic forming/diffusion bonding of titanium - An Air Force overview p 782 A87-48018

Production implementation of titanium superelastically formed/diffusion bonded structure p 782 A87-48019

SPF/titanium and the B-1B aircraft p 782 A87-48020

Quality assurance - The key to advanced aircraft engine applications of the SPF/DB process --- superplastically formed and diffusion bonded p 786 A87-48021

Low cost manufacture in titanium and aluminum alloys using the processes of superplastic forming (SPF) and diffusion bonding p 788 A87-49637

Galvanic corrosion between carbon fiber reinforced plastics and metallic aeronautical materials
[DFVLR-FB-86-16] p 42 N87-11003

Designing with titanium --- aircraft engines
[PNR90325] p 251 N87-15969

Economical manufacturing and inspection of the electron-beam-welded Tornado wing box p 324 N87-17055

Diffusion bonding in the manufacture of aircraft structure p 324 N87-17057

Shot peening for Ti-6Al-4V alloy compressor blades
[NASA-TP-2711] p 467 N87-20566

Net shape technology in aerospace structures. Volume 2. Appendix. Precision Forgings in Aerospace Structures. Presentations of a workshop held on December 3-5, 1984 in Oxnard, California p 406 N87-20958

Net shape technology in aerospace structures. Volume 3. Appendix. Emerging Net Shape Technologies. Presentations of a workshop held on March 27-29, 1985 in Santa Barbara, California p 406 N87-20959

Diffusion bonding of metals p 852 N87-29646

TITANIUM COMPOUNDS

Applications of the titanium tetrachloride method for flow visualization in aerodynamic testing p 806 A87-52324

TOLERANCES (MECHANICS)

Development of damage tolerance and durability design technology p 359 A87-29602

Stochastic crack propagation with applications to durability and damage tolerance analyses
[AD-A168040] p 53 N87-11226

Assessment of damage tolerance requirements and analyses: A user's manual for crack growth and crack initiation analysis: DAMGRO p 132 N87-12939

Assessment of damage tolerance requirements and analysis. Volume 3: Analytical predictions and correlations
[AD-A170989] p 173 N87-13433

Assessment of damage tolerance requirements and analysis. Volume 4: Raw test data
[AD-A170990] p 174 N87-13434

Durability and damage tolerance of Large Composite Primary Aircraft Structure (LCPAS)
[NASA-CR-3767] p 319 N87-17860

Assessment of damage tolerance requirements and analysis. Volume 5: Assessment and recommendations
[AD-A175111] p 363 N87-19381

ACEE composite structures technology
[NASA-CR-172358] p 844 N87-28614

TOLERANCES (PHYSIOLOGY)

Seat experiment results of full-scale transport aircraft controlled impact demonstration
[AD-A172245] p 235 N87-15193

NOISEMAP 5.1 computer program update. Operator's manual, addendum 2
[AD-A177345] p 543 N87-22314

TOLLMEIN-SCHLICHTING WAVES

Effect of a bulge on the secondary instability of boundary layers
[AIAA PAPER 87-0045] p 281 A87-24910

TOMOGRAPHY

Application of tomography in 3-D transonic flows
[AIAA PAPER 87-1374] p 567 A87-42419

Tomographic reconstruction of three-dimensional flow over airfoils
[AD-A179976] p 643 N87-25300

TORNADOES

The terminal area simulation system. Volume 2: Verification cases
[NASA-CR-4047] p 421 N87-20252

TORQUE

Effect of tangential torque on the dynamics of flexible rotors
[ASME PAPER 86-WA/APM-23] p 46 A87-11113

Finite element contact analysis of ring gear and support p 127 A87-15193

Measurement of side forces of a H-force rotor p 651 A87-43410

Helicopter anti-torque system using fuselage strakes
[NASA-CASE-LAR-13630-1] p 597 N87-23630

TORQUE CONVERTERS

The 3600 hp split-torque helicopter transmission
[NASA-CR-174932] p 106 N87-11788

TORSION

Nonlinear flexure and torsion of rotating beams, with application to helicopter rotor blades. I - Formulation. II - Response and stability results p 161 A87-16963

The effect of circumferential aerodynamic detuning on coupled bending-torsion unstalled supersonic flutter
[ASME PAPER 86-GT-100] p 304 A87-25396

Effects of three centres of blade on fluttering p 306 A87-27481

Experimental study of the aerodynamics of incipient torsional stall flutter p 347 A87-31285

Experimental validation of the criterion of stall-related flutter
[AAAF PAPER NT 86-18] p 521 A87-38041

Determination of the structural properties of helicopter rotor blades by theoretical and experimental methods p 653 A87-43450

Influence of third-degree geometric nonlinearities on the vibration and stability of pretwisted, precone, rotating blades p 674 A87-46228

An experimental investigation of the structural dynamics of a torsionally soft rotor in vacuum p 244 N87-15965

Torsion-tension coupling in rods p 326 N87-17079

Correlation of analytical calculations from GRASP (General Rotorcraft Aeromechanical Stability Program) with torsionally-soft rotor data p 524 N87-22689

A method for the manufacture of model helicopter rotor blades with torsional stiffness representative of full scale
[RAE-TR-85094] p 752 N87-26904

TORSIONAL STRESS

Some considerations on the modern beam theory - Development of the practical methods p 381 A87-28434

Nonlinear analysis of pretwisted rods using 'principal curvature transformation'. I - Theoretical derivation p 386 A87-31169

Mechanical evaluation of the aeroelastic behaviour of a fan blade p 675 A87-46248

Aeroelastic control of stability and forced response of supersonic rotors by aerodynamic detuning p 676 A87-46249

An analytical study of impulsive destruction of the tail-rotor-drive-shaft p 747 A87-48956

TORSIONAL VIBRATION

Application of a mixed variational approach to aeroelastic stability analysis of a nonuniform blade p 126 A87-14423

Modeling of multi-rotor torsional vibrations in rotating machinery using substructuring p 381 A87-28543

An improved assumed mode method for estimating the motion of a nonuniform rotor blade p 653 A87-43445

Turbomachine blade vibration p 593 N87-23621

TOTAL ENERGY SYSTEMS

Flight testing TECS - The Total Energy Control System
[SAE PAPER 861803] p 444 A87-32648

NASA B737 flight test results of the total energy control system
[NASA-CR-178285] p 775 N87-26918

TOUCHDOWN

Vibration control of flexible multibody aircraft during touchdown impacts p 745 A87-48713

TOUGHNESS

Carburizing steel for high temperature service
[AD-A168327] p 122 N87-11877

TOWED BODIES

Isochrones for minimum time horizontal gliding flight
[AIAA PAPER 87-0449] p 240 A87-22641

The structural optimization of a spreader bar for twin lift helicopter operations p 100 N87-11759

TOWING

- The water towing tank as an experimental facility
p 777 A87-48288

TOXIC HAZARDS

- Fire safety science; Proceedings of the First International Symposium, Gaithersburg, MD, October 7-11, 1985
p 78 A87-13186

TOXICITY

- Fire, smoke, toxicity --- in airline operations
p 646 A87-44748

TRACERS

- Use of tracers for hydrodynamic visualization and measurements in steady vortex flows
[ONERA, TP NO. 1986-91] p 263 A87-21020

TRACKING (POSITION)

- The methodology and tools for processing radar data
p 19 A87-11662
- Methods for obtaining robust tracking control laws
p 134 A87-13319
- Precision point target tracking
p 101 A87-13545
- GPS enhancements for aircraft
p 236 A87-19997
- Low altitude aircraft tracking and registration system
[DGLR PAPER 86-137] p 498 A87-36780
- Aircraft positioning using Global Positioning System carrier phase data
p 821 A87-54367
- Signal processing and interpretation using multilevel signal abstractions
[AD-A169166] p 57 N87-11513
- Evaluation of numerator lead effects on aircraft handling qualities
p 523 N87-22687
- Advanced visuals in mission simulators
p 599 N87-23636
- Integration of altitude and airspeed information into a primary flight display via moving-tape formats: Evaluation during random tracking task
[NASA-TM-4010] p 758 N87-27665
- Velocity accuracy measurement of GPS user equipment
p 822 N87-29477
- Joint development of the Multi-function Integrated Inertial Sensor Assembly (MIIISA)
p 852 N87-29479
- Tracking a laser-projected horizon indicator
[AD-A183384] p 856 N87-30051

TRACKING FILTERS

- A nonlinear tracker using attitude measurements
p 496 A87-35337
- An angle-only tracking filter in modified spherical coordinates --- for fighter aircraft maneuvers
[AIAA PAPER 87-2380] p 741 A87-50465

TRACKING RADAR

- Multiple Object Tracking Radar
p 578 A87-41281
- Altitude aided GPS
p 580 A87-41390
- Multifunction Radar for Airborne Applications --- conference
[AGARD-CP-381] p 387 N87-18721
- About the future of airborne radar
p 387 N87-18722
- Multimission airborne radar for the 1990s
p 387 N87-18724

TRACTION

- Alternate launch and recovery surface traction characteristics
[SAE PAPER 861627] p 452 A87-32583

TRADEOFFS

- MTFCS (multiple target formation flight control system)
Formation position sensor trade-off analysis
p 110 A87-13536
- Aerodynamic tradeoff study of conventional, canard, and tri-surface aircraft systems
p 146 A87-17814
- Aircraft availability optimization --- tradeoffs in optimal systems design
p 475 A87-35009
- Processor tradeoffs in distributed real-time systems
p 857 A87-52796
- Effect of a trade between boattail angle and wedge size on the performance of a nonaxisymmetric wedge nozzle
[NASA-TP-2717] p 570 N87-23593

TRAFFIC

- Performance prediction of low volume airfield pavements
[AD-A172270] p 193 N87-13454

TRAFFIC CONTROL

- Aircraft earth station for experimental mobile satellite system
p 386 A87-30779

TRAILING EDGE FLAPS

- Manufacture of bonded composite assemblies for aircraft
p 1 A87-13005
- Unsteady wake measurements of an oscillating flap at transonic speeds
p 278 A87-23652
- Characteristics of a trailing flap flow with small separation
p 383 A87-29956
- Optimum flap schedules and minimum drag envelopes for combat aircraft
p 556 A87-41635
- Flow over a trailing flap and its asymmetric wake
p 626 A87-43376
- Helicopter response to an airplane's vortex wake
p 678 A87-43430

- Validation of aerodynamic measurement techniques and calculation methods for high-lift systems
p 640 A87-46363

- Leading- and trailing-edge flaps on a low Reynolds number airfoil
p 808 A87-52886
- Stress analysis of Pathfinder-2 models
[NASA-CR-172458] p 51 N87-11179
- Low-speed aerodynamic characteristics of a wing-canard configuration with underwing spanwise blowing on the trailing-edge flap system
[NASA-TM-89020] p 231 N87-15180
- Low-speed investigations of Apex fence and cavity flap concepts on a 60 degrees delta configuration
[AD-A183138] p 816 N87-29425

TRAILING EDGES

- Influence of trailing-edge meshes on skin friction in Navier-Stokes calculations
p 71 A87-14125
- Flow energizer flight tests on a light twin aircraft
[AIAA PAPER 87-0083] p 239 A87-22404
- Dynamic stall wake interaction with a trailing airfoil
[AIAA PAPER 87-0239] p 282 A87-24942
- Blade-vortex interaction
[AIAA PAPER 87-0497] p 284 A87-24971
- A study of a circulation control airfoil with leading/trailing edge blowing
[AIAA PAPER 87-0157] p 345 A87-31104
- Trailing-edge separation/stall alleviation
p 347 A87-31196
- Surface pressure fluctuations produced by vortex shedding from a coated airfoil
p 485 A87-36336
- A mutually profitable alliance - Asymptotic expansions and numerical computations --- in fluid mechanics
p 533 A87-37215
- The use of discrete vortices to predict lift of a circulation control rotor section with a trailing edge blowing slot
p 627 A87-43416
- Flow-field measurements of an airfoil with a deflected spoiler using an LDV system
[AIAA PAPER 87-1438] p 634 A87-44955
- Trailing vortex rollup computations using the point vortex method
[AIAA PAPER 87-2479] p 726 A87-49095
- Near wake of an unsteady symmetric airfoil
p 803 A87-51221

- Viscous wing theory development. Volume 1: Analysis, method and results
[NASA-CR-178156] p 12 N87-10043
- Further studies on the 21% thick, supercritical NLF airfoil NAE (National Aeronautical Establishment) 68-060-21:1
[AD-A175923] p 350 N87-19358
- Comparison of finite difference calculations of a large region of recirculating flow near an airfoil trailing edge
p 415 N87-20218

- Verification of performance results for a low-speed 15 percent elliptical circulation control airfoil
[NASA-CR-181020] p 494 N87-22633
- Unsteady separated flows: Vorticity and turbulence
[AD-A179500] p 614 N87-23912
- A study of the effects of Reynolds number and Mach number on constant pressure coefficient jump for shock-induced trailing-edge separation
[NASA-CR-4090] p 731 N87-26864
- Development of direct-inverse 3-D method for applied aerodynamic design and analysis
[NASA-CR-180646] p 751 N87-26895
- A direct-inverse method for transonic and separated flows about airfoils
[NASA-CR-181233] p 733 N87-27620
- Effect of airfoil mean loading on high-frequency gust interaction noise
p 811 N87-28513
- The structure of leading edge vortex flows including vortex breakdown
p 818 N87-29467

TRAINING AIRCRAFT

- Exploratory wind-tunnel investigation of the stability and control characteristics of advanced general aviation configurations
[AIAA PAPER 86-2596] p 111 A87-14031
- Advanced trainer aircraft design for fighter-attack-recce roles
[AIAA PAPER 86-2729] p 165 A87-17947
- T-46A flight test results
p 357 A87-28150
- Flutter investigations involving a free floating aileron
[AIAA PAPER 87-0909] p 447 A87-33718
- Design of a two-seater training aircraft with propeller turbines
[DGLR PAPER 86-127] p 506 A87-36767
- T-46A flight test results
p 743 A87-47844
- Spin-tunnel investigation of a 1/15-scale model of an Australian trainer airplane
[NASA-TM-89049] p 418 N87-20240
- Evolution of combat performance of the Hawk light combat aircraft
p 509 N87-22668
- Evaluation of numerator lead effects on aircraft handling qualities
[AD-A179388] p 523 N87-22667

- The development of the T-46 next generation trainer manned engineering simulator at the US Air Force Flight Test Center
p 601 N87-23652

TRAINING ANALYSIS

- Weather hazards training for United States Air Force (USAF) flight operations
[AIAA PAPER 87-0333] p 234 A87-22567
- Avionics systems within a training environment - Hardware versus software models
p 270 A87-23072
- Implementation of turbulence models into simulators
p 527 N87-22354

TRAINING EVALUATION

- Obstacles to meeting Army National Guard aviator training requirements
p 420 A87-33054
- Low-cost avionics simulation for aircrew training
[AD-A169198] p 34 N87-10865

TRAINING SIMULATORS

- Simulator training (retraining) of aircrews with emphasis on hazardous weather
[AIAA PAPER 87-0337] p 234 A87-22568
- Super wide field of view perspective image transformation by pixel to pixel mapping
p 328 A87-23778
- Aircraft carrier landing research at the visual technology research simulator - Implications for simulator design
p 375 A87-30848
- F-16 SAMT evaluation - Overview and commentary --- Simulated Aircraft Maintenance Trainers
p 376 A87-30850
- The rise of the Phoenix - Development of a KC-135R operational flight trainer
p 376 A87-30851
- Development of a digital/analog electronic flight instrumentation system (EFIS) simulation
p 451 A87-31545

- Satisfying the flight test data requirements of flight training simulators
p 779 A87-49201
- Simulating Hermes
p 840 A87-54195
- Integrating a head-up display with dome visual simulation technology
[AD-A175222] p 366 N87-19394

TRAJECTORIES

- A decentralized approach to integrated flight control synthesis
p 372 A87-29249
- Strategic control to improve efficiency of air traffic management
p 501 N87-21894
- Optimal flight trajectories in the presence of windshear, 1984-86
[NASA-CR-180316] p 682 N87-26047

TRAJECTORY ANALYSIS

- An aerodynamic analysis and the subsequent motion of external store
p 66 A87-13501
- Three-dimensional trajectory analyses of two drop sizing instruments - PMS OAP and PMS FSSP --- Optical Array Probe and Forward Scattering Spectrometer Probe
[AIAA PAPER 87-0180] p 265 A87-22466
- IFM applications to theoretical trajectory predictions
[AIAA PAPER 87-0210] p 221 A87-22487
- Epsilon entropy of trajectory information --- for aircraft control
p 355 A87-29163
- Advanced ATC: An aircraft perspective
p 501 N87-21893
- A time-based concept for terminal-area traffic management
p 501 N87-21895
- Next generation of control techniques in advanced TMA
p 502 N87-21898
- Exploiting the capabilities of flight management systems in solving the airport arrival problem
p 502 N87-21899

TRAJECTORY CONTROL

- Safety of flight issues for an automatic trajectory control system
p 186 A87-16761
- Quasi-steady flight to quasi-steady flight transition in a windshear - Trajectory guidance
[AIAA PAPER 87-0271] p 311 A87-24946
- Nonlinear flight test trajectory controllers for aircraft
[AIAA PAPER 85-1890] p 371 A87-28910
- A computational method for free time optimal control problems, with application to maximizing the range of an aircraft-like projectile
p 372 A87-29677
- State constraints for predictive control with air vehicle application
[AD-A176205] p 450 N87-21002
- Safe microburst penetration techniques: A deterministic, nonlinear, optimal control approach
p 504 N87-22620
- Optimal cooperative control synthesis of active displays
[NASA-CR-4058] p 705 N87-25807
- Optimal flight trajectories in the presence of windshear, 1984-86
[NASA-CR-180316] p 682 N87-26047

TRAJECTORY MEASUREMENT

- Investigation of air transportation technology at Massachusetts Institute of Technology, 1984
p 496 N87-22605

TRAJECTORY OPTIMIZATION

- Optimal flight paths through microburst wind profiles
p 35 A87-10519
- Maneuver optimization in the case of combat aircraft
p 35 A87-11369
- Guidance strategies for near-optimum take-off performance in a windshear
p 24 A87-12138
- Computational enhancements to a 4D algorithm --- for aircraft trajectory optimization
p 134 A87-13359
- Impact of mis modeled idle engine performance on calculation and tracking of optimal 4-D descent trajectories
p 88 A87-13360
- Isochrones for minimum time horizontal gliding flight [AIAA PAPER 87-0449]
p 240 A87-22641
- Optimization and acceleration guidance of flight trajectories in a windshear
p 765 A87-47807
- Quasi-steady flight to quasi-steady flight transition in a windshear - Trajectory optimization and guidance
p 765 A87-47884
- Optimization and guidance of abort landing trajectories in a windshear
[AIAA PAPER 87-2341]
p 771 A87-50460
- Singular trajectories in airplane cruise-dash optimization
[AIAA PAPER 87-2404]
p 772 A87-50488
- Guidance on maneuvering flight paths for rotary wing aircraft
[AIAA PAPER 87-2406]
p 772 A87-50489
- On the feasibility of low-speed aircraft maneuvers involving extreme angles of attack
p 835 A87-54140
- Energy management of 3-dimensional minimum-time intercept
p 27 A87-10858
- Singular trajectories in airplane cruise-dash optimization
[NASA-CR-180636]
p 659 A87-26035
- Optimization of aircraft trajectories through severe microbursts
p 753 A87-27604
- Singular trajectories in airplane cruise-dash optimization
p 825 A87-28544

TRANSATMOSPHERIC VEHICLES

- Transition to space - A history of 'space plane' concepts at Langley Aeronautical Laboratory 1952-1957
p 478 A87-33152
- Three dimensional hypersonic flow simulations with the CSCM implicit upwind Navier-Stokes method --- Conservative Supra-Characteristic Method
[AIAA PAPER 87-1114]
p 557 A87-42063
- The thermal environment of transatmospheric vehicles
[AIAA PAPER 87-1514]
p 626 A87-43038
- Aerothermodynamics of transatmospheric vehicles
p 807 A87-52878
- An overview of the British Aerospace HOTOL transatmospheric vehicle
[NASA-TM-88008]
p 175 A87-14317
- NASA authorizations, fiscal year 1987
[GPO-61-975]
p 274 A87-15904

TRANSUCERS

- A miniature remote deadweight calibrator
p 694 A87-45104
- PSI multitransducer in low-velocity wind tunnel in Braunschweig
p 838 A87-53569
- Optical transducer: STOL aircraft
p 254 A87-15936

TRANSFER FUNCTIONS

- The role of modeling and flight testing in rotorcraft parameter identification
[AD-A174776]
p 172 A87-19287
- An experimental determination of the transfer laws for a disturbance across an axial compressor
[ONERA, TP NO. 1986-106]
p 248 A87-21025
- Helicopter model in flight identification by a real time self adaptive digital process
p 680 A87-43458
- An approach to the synthesis of an adaptive flight control system with incomplete information
p 680 A87-45096
- Theoretical and experimental investigations on a six-component rotor balance
p 778 A87-48971
- Simulation investigation of the effects of helicopter hovering dynamics on pilot performance
[AIAA PAPER 87-2533]
p 773 A87-50535
- Loop separation parameter - A new metric for landing flying qualities
[AIAA PAPER 87-2536]
p 774 A87-50537
- Longitudinal handling qualities of the T-2 Control Configured Vehicle
[AIAA PAPER 87-2587]
p 774 A87-50550
- Identification of a dynamic model of a helicopter from flight tests
p 300 A87-16813
- Design and experimental verification of a calculation method for frequency response analysis of digital control systems in a continuous environment --- aircraft control [NLR-TR-85090-U]
p 374 A87-19402
- Application of a sensitivity analysis technique to high-order digital flight control systems
[NASA-CR-179429]
p 837 A87-28565

TRANSFER OF TRAINING

- Simulator design features for helicopter landing on small ships. 1: A performance study
[AD-A169514]
p 119 A87-12572
- Simulator design and instructional features for carrier landing: A field transfer study
[AD-A169962]
p 119 A87-12573

TRANSFORMATIONS (MATHEMATICS)

- Mesh generation by a sequence of transformations --- for three dimensional aircraft shape mapping
p 361 A87-30443

TRANSIENT HEATING

- Effects of temperature transients on the stability of a turbojet engine
p 761 A87-49241

TRANSIENT RESPONSE

- Aircraft lightning-induced transient test and protection comparison
p 82 A87-15022
- Transient operating line indicator and its application
p 321 A87-25417
- The application of transient aerodynamics to the structural nonlinear flutter problem
[AIAA PAPER 87-0908]
p 447 A87-33717
- Thermal effects on transient process of a turbojet engine
p 513 A87-37850
- Transient test system design for the T800-APW-800 turboshaft engine
[AIAA PAPER 87-1791]
p 666 A87-45205
- European Transonic Wind Tunnel (ETW) model technology. Investigations of the transient temperature and stress behavior of ETW models
[MBB-LKE-123/S/PUB-242]
p 316 A87-17721

TRANSIT TIME

- Modelling aircraft wing downwash transit time effects in the direction of flight
[DGLR PAPER 86-165]
p 521 A87-36792

TRANSITION FLOW

- Quasi-steady flight to quasi-steady flight transition in a windshear - Trajectory guidance
[AIAA PAPER 87-0271]
p 311 A87-24946
- The observation of transition in shock wind tunnel
p 343 A87-28341
- Computational fluid dynamics near the continuum limit
[AIAA PAPER 87-1115]
p 558 A87-42064
- Three-dimensional transition studies at ONERA/CERT
[AIAA PAPER 87-1335]
p 566 A87-42395
- Stability of axisymmetric boundary layers on sharp cones at hypersonic Mach numbers
[AIAA PAPER 87-1413]
p 567 A87-42442
- Advances in flow visualization using liquid-crystal coatings
[SAE PAPER 871017]
p 787 A87-48755
- Calculation of the aerodynamic characteristics of bodies of complex shape in transition flow
p 805 A87-51664
- Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development
p 229 A87-15168
- Transition fixing and simulation of high Reynolds number flow at transonic velocities
p 229 A87-15169
- Three-dimensional layers: Laminar-turbulent transition
p 537 A87-22149
- Aerodynamics of 3-dimensional bodies in transitional flow
[NASA-CR-180636]
p 619 A87-26035

TRANSITION POINTS

- Study on the interference between the local separation on a wing surface and outer flow-field
p 634 A87-45094

TRANSMISSION EFFICIENCY

- Transmission efficiency in advanced aerospace powerplant
[AIAA PAPER 87-2043]
p 671 A87-45376

TRANSMISSION FLUIDS

- Engine oils no longer suitable for gearboxes?
p 318 A87-27332

TRANSMISSION LINES

- Time modulation. I - Modulation scheme helps air-traffic safety
p 582 A87-42609

TRANSMISSION LOSS

- An alternative intensity technique for transmission loss measurements of light-weight structures
p 334 A87-27121
- Window acoustic study for advanced turboprop aircraft
[NASA-CR-172391]
p 138 A87-12322

TRANSMISSIONS (MACHINE ELEMENTS)

- Transmission fatigue life estimation for Sea King helicopters operated by the Royal Australian Navy
[AIAA PAPER 86-2692]
p 164 A87-17929
- Parameters of optimal planetary gears of AI type
p 694 A87-43622
- Development of a large, spiral bevel gear rotorcraft transmission
[AIAA PAPER 87-1839]
p 667 A87-45240
- Transmission efficiency in advanced aerospace powerplant
[AIAA PAPER 87-2043]
p 671 A87-45376

- Operational experience with the advanced transmission health monitoring techniques on the Westland 30 helicopter
p 713 A87-48940

- The integration of health monitoring techniques for helicopter gearboxes
p 713 A87-48943

- The 214ST drive system Lead-the-Fleet program --- inspections of component durability in helicopter engines
p 801 A87-53414

- Design and development of a high contact ratio helicopter transmission utilizing self-aligning bearingless planetary (SABP)
p 849 A87-53418

- Advances and applications of Pyrowear 53 in helicopter transmission systems
p 849 A87-53419

- Analysis of the vibration of the input bevel pinion in RAN Wessex helicopter main rotor gearbox WAK143 prior to failure
[ARL-AERO-PROP-R-169]
p 25 A87-10061

- Testing of UH-60A helicopter transmission in NASA Lewis 2240-kW (3000-hp) facility
[NASA-TP-2626]
p 50 A87-10391

- The 3600 hp split-torque helicopter transmission
[NASA-CR-174932]
p 106 A87-11788

- The technology of advanced prop-fan transmissions
[PNR90357]
p 309 A87-16843

- Vibration characteristics of OH-58A helicopter main rotor transmission
[NASA-TP-2705]
p 467 A87-20555

- Experimental and analytical evaluation of dynamic load and vibration of a 2240-kW (300-hp) rotorcraft transmission
[NASA-TM-88975]
p 467 A87-20556

- Helicopter transmission testing at NASA Lewis Research Center
[NASA-TM-89912]
p 542 A87-22978

- Transmissivity
Spectrum-modulating fiber-optic sensors for aircraft control systems
[NASA-TM-88968]
p 309 A87-17700

- Transmittance
Characterization of optical and surface parameters during particle impact damage
p 195 A87-17973

- Transmitter Receivers
Aircraft collision warning system
[AD-D012463]
p 236 A87-15199

- TACAN/INS Performance Evaluation (TIPE) flight test report
[AD-A180138]
p 650 A87-25313

- Transmitters
Emergency locator transmitters - A problem and a challenge
p 578 A87-39428

- ICNIA (Integrated Communications Navigation Identification Avionics) HF transmitter system preliminary study
[AD-A173013]
p 303 A87-16823

- Transoceanic Flight
Voyager crew faces turbulence, fatigue on world flight attempt
p 801 A87-53552

- Around-the-world flight
p 801 A87-53553

- Once around the earth without refueling
p 801 A87-54252

- Transonic Compressors
Natural frequency analysis of compressor inter blades
p 34 A87-10899

- A method for computation of viscid/inviscid interaction on transonic compressor cascades
p 289 A87-27483

- Investigation of the three dimensional flow near the exit of two back swept transonic centrifugal impellers
[ONERA, TP NO. 1987-70]
p 638 A87-46192

- The design of an advanced civil fan rotor
[ASME PAPER 87-GT-218]
p 759 A87-48720

- Supersonic and transonic aerodynamic characteristics of SB301 two-dimensional cascade wind tunnel
p 779 A87-49990

- Modified characteristic method for calculation of supersonic S2 flow field in compressor
p 804 A87-51473

- Transonic and supersonic compressors
p 185 A87-14344

- Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. 1: Measurement and analysis technique
[NASA-TM-88945]
p 290 A87-16789

- Transonic compressor blade tip flow visualization on a water table
[AD-A176592]
p 468 A87-21265

- A quasi three dimensional method for the calculation of transonic flows in turbomachines
p 517 A87-21941

- A numerical study of the 3D flowfield in a transonic compressor rotor with a modelling of the tip clearance flow
p 518 A87-21945

- A shock loss model for supercritical subsonic flows in transonic axial flow compressors
p 518 A87-21950

- Design of an axial flow research compressor operating in the subsonic and transonic ranges
[NAL-TM-PR-8607]
p 518 A87-21952

TRANSONIC FLIGHT

Jet transport flight operations using cockpit display of traffic information during instrument meteorological conditions: Simulation evaluation [NASA-TP-2567] p 819 N87-29469

TRANSPORT PROPERTIES

High temperature transport properties of air [AIAA PAPER 87-1632] p 707 A87-43129

TRANSVERSE ACCELERATION

Computation of tip and corner region flows p 537 N87-22153

TRANSVERSE OSCILLATION

Influence of large deflection and transverse shear on random response of rectangular symmetric composite laminates to acoustic loads [NASA-CR-178313] p 798 N87-27489

TRAVELING WAVE TUBES

Dual-mode coupled cavity TWT p 610 A87-41322

TREES (MATHEMATICS)

Identification of 3D objects from multiple silhouettes using quadrees/octrees p 394 A87-27699

Analysis of typical fault-tolerant architectures using HARP p 704 A87-45771

TREES (PLANTS)

Tree attenuation at 869 MHz derived from remotely piloted aircraft measurements p 381 A87-28414

TRIANGULATION

Three dimensional mesh generation by triangulation of arbitrary point sets [AIAA PAPER 87-1124] p 617 A87-42073

TRISONIC WIND TUNNELS

The 0.6 m x 0.6 m trisonic section (TMK) of DFVLR in Cologne-Portz, West Germany [DFVLR-MITT-86-21] p 687 N87-26053

TROPOSPHERE

The development of an air motion measurement system for NASA's Electra aircraft p 589 A87-42183

In situ ozone instrumentation for 10-Hz measurements - Development and evaluation p 611 A87-42185

TRUNCATION ERRORS

A truncation error injection approach to viscous-inviscid interaction [AIAA PAPER 87-540] p 284 A87-24981

Computation of unsteady transonic aerodynamics with truncation error injection p 627 A87-43392

TRUSSES

A hybrid nonlinear programming method for design optimization p 545 A87-35718

Extension and application of a procedure for damage assessment of aerospace structures [AD-A174035] p 396 N87-19004

TU-154 AIRCRAFT

The optimization of longitudinal aircraft motion control during take-off p 373 A87-30407

TUNGSTEN

Fiber reinforced superalloys [NASA-TM-89865] p 530 N87-22811

TUNING

Application of multiple objective optimization techniques to finite element model tuning p 266 A87-22819

The effect of circumferential aerodynamic detuning on coupled bending-torsion unstalled supersonic flutter [ASME PAPER 86-GT-100] p 304 A87-25396

Analytical and experimental investigation of mistuning in propfan flutter [AIAA PAPER 87-0739] p 609 A87-40496

Optimization of cascade blade mistuning under flutter and forced response constraints p 106 N87-11732

Analytical and experimental investigation of mistuning in propfan flutter [NASA-TM-88959] p 327 N87-18116

Application of a system modification technique to dynamic tuning of a spinning rotor blade p 390 N87-18871

TURBINE BLADES

Experimental investigation on the performances of a transonic turbine blade cascade for varying incidence angles p 9 A87-12205

An experimental study on large negative incidence separated flow in two-dimensional turbine cascades p 10 A87-12957

Automated infrared inspection of jet engine turbine blades p 125 A87-13719

Monitoring the state of the blades of gas turbine engines by the acoustic emission method p 262 A87-20346

Modeling gas turbine deterioration due to high levels of dust ingestion [AIAA PAPER 87-0144] p 249 A87-22440

Analysis of flowfield on leading edge of transonic blade profile p 279 A87-23757

NDT of jet engines - An industry survey. I p 321 A87-25823

A numerical study of incompressible Navier-Stokes flow through rectilinear and radial cascade of turbine blades p 288 A87-26079

High-temperature behavior of different coatings in high-performance gas turbines and in laboratory tests p 317 A87-26105

Optimization of a method for determining the fatigue limit of the blades of gas turbine engines p 305 A87-26304

The effect of temperature, protective coatings, and service history on the fatigue strength of gas-turbine engine blades made from the high-temperature cast alloy EP539LM p 305 A87-26307

Production laser hardfacing of jet engine turbine blades p 323 A87-26678

Unsteady aerodynamic characteristics of annular cascade oscillating in transonic flow. I - Measurement of aerodynamic damping with freon gas controlled-oscillated annular cascade test facility p 288 A87-27168

Application of Reissner method to free vibrations of a tapered, twisted, aerofoil cross-section turbine blade, mounted at a stagger angle on a rotating disc p 366 A87-27811

Thermal and thermally stressed state of trigonal prisms modeling the operation of the edges of gas turbine blades p 382 A87-29204

Vibratory strain distributions in an integral-machined air turbine starter wheel [SAE PAPER 861737] p 368 A87-29583

The development of single crystal superalloy turbine blades p 456 A87-33265

Optimization and analysis of gas turbine engine blades [AIAA PAPER 87-0827] p 475 A87-33614

The effectiveness of heat-protection coatings on the blades of gas turbine engines p 465 A87-34272

Analysis of computation methods in S2 stream surfaces for quasi-three-dimensional design of turbine p 486 A87-36920

Experimental investigation on cooling effectiveness of high-temperature air-cooled turbine blade p 513 A87-37845

Experimental investigation on cooling effectiveness of a turbine blade under various design conditions p 513 A87-37846

Heat transfer through multi-turns of cooling passages in a turbine blade p 533 A87-37848

A calculation method of determining blade section drag in a rotor based on wake measurements p 488 A87-37849

Numerical simulation of three-dimensional flow fields in turbomachinery blade rows using the compressible Navier-Stokes equations [AIAA PAPER 87-1314] p 565 A87-42380

Electrochemical machining processes in aircraft engine building --- Russian book p 693 A87-42905

The low-aspect-ratio parameter of blades p 663 A87-43607

Optimization of the duration of ultrasonically activated impact surface treatment of gas-turbine-engine blades p 663 A87-43609

A study of the thermal-stress state of gas turbine engine blades with protective coatings p 664 A87-43640

Development of low-cost test techniques for advancing film cooling technology [AIAA PAPER 87-1913] p 696 A87-45293

Experimental data correlations for the effects of rotation on impingement cooling of turbine blades [AIAA PAPER 87-2008] p 696 A87-45349

Friction factors and heat transfer coefficients in turbulent cooling passages of different aspect ratios. I - Experimental results [AIAA PAPER 87-2009] p 696 A87-45350

Application of a 3D inviscid rotational design procedure for turbomachinery bladings p 638 A87-46204

Numerical simulation of transonic three-dimensional flows in turbine blade passages p 638 A87-46206

Supersonic through-flow fan design [AIAA PAPER 87-1746] p 759 A87-48571

Structural damage and rejuvenation of used turbine blades p 761 A87-49530

Experimental investigation on flow performance of tandem blade cascades with double circular arc profiles p 730 A87-49989

Calculation of noise caused by interaction of supersonic cascade and varied oncoming gust p 859 A87-51812

 Three-dimensional hypersonic flow of a dusty gas past a wing p 485 A87-36088
 Diagnostic methods for air-breathing engines p 686 A87-46243
 Numerical modeling of supersonic multiphase flows p 804 A87-51659
 Analysis of pressure oscillations in ramjets. Review of research: 1985-1986 p 604 N87-23796
 Effects on fuel spray characteristics and vaporization on energy release rates and flow field structure in a dump combustor p 612 N87-23804

U

U.S.S.R.

Aircraft research and development trends in the US and USSR p 142 A87-17944
 [AIAA PAPER 86-2720]
 Sukhoi filter p 237 A87-20525
 Automation - A necessity for higher ATC efficiency p 577 A87-39261

U-2 AIRCRAFT

High altitude flutter investigation and exploration of the flutter boundary of the TR-1 and specially configured U-2R p 743 A87-47842

UH-1 HELICOPTER

Flight control system for the UH-1D helicopter p 373 A87-30415
 The effect of rotor wake geometry variation on hover induced power estimation for a UH-1H Iroquois helicopter p 732 N87-26867
 [AD-A180787]

UH-60A HELICOPTER

Handling qualities evaluation of the ADOCS primary flight control system p 191 A87-19257
 UH-60 Black Hawk engineering simulation model validation and proposed modifications p 312 N87-17710
 [NASA-CR-177360]
 Validation of a real-time engineering simulation of the UH-60A helicopter p 313 N87-17716
 [NASA-TM-88360]
 A rotorcraft flight/propulsion control integration study p 587 N87-24457
 [NASA-CR-179574]

Level flight performance evaluation of the UH-60A helicopter with the production external stores support system and ferry tanks installed p 753 N87-27658
 [AD-A181947]
 Flight evaluation of the UH-60A helicopter with the pitch bias actuator centered and electrically disconnected p 827 N87-29495
 [AD-A183954]

ULTRAHIGH FREQUENCIES

Tree attenuation at 869 MHz derived from remotely piloted aircraft measurements p 381 A87-28414
 A conformal aircraft phased array antenna for airplane-satellite communication in the L band p 701 N87-26259
 [DFVLR-FB-86-47]

ULTRALIGHT AIRCRAFT

Static test of an ultralight airplane p 64 A87-14034
 [AIAA PAPER 86-2600]
 Construction and test of a composite microlight wing structure p 365 N87-19392
 [BU-341]
 Materials selection and design study of a composite microlight wing structure p 432 N87-20263
 [BU-335]

ULTRASONIC FLAW DETECTION

Computerized ultrasonic test inspection enhancement system for aircraft components p 44 A87-10721
 Manufacturing technology for nondestructive evaluation (NDE) system to implement retirement for cause (RFC) procedures for gas turbine engine components p 44 A87-10727
 Evaluation of captured water column technology for advanced ultrasonic sizing techniques p 45 A87-10728

RFC automated inspection overview --- eddy current and ultrasonic testing of gas turbine engine parts p 45 A87-10730

Variations in ultrasonic backscatter attributed to porosity p 45 A87-10768
 How to maintain a consistent quality in your bonding process? p 48 A87-12656
 Use of ultrasonic models in the design and validation of new NDE techniques p 262 A87-20165
 Practical application to composite materials of a portable digital ultrasound device controlled by a microprocessor p 849 A87-53585

Fault detection sensitivity in thick light alloy specimens, test report p 202 N87-14721
 [REPT-47-084/F]

ULTRASONIC SCANNERS

A computer-aided nondestructive inspection system p 44 A87-10720
 Detection and measurement of ice accretion on a profile by an ultrasonic method p 234 A87-22465
 [AIAA PAPER 87-0179]

ULTRASONIC SOLDERING

Ionic cleaning after wave solder and before conformal coat p 534 A87-38591

ULTRASONIC TESTS

NDT methods for bonded assemblies p 461 A87-32202
 Ultrasonic characteristics of graphite/epoxy composite material subjected to fatigue and impacts p 780 A87-47821
 Evaluation of a pilot's line-of-sight using ultrasonic measurements p 756 A87-48922
 Experimental methodologies to support aircraft icing analysis p 740 N87-27598

ULTRASONIC WAVE TRANSDUCERS

An ultrasonic sensor for the detection and measurement of the thickness of ice on an airfoil p 246 A87-21074
 [ONERA, TP NO. 1986-175]
 In-flight measurement of ice growth on an airfoil using an array of ultrasonic transducers p 234 A87-22464
 [AIAA PAPER 87-0178]

ULTRASONICS

Optimization of the duration of ultrasonically activated impact surface treatment of gas-turbine-engine blades p 663 A87-43609

UNDERCARRIAGES

Aircraft Dynamic Response to Damaged and Repaired Runways p 584 N87-23609
 [AGARD-R-739]

UNDERWATER ACOUSTICS

Aero- and hydro-acoustics; Proceedings of the Symposium, Ecole Centrale de Lyon, Ecully, France, July 3-6, 1985 p 137 A87-13585

UNDERWATER TESTS

Emergency exits for underwater escape from rotorcraft p 156 N87-14304
 [AEG-REPT-528]

UNIFORM FLOW

Numerical simulation of compressible homogeneous flows in the turbulent regime p 809 A87-54363
 Numerical and experimental study of dynamics of two-dimensional body p 59 N87-10748
 [ISAS-619]

Flight-vehicle structures education in the US: Assessment and recommendations
[NASA-CR-4048] p 336 N87-17526
- UNMANNED SPACECRAFT**
The Mars airplane p 303 N87-17753
- UNSTEADY FLOW**
Unsteady transients of a wing with tip store
p 4 A87-10524
Calculation of unsteady supersonic flow past a plane blade row under the effect of vortex inhomogeneities in the oncoming flow
p 5 A87-10618
Implicit and semi-implicit methods for the compressible Navier-Stokes equations
p 47 A87-11503
Computations of separated subsonic and transonic flow about airfoils in unsteady motion
p 8 A87-11786
Unsteady drag over cylinders and aerofoils in transonic shock tube flows
p 10 A87-12617
Visualization of wing tip vortices in accelerating and steady flow
p 72 A87-14370
Advances in the understanding and computation of unsteady transonic flow
p 73 A87-15452
Unsteady transonic aerodynamics and aeroelasticity
p 73 A87-15453
Special opportunities in helicopter aerodynamics
p 74 A87-15469
Unsteady loading on airfoil due to vortices released intermittently from its surface
p 146 A87-17811
An actuator disc analysis of unsteady subsonic cascade flow
p 147 A87-18539
Second-order thickness terms in unsteady wing theory
p 148 A87-18944
A generalised model for airfoil unsteady aerodynamic behaviour and dynamic stall using the indicial method
p 149 A87-19224
Arbitrary motion unsteady aerodynamics and its application to rotary-wing aeroelasticity
p 149 A87-19259
A review of current finite difference rotor flow methods
p 149 A87-19275
A numerical method for subsonic unsteady lifting surfaces-(BIS). II - Numerical results
p 213 A87-20697

- Unsteady three-dimensional stall on a rectangular wing
[ONERA, TP NO. 1986-119] p 213 A87-21038
Influence of the static deformation on a wing in the unsteady aerodynamic
[ONERA, TP NO. 1986-152] p 214 A87-21054
Visualization of three-dimensional forced unsteady separated flow
p 215 A87-21530
Calculation of unsteady wake/rotor interaction
[AIAA PAPER 87-0006] p 216 A87-22354
Computational methods for unsteady transonic flows
[AIAA PAPER 87-0107] p 218 A87-22418
Solution of unsteady rotational flow over supercritical wings
[AIAA PAPER 87-0108] p 218 A87-22419
An efficient algorithm for solution of the unsteady transonic small-disturbance equation
[AIAA PAPER 87-0109] p 218 A87-22420
A computational analysis of flow separation over five different airfoil geometries at high angles-of-attack
[AIAA PAPER 87-0188] p 220 A87-22472
Prediction of added noise due to the effect of unsteady flow on pusher propellers
[AIAA PAPER 87-0255] p 250 A87-22514
Unsteady subsonic and supersonic flows - Historical review; state of the art
p 276 A87-23630
Comparison of analysis methods used in lifting surface theory
p 276 A87-23632
Unsteady transonic flows - Introduction, current trends, applications
p 277 A87-23639
Finite difference methods for the solution of unsteady potential flows
p 277 A87-23640
Steady and unsteady incompressible free-wake analysis
p 277 A87-23642
New approach to finite-state modeling of unsteady aerodynamics
p 278 A87-23651
Unsteady full potential computations for complex configurations
[AIAA PAPER 87-0110] p 281 A87-24920
Three-dimensional flow produced by a pitching-plunging model dragonfly wing
[AIAA PAPER 87-0121] p 275 A87-24922
Visualization of unsteady separated flow about a pitching delta wing
[AIAA PAPER 87-0240] p 320 A87-24943
Unsteady separated flows - Novel experimental approach
[AIAA PAPER 87-0459] p 283 A87-24966
Visualization and registration of unsteady phenomena in transonic flows
p 286 A87-25293
Unsteady transonic flow calculations for wing/fuselage configurations
p 287 A87-25720
Internal acoustics in turbomachinery
p 333 A87-25844
Euler solutions for transonic flow past a fighter wing
p 342 A87-28068
Aircraft turbofan noise
p 398 A87-31144
Upwind Navier-Stokes solutions for separated periodic flows
p 347 A87-31182
Experimental investigation of unsteady fan flow interaction with downstream struts
p 387 A87-31204
Unsteady transonic flow calculations for realistic aircraft configurations
[AIAA PAPER 87-0850] p 411 A87-33690
Calculation of steady and unsteady pressures on wings at supersonic speeds with a transonic small disturbance code
[AIAA PAPER 87-0851] p 411 A87-33691
Unsteady transonic aerodynamics of oscillating airfoils in supersonic freestream
[AIAA PAPER 87-0852] p 412 A87-33692
Nonlinear programming extensions to rational function approximations of unsteady aerodynamics
[AIAA PAPER 87-0854] p 412 A87-33694
Multi-control system in unsteady aerodynamics using spoilers
[AIAA PAPER 87-0855] p 446 A87-33695
The solution of unstationary viscous flow in turbomachine by orthogonal finite element methods
p 412 A87-34048
Numerical simulations of unsteady airfoil-vortex interactions
p 413 A87-34851
Aerodynamic coefficients of a thin wing with elliptic planform in unsteady motion
p 413 A87-35016
Quantitative visualization of steady and unsteady flows using spark velocimetry
p 531 A87-35300
Unsteady axisymmetric turbulent boundary layer on a slender body of revolution
p 485 A87-36562
Rotating stall and surge as a coupled instability in axial compressors - The computation of unsteady flow processes in axial-compressor devices
p 485 A87-36634

- Selective elimination - A fast solver for real-time unsteady integration of the Euler equations in explicit formulation
[DGLR PAPER 86-163] p 486 A87-36791
Lifting surface calculations in the Laplace domain with application to root loci
p 487 A87-37108
Rapid computation of unsteady transonic cascade flows
p 487 A87-37118
Unsteady aerodynamics in rotary-wing aeroelasticity - A review
p 487 A87-37204
Validation of aerodynamic models for predicting the aeroelastic behavior of aircraft with exterior stores
[AAAF PAPER NT 86-21] p 489 A87-38044
Aerodynamic coefficients of a thin elliptic wing in unsteady motion
p 552 A87-39526
Aspects of unsteady transonic flow
p 554 A87-40083
Bifurcations in unsteady aerodynamics
p 554 A87-40085
Improvements on a Green's function method for the solution of linearized unsteady potential flows
p 556 A87-41627
Extension and applications of flux-vector splitting to unsteady calculations on dynamic meshes
[AIAA PAPER 87-1152] p 559 A87-42098
Calculations of unsteady Navier-Stokes equations around an oscillating 3-D wing using moving grid system
[AIAA PAPER 87-1158] p 559 A87-42104
Three-dimensional unsteady Euler solutions for propfans and counter-rotating propfans in transonic flow
[AIAA PAPER 87-1197] p 562 A87-42314
Unsteady full potential aeroelastic computations for flexible configurations
[AIAA PAPER 87-1238] p 563 A87-42335
Unsteady transonic flow simulation on a full-span-wing-body configuration
[AIAA PAPER 87-1240] p 563 A87-42337
Unsteady transonic flow with shocks around oscillating airfoils and cascades - A variational theory
[AIAA PAPER 87-1426] p 568 A87-42449
Computation of steady and unsteady vortex dominated flows
[AIAA PAPER 87-1462] p 569 A87-42473
Computation of unsteady transonic aerodynamics with truncation error injection
p 627 A87-43392
Unsteady separation characteristics of airfoils operating under dynamic stall conditions
p 628 A87-43421
An advanced mathematical model for helicopter flight simulation using nonlinear unsteady aerodynamics
p 679 A87-43435
Numerical study of the gasdynamic process in a pulsejet engine
p 663 A87-43614
Visualization of three-dimensional structures about a pitching forward swept wing
[AIAA PAPER 87-1322] p 631 A87-44929
Forced unsteady vortex flows driven by pitching airfoils
[AIAA PAPER 87-1331] p 631 A87-44931
Comparisons of unsteady flow fields about straight and swept wings using flow visualization and hotwire anemometry
[AIAA PAPER 87-1394] p 631 A87-44932
Unsteady three-dimensional Navier-Stokes simulations of turbine rotor-stator interaction
[AIAA PAPER 87-2058] p 636 A87-45386
The influence of flow non-uniformities in air-breathing hypersonic propulsion systems
[AIAA PAPER 87-2079] p 636 A87-45394
Unsteady viscous flows round moving circular cylinders and airfoils. II
p 637 A87-45792
J85 surge transient simulation
p 675 A87-46240
Aeroelastic control of stability and forced response of supersonic rotors by aerodynamic detuning
p 676 A87-46249
Theory of small disturbances for flat, near-sonic flow through a vibrating cascade
p 717 A87-47658
Numerical solution of three-dimensional transonic flows past an oscillating thin body
p 717 A87-47660
On vectorization of a 2D Navier-Stokes Solver
p 718 A87-47859
Numerical simulation of confined unsteady aerodynamical flows
p 719 A87-48339
Finite state modelling of unsteady aerodynamics and its application to a rotor dynamic problem
p 721 A87-48955
Buffeting prediction for transport aircraft applications based on unsteady pressure measurements
[AIAA PAPER 87-2356] p 724 A87-49073
Calculation of unsteady transonic flow with large longitudinal disturbance about airfoils
[AIAA PAPER 87-2357] p 724 A87-49074
Application of a panel code to unsteady wing-propeller interference
p 731 A87-50347
The measurement of oscillatory pressures with discrete and sweep excitation
p 837 A87-51213

Self-excited oscillations in jet engine test cells p 859 A87-51215

Near wake of an unsteady symmetric airfoil p 803 A87-51221

Dynamic stall around an airfoil at high Reynolds numbers - A comparison between numerical results and experimental visualization p 804 A87-51454

The application of the method of streams to the numerical modeling of unsteady aerohydrodynamics problems p 804 A87-51654

The unsteady flow Euler amplitude equation in vibrating cascades and its numerical method p 830 A87-51810

Parametric exploration of unsteady wing tip vortices p 807 A87-52355

Investigation of unsteady subsonic spoiler and flap aerodynamics p 808 A87-52883

Unsteady transonic flows past airfoils using the Euler equations p 808 A87-52890

Unsteady test method applied to wind tunnel studies of flutter p 838 A87-54189

Analysis of two-dimensional incompressible flow past airfoils using unsteady Navier-Stokes equations [NASA-CR-179823] p 12 N87-10040

Unsteady flow over an airfoil inside a wind tunnel with and without transpiration p 13 N87-10051

Application of a potential code to general steady flows in three dimensions p 50 N87-10262

Efficiency of various control surfaces in steady and unsteady flow [SNIAS-861-111-101] p 37 N87-10872

Three-dimensional unsteady Euler equations solutions on dynamic grids p 51 N87-11128

Computational fluid dynamic studies of certain ducted bluff-body flowfields relevant to turbojet combustors. Volume 1: Time-dependent calculations with the k-epsilon turbulence model for an existing centerbody combustor [AD-A171434] p 131 N87-12816

Unsteady transonic flow computations for AGARD two-dimensional and three-dimensional aeroelastic configurations [ONERA-NT-1985-5] p 152 N87-13418

Computational study of flow around an airfoil at high angles of attack by a block pentadiagonal matrix method p 152 N87-14268

Unsteady aerodynamic load estimates on turning vanes in the national full-scale aerodynamic complex [NASA-TM-88191] p 230 N87-15179

Unsteady aerodynamic and heat transfer processes in a transonic turbine stage p 251 N87-15220

Unsteady 3-dimensional Euler equations solutions on dynamic blocked grids [AD-A173977] p 232 N87-15942

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. 1: Measurement and analysis technique [NASA-TM-88945] p 290 N87-16789

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. Part 2: Results and discussion [NASA-TM-88946] p 290 N87-16790

Unsteady flows in a single-stage transonic axial-flow fan stator row [NASA-TM-88929] p 292 N87-16805

Unsteady aerodynamics of a rotating compressor blade row in incompressible flow. Volume 1: Experimental facilities, procedures and sample data [AD-A173043] p 307 N87-16831

Unsteady aerodynamics of a rotating compressor blade row at low Mach number. Volume 2: Analysis of experimental results and comparison with theory [AD-A173044] p 307 N87-16832

Highlights of unsteady pressure tests on a 14 percent supercritical airfoil at high Reynolds number, transonic condition [NASA-TM-89080] p 293 N87-17667

A study of a circulation control airfoil with leading/trailing edge blowing [AIAA PAPER 87-0157] p 345 A87-31104

Numerical solution of the downwash associated with a blown-flap system p 347 A87-31290

Euler solutions for aircraft configurations employing upper-surface blowing p 348 A87-31293

Large-scale static investigation of circulation-control-wing concepts applied to upper surface-blowing aircraft [NASA-TP-2684] p 243 N87-15959

UPSTREAM

High resolution upwind schemes for the three-dimensional incompressible Navier-Stokes equations [AIAA PAPER 87-0547] p 569 A87-42650

UPWASH

Turbulence measurements in a radial upwash [AIAA PAPER 87-1435] p 568 A87-42455

High-angle-of-attack pneumatic lag and upwash corrections for a hemispherical flow direction sensor [NASA-TM-86790] p 590 N87-23616

Unsteady three-dimensional simulation of VTOL upwash fountain turbulence p 572 N87-24414

An investigation of turbulence mechanisms in V/STOL upwash flow fields [AD-A181265] p 732 N87-26871

USER MANUALS (COMPUTER PROGRAMS)

Viscous wing theory development. Volume 2: GRUMWING computer program user's manual [NASA-CR-178157] p 13 N87-10044

Assessment of damage tolerance requirements and analyses: A user's manual for crack growth and crack initiation analysis: DAMGRO [AD-A171209] p 132 N87-12939

SIMPPOP: A system for simple aerodynamic analysis of propellers in axial flow. Description of method and user's guide [NLR-TR-84128-U] p 154 N87-14288

Propeller aircraft interior noise model: User's manual for computer program [NASA-CR-172425] p 336 N87-18402

User guide for the digital control system of the NASA/Langley Research Center's 13-inch Magnetic Suspension and Balance System [NASA-CR-178210] p 376 N87-18574

Development of a rotor wake/vortex model. Volume 2: User's manual for computer program [NASA-CR-174850-VOL-2] p 417 N87-20239

User's manual for ADAM (Advanced Dynamic Airfoil Model) [DE87-012342] p 813 N87-28524

USER REQUIREMENTS

Aerospatiale design bureaus. II - Helicopters for the year 2000 p 166 A87-18450

Feedback from the front - User contributions to B-52 Avionics ATE p 546 A87-38657

Civil access to the precise positioning service of the Navstar Global Positioning System p 582 A87-41403

Satisfying the flight test data requirements of flight training simulators p 779 A87-49201

Application of artificial intelligence (AI) to aerospace manufacturing - A user perspective p 857 A87-53075

Engine-airframe integration for rotorcraft: Component specifications and qualification p 26 N87-10071

Helicopter air intake protection systems p 27 N87-10073

Engine-airframe integration for rotorcraft: System specifications and qualification p 27 N87-10074

A-310 Aircraft Integrated Data SystemS (AIDS) design philosophy p 30 N87-10076

The United States mobile satellite service p 267 N87-15381

Impact of IPS and IRS configuration on engine installation design --- helicopter engines [PNR90324] p 308 N87-16834

Navigation systems for the new generation of combat and transport helicopters and associated flight tests p 823 N87-29481

UTILITY AIRCRAFT

Impetus of new technologies for utility, executive, and commuter aircraft p 104 A87-14000

Selected problems in the decision making process for future small transport/utility aircraft [SAE PAPER 871045] p 712 A87-48771

UTILIZATION

Use of artificial intelligence methods [MBB-LKE-434-S/PUB/284] p 707 N87-26831

V**V/STOL AIRCRAFT**

Turbine bypass remote augmentor lift system for V/STOL aircraft p 105 A87-14364

The induced aerodynamics of jet and fan powered V/STOL aircraft p 73 A87-15459

Recent advances in prediction methods for jet-induced effects on V/STOL aircraft p 73 A87-15462

A wind-tunnel method for V/STOL testing p 118 A87-15463

Configuration development of a tandem fan V/STOL assault transport [AIAA PAPER 86-2642] p 163 A87-17898

Control and display requirements for decelerating approach and landing of fixed- and rotary-wing VSTOL aircraft p 193 A87-19279

Supersonic STOVL fighter concepts featuring the hybrid tandem-fan propulsion system p 172 A87-19281

Three-dimensional nearfield characterization of a VSTOL jet in turbulent crossflow [AIAA PAPER 87-0051] p 217 A87-22382

Full-scale ground effects of twin impinging jets beneath a subsonic tactical V/STOL aircraft [AIAA PAPER 86-2704] p 343 A87-28625

Military developments in aeronautics - The next thirty years p 339 A87-29276

V/STOL/STOVL: Proceedings of the Aerospace Technology Conference and Exposition, Long Beach, CA, Oct. 13-16, 1986 p 359 A87-29634

WING TANKS

Aircraft accident report: NASA 712, Convair 990, N712NA, March Air Force Base, California, July 17, 1985, executive summary
[NASA-TM-87356-VOL-1] p 495 N87-21878

WING TIP VORTICES

Visualization of wing tip vortices in accelerating and steady flow p 72 A87-14370
Wide-field shadowgraphy of tip vortices from a helicopter rotor p 341 A87-27937
Concepts for reduction of blade/vortex interaction noise p 428 A87-33245
A finite volume Euler calculation of the aerodynamics of transonic airfoil-vortex interaction
[AIAA PAPER 87-1244] p 563 A87-42338
The influence of winglets on rotor aerodynamics p 628 A87-43422
Description of, and preliminary results from, a new blade-vortex interaction test facility p 683 A87-43460
Analysis of induced velocities in the wake of a hovering helicopter rotor p 723 A87-49062
Measurement and prediction of free flight wing-induced vortex velocity fields p 729 A87-49606
[AIAA PAPER 87-2497] p 729 A87-49606
Parametric exploration of unsteady wing tip vortices p 807 A87-52355
Visualization of three-dimensional forced unsteady separated flow p 51 N87-11129
[AD-A168939] p 51 N87-11129
Tip vortices of wings in subsonic and transonic flow: A numerical simulation p 75 N87-11699
[NASA-TM-88334] p 75 N87-11699
Numerical simulation of tip vortices of wings in subsonic and transonic flows p 77 N87-12544
[AD-A169116] p 77 N87-12544
Preliminary study of a wing-tip vortex using laser velocimetry p 231 N87-15185
[NASA-TM-88343] p 231 N87-15185
The prediction of transonic loading on advancing helicopter rotors p 414 N87-20206
Investigation of non-symmetric jets in cross flow (discrete wing tip jet effects) p 574 N87-24431
[AD-A179783] p 574 N87-24431
On the nonlinear aerodynamic and stability characteristics of a generic chine-forebody slender-wing fighter configuration p 643 N87-25305
[NASA-TM-89447] p 643 N87-25305
Evaluation of installed performance of a wing-tip-mounted pusher turboprop on a semispan wing [NASA-TP-2739] p 659 N87-26041
An experimental investigation of wing-tip turbulence and sound radiated from the tip region of a blunt-tipped airfoil p 818 N87-29466

WING TIPS

Unsteady transonics of a wing with tip store p 4 A87-10524
An experimental study of the aerodynamic characteristics of planar and non-planar outboard wing planforms p 284 A87-24989
[AIAA PAPER 87-0588] p 284 A87-24989
Induced-drag characteristics of crescent-moon-shaped wings p 410 A87-33244
Measurements of the performance of a helicopter swept tip rotor in flight p 652 A87-43423
VSAERO analysis of structurally decoupled tip planforms for a semispan wing p 724 A87-49086
[AIAA PAPER 87-2416] p 724 A87-49086
Optimization of wing tip store modeling p 730 A87-50338
Supersonic flow around tip sides of wings p 12 N87-10033
A review of the performance of swept tip helicopter main rotor blades and an analysis of aeroacoustical effects [ETN-87-98936] p 302 N87-17696
The aerodynamic optimization of wings at subsonic speeds and the influence of wingtip design [NASA-TM-88534] p 493 N87-22627
Vector electric fields measured in a lightning environment [AD-A180012] p 577 N87-24442
An investigation of tip planform influence on the aerodynamic load characteristics of semispan, upswept wing and wing-tip [NASA-CR-177428] p 731 N87-26865
An experimental investigation of wing-tip turbulence and sound radiated from the tip region of a blunt-tipped airfoil p 818 N87-29466
The results of a wind tunnel investigation of a model rotor with a free tip [NASA-TM-86758] p 827 N87-29496

WING-FUSELAGE STORES

Predicting the effects of aircraft geometry on the carriage and release of external stores p 240 A87-22524
[AIAA PAPER 87-0270] p 240 A87-22524

3 D wing analysis using a low order panel method p 488 A87-37213

Design and fabrication of the NASA decoupler pylon for the F-16 aircraft [NASA-CR-172354] p 25 N87-10065
Design and fabrication of the NASA decoupler pylon for the F-16 aircraft, addendum 1 [NASA-CR-172355] p 27 N87-10860
Prediction of wing-body-store aerodynamics using a small perturbation method and a grid embedding technique p 414 N87-20207

WINGLETS

The influence of winglets on rotor aerodynamics p 628 A87-43422
Winglets on low aspect ratio wings [AIAA PAPER 87-2482] p 726 A87-49097
Aerodynamic characteristics of biplanes with winglets p 730 A87-50339
The effect of a winglet on the spatial vortex of a slender body at high angle of attack [AD-A169925] p 65 N87-12533
Effects of winglet on transonic flutter characteristics of a cantilevered twin-engine-transport wing model [NASA-TP-2627] p 201 N87-13789
DC-10 winglet flight evaluation [NASA-CR-3748] p 302 N87-17694

WINGS

Euler solutions on O-O grids around wings using local refinement p 6 A87-11512
The prediction of the drag of aerofoils and wings at high subsonic speeds p 9 A87-12266
Induced drag of a curved wing p 10 A87-12805
Aerodynamic coefficients of a circular wing in steady subsonic flow p 67 A87-13653
Development of a GFRP wing in accordance with FAR Part 23 p 92 A87-13993
Development and testing of critical components for the technological preparation of a CFK outer wing [MBB-UT-224-86] p 92 A87-13997
Optimum structural sizing of conventional cantilever and joined wing configurations using equivalent beam models p 197 A87-17903
[AIAA PAPER 86-2653] p 197 A87-17903
In-flight photogrammetric measurement of wing ice accretions p 155 A87-17995
[AIAA PAPER 86-0483] p 155 A87-17995
Results of the V-22 preliminary design wing test program p 168 A87-19228
The influence of the choice of computational parameters on the results of three-dimensional potential methods --- transonic flow [ONERA, TP NO. 1986-169] p 214 A87-21069
A numerical study of the Weis-Fogh mechanism --- for solution of wing aerodynamics p 221 A87-22503
[AIAA PAPER 87-0238] p 221 A87-22503
Rain effects at low Reynolds number p 221 A87-22517
[AIAA PAPER 87-0258] p 221 A87-22517
Spanwise-periodic 3-D disturbances in the wake of a slightly stalled wing p 226 A87-22648
[AIAA PAPER 87-0456] p 226 A87-22648
Influence of the regular water wave upon the aerodynamic characteristics of a wing during the low altitude flying p 280 A87-24713
Transonic wing optimization using evolution theory [AIAA PAPER 87-0520] p 284 A87-24977
Transonic potential flow computations around finite wings p 288 A87-27475
A study of wing-fuselage interaction p 345 A87-30467
Geometrically nonlinear theory for thin-walled rods p 460 A87-31730
Computations with 3-D Euler code for wings p 487 A87-37205
A new concept of surface-airplane (Power-Augmented Ram Wing) p 582 A87-39265
Experimental flowfield visualization of a high alpha wing at Mach 1.62 p 608 A87-39895
Study on the interference between the local separation on a wing surface and outer flow-field p 634 A87-45094
Optimization of airplane wing structures under taxiing loads p 785 A87-47192
Flight test investigations of a wing designed for natural laminar flow p 720 A87-48770
[SAE PAPER 871044] p 720 A87-48770
EA-6B high-lift wing modifications p 748 A87-49077
[AIAA PAPER 87-2360] p 748 A87-49077
DFVLR-F5 test wing experiment for computational aerodynamics p 727 A87-49099
[AIAA PAPER 87-2485] p 727 A87-49099
Inviscid transonic wing design using inverse methods in curvilinear coordinates p 727 A87-49103
[AIAA PAPER 87-2551] p 727 A87-49103
A hybrid algorithm for transonic airfoil and wing design [AIAA PAPER 87-2552] p 727 A87-49104

Comparisons among measured and computed boundary-layer properties on a transport wing [AIAA PAPER 87-2555] p 727 A87-49106
An experimental investigation of the insect shielding effectiveness of a Krueger flap/wing airfoil configuration [AIAA PAPER 87-2615] p 749 A87-49113
Exploratory studies of actuated forebody strakes for yaw control at high angles of attack p 768 A87-49607
[AIAA PAPER 87-2557] p 768 A87-49607
Profiling of a lifting convex wing by a hodograph method p 805 A87-51672
Age forming aluminum in an autoclave p 848 A87-52678
Rain effects at low Reynolds number p 808 A87-52884
Acta Aeronautica et Astronautica Sinica (selected articles) p 3 N87-10004
[AD-A167918] p 3 N87-10004
A study of the flow field about an upper surface blown wing and its effects on longitudinal static stability of a small jet airplane p 11 N87-10009
Viscous wing theory development. Volume 1: Analysis, method and results [NASA-CR-178156] p 12 N87-10043
Viscous wing theory development. Volume 2: GRUMWING computer program user's manual [NASA-CR-178157] p 13 N87-10044
Visualization of three-dimensional forced unsteady separated flow p 51 N87-11129
[AD-A168939] p 51 N87-11129
Calculated effects of varying Reynolds Number and dynamic pressure on flexible wings at transonic speeds p 75 N87-11738
Multidisciplinary optimization applied to a transport aircraft p 84 N87-11746
Effects of winglet on transonic flutter characteristics of a cantilevered twin-engine-transport wing model [NASA-TP-2627] p 201 N87-13789
Some numerical calculations by using linear classical sonic theories approached from sub- or supersonic speeds p 152 N87-14262
Direct numerical control in grid generation p 207 N87-14270
Transonic wing and airfoil design using inverse code WINDES p 174 N87-14275
Remote pivot decoupler pylon: Wing/store flutter suppressor [NASA-CASE-LAR-13173-1] p 175 N87-14314
Modeling three dimensional vortex flow in aerodynamics p 154 N87-14636
Aerodynamic characteristics of two-dimensional wing configurations at angles of attack near -90 deg [NASA-TM-88373] p 231 N87-15182
Subsonic maneuver capability of a supersonic cruise fighter wing concept [NASA-TP-2642] p 231 N87-15184
In-flight ejection seat test using the Aircrew Gliding Escape System (AGES) parachute [AD-A172987] p 235 N87-15948
Computational, unsteady transonic aerodynamics and aeroelasticity about airfoils and wings [NASA-TM-89414] p 291 N87-16801
A comparison of single-block and multi-block grids around wing-fuselage configurations [FFA-TN-1986-42] p 292 N87-16811
Economical manufacturing and inspection of the electron-beam-welded Tornado wing box p 324 N87-17055
Development of a device for controlling the leading edge vortices on a delta wing [AD-A175207] p 350 N87-19356
Construction and test of a composite microflight wing structure [BU-341] p 365 N87-19392
Composite repair of cocured J-stiffened panels: Design and test verification p 404 N87-20181
Battle damage repair of composite structures p 405 N87-20189
A numerical study of the Weis-Fogh mechanism p 414 N87-20197
Transonic Navier-Stokes wing solution using a zonal approach. Part 1: Solution methodology and code validation p 416 N87-20228
Transonic Navier-Stokes wing solutions using a zonal approach. Part 2: High angle-of-attack simulation p 416 N87-20229
Acta mechanica sinica (selected articles) [AD-A176240] p 418 N87-20246
Wing divergence and structural distortion [RAE-TR-85057] p 433 N87-20989
Development of laminar flow control wing surface composite structures [NASA-CR-172330] p 483 N87-21849

Numerical analysis of inviscid compressible flows about wing-fuselage combinations based on the Euler equations

[NAL-TR-896T] p 491 N87-21868

An experimental and theoretical investigation of an air injection type anti-icing system for aircraft

p 495 N87-21877

Augmentor wing powered lift technology: Affordable alternatives to enhance tactical airlift capability

[AD-A177750] p 508 N87-21911

Flight investigation of the effects of an outboard wing-leading-edge modification on stall/spin characteristics of a low-wing, single-engine, T-tail light airplane

[NASA-TP-2691] p 585 N87-23614

Steady and unsteady aerodynamic forces from the SOUSSA surface-panel method for a fighter wing with tip missile and comparison with experiment and PANAIR

[NASA-TP-2736] p 645 N87-26032

Factors affecting the sticking of insects on modified aircraft wings

[NASA-CR-180957] p 659 N87-26037

Measurement of the effect of manufacturing deviations on natural laminar flow for a single engine general aviation airplane

[NASA-CR-180671] p 677 N87-26044

Non-linear unsteady wing theory, part 1. Quasi two-dimensional behavior: Airfoils and slender wings

[NASA-CR-181008] p 731 N87-26862

Development of direct-inverse 3-D method for applied aerodynamic design and analysis

[NASA-CR-180646] p 751 N87-26895

Numerical solutions of Navier-Stokes equations for a Butler wing

[NASA-CR-180331] p 790 N87-27929

Modeling of transient heat pipe operation

[NASA-CR-180280] p 791 N87-27936

Development of laminar flow control wing surface porous structure

[NASA-CR-172424] p 802 N87-28502

The design and analysis of simple low speed flap systems with the aid of linearized theory computer programs

[NASA-CR-3913] p 812 N87-28522

Flow energizers. Task A

[NASA-CR-176202] p 812 N87-28523

Some numerical calculations by using linear classical sonic theories approached from sub- or supersonic speeds

[NASA-TT-20112] p 813 N87-28527

ACEE composite structures technology

[NASA-CR-172359] p 844 N87-28613

ACEE composite structures technology

[NASA-CR-172358] p 844 N87-28614

Standard test evaluation of graphite fiber/resin matrix composite materials for improved toughness

[NASA-TM-86298] p 845 N87-28618

WIRE

The effect of trip wire roughness on the performance of the Wortmann FX 63-137 airfoil at low Reynolds numbers

p 629 N87-44019

National Transportation Safety Board safety recommendation

p 53 N87-11100

Investigation of the conditions for tripping transition with roughness elements and their influence on boundary layer development

p 229 N87-15168

PTFE (polytetrafluoroethylene) resin selection for high performance wire and cable

[AD-P005211] p 846 N87-29227

WORDS (LANGUAGE)

Semi-automatic cross-checking between different copies of the same flight plan

p 502 N87-21903

WORK CAPACITY

Capacity management of air traffic control computer systems

p 395 A87-30274

The problems of aircraft microclimate (Review of the literature)

p 855 A87-50949

WORKLOADS (PSYCHOPHYSIOLOGY)

The pilot workload factor in aircraft handling qualities assessment

p 186 A87-16760

Managing with the onboard data link - A pilot's view

p 424 A87-31524

Helmet mounted displays for tactical aircraft

p 755 A87-47112

Identification and proposed control of helicopter transmission noise at the source

[NASA-TM-89312] p 300 N87-16816

Some experiences in integrating avionic systems on the civil flight deck

p 511 N87-21902

The effects of display and autopilot functions on pilot workload for Single Pilot Instrument Flight Rule (SPIFR) operations

[NASA-CR-4073] p 512 N87-21921

Optimal cooperative control synthesis of active displays

[NASA-CR-4058] p 705 N87-25807

Jet transport flight operations using cockpit display of traffic information during instrument meteorological conditions: Simulation evaluation

[NASA-TP-2567] p 819 N87-29469

Automation at the man-machine interface

p 855 N87-29504

Organization of displays in the visual space of the combat aircraft pilot

p 856 N87-29516

WORKSTATIONS

Workstations take over conceptual design

p 395 A87-29595

JPL multipolarization workstation - Hardware, software and examples of data analysis

p 858 A87-53231

X

X RAY IMAGING

High-X-ray flux, high-contrast radiography of carbon fiber-reinforced epoxy aircraft structures

p 200 A87-19595

A review of modern X-ray screening devices

p 314 A87-25846

Profile measurements using radiographic techniques

p 465 A87-35064

NDT of electron beam welded joints (micro-focus and real time X-ray)

p 325 N87-17063

X WING ROTORS

X wing begins flight testing

p 241 A87-22825

Crossed wings fly faster

p 339 A87-27698

X-wing - An aircraft for the 21st century

[SAWE PAPER 1732] p 505 A87-36298

RSRA/X-wing - A status report

p 651 A87-43409

The effects of aeroelastic deformation on the unaugmented stopped-rotor dynamics of an X-Wing aircraft

[AIAA PAPER 87-2563] p 769 A87-49613

The effects of aeroelastic deformation on the unaugmented stopped-rotor dynamics of an X-Wing aircraft

[NASA-TM-100480] p 791 N87-28056

X-29 AIRCRAFT

X-29 advanced technology integration for tomorrow's fighter aircraft

[AIAA PAPER 86-2613] p 162 A87-17877

X-29 - Managing an integrated advanced technology design

[AIAA PAPER 86-2630] p 163 A87-17889

Challenges in modeling the X-29A flight test performance

[AIAA PAPER 87-0081] p 239 A87-22402

Flight test techniques for the X-29A aircraft

[AIAA PAPER 87-0082] p 239 A87-22403

Real-time comparison of X-29A flight data and simulation data

[AIAA PAPER 87-0344] p 253 A87-22570

Design and development of a power takeoff shaft

p 305 A87-25717

X-29 Flight Test Program including wind tunnel and computational support

[SAE PAPER 861642] p 427 A87-32584

Integrated aeroservoelastic analysis capability with X-29A mechanical components

[AIAA PAPER 87-0907] p 447 A87-33716

X-29 fuel/auxiliary oil systems thermal management

[SAE PAPER 860913] p 514 A87-38705

Flight testing the X-29

p 743 A87-47841

Use of the updated NASA Langley radio-controlled drop-model technique for high-alpha studies of the X-29A configuration

[AIAA PAPER 87-2559] p 768 A87-49609

Analysis of lateral stability of X-29 drop model using system identification methodology

[AIAA PAPER 87-2625] p 769 A87-49624

Dynamic stability and handling qualities tests on a highly augmented, statically unstable airplane

[AIAA PAPER 87-2258] p 770 A87-50421

Recursive real-time identification of step-response matrices of high-performance aircraft with noisy sensors for adaptive digital flight control

[AIAA PAPER 87-2309] p 771 A87-50430

X-29A longitudinal and directional force and moment supplemental transonic wind tunnel test results

[NASA-TM-85909] p 28 N87-10861

Challenges in modeling the X-29 flight test performance

[NASA-TM-88282] p 433 N87-20991

Flight test techniques for the X-29A aircraft

[NASA-TM-88289] p 508 N87-21908

Calculation of aerodynamic characteristics at high angles of attack for airplane configurations

[NASA-CR-180678] p 731 N87-26860

Preliminary flight assessment of the X-29A advanced technology demonstrator

[NASA-TM-100407] p 752 N87-26906

Dynamic stability and handling qualities tests on a highly augmented, statically unstable airplane

[NASA-TM-88297] p 776 N87-26920

XV-15 AIRCRAFT

V-22 Osprey - Multi-service workhorse

p 96 A87-16400

The development of advanced technology blades for tilt-rotor aircraft

p 298 A87-25027

Piloted simulation in the development of the XV-15 tilt rotor research aircraft

p 600 N87-23646

Y

YAW

Multiaxis aircraft control power from thrust vectoring at high angles of attack

[AIAA PAPER 86-1779] p 595 A87-40272

Influence of yaw and incidence on base drag of rectangular wings

p 556 A87-41667

Exploratory studies of actuated forebody strakes for yaw control at high angles of attack

[AIAA PAPER 87-2557] p 768 A87-49607

Inflight evaluation of a modal suppression yaw damper

[AIAA PAPER 87-2257] p 770 A87-50420

Jet spoiler as a yaw control device

p 835 A87-52880

Frictional and retarding forces on aircraft tyres. Part 4: Estimation of effects of yaw

[ESDU-86016-PT-4] p 131 N87-12868

YAWING MOMENTS

Forebody vortex management for yaw control at high angles of attack

p 447 A87-34508

Contribution of wing dihedral to sideforce, yawing moment and rolling moment derivatives due to rate of roll at subsonic speeds, (Y sub p)sub gamma, (N sub p)sub gamma and (L sub p)sub gamma

[ESDU-85006] p 813 N87-29409

Estimation of sideforce, yawing moment and rolling moment derivatives due to rate of roll for complete aircraft at subsonic speeds

[ESDU-85010] p 826 N87-29490

YF-12 AIRCRAFT

Flight and analytical investigations of a structural mode excitation system on the YF-12A airplane

[NASA-CR-166623] p 520 N87-22685

YF-16 AIRCRAFT

An experimental-analytical routine for the dynamic qualification of aircraft operating on rough runway surfaces

p 585 N87-23611

YIELD POINT

Development of damage tolerance and durability design technology

p 359 A87-29602

Is fatigue testing of impact damaged laminates necessary?

p 844 A87-54316

Relevance of short fatigue crack growth data for durability and damage tolerance analyses of aircraft

[FFA-TN-1986-23] p 54 N87-11231

Advanced aluminum alloy plate materials for damage tolerant aircraft structures

[NLR-MP-85078-U] p 379 N87-18660

A310-300 upper wing damage tolerance demonstration

[MBB-UT-015/86] p 658 N87-25317

YIELD STRENGTH

Inertia welding of nitralloy N and 18 nickel maraging 250 grade steels for utilization in the main rotor drive shaft for the AR-64 military helicopter program

p 325 N87-17067

YS-11 AIRCRAFT

On the natural vibration of the aircraft structural model

p 532 A87-36898

YTTERBIUM COMPOUNDS

New ZrO₂-Yb₂O₃ plasma-sprayed coatings for thermal barrier applications

p 843 A87-53623

YTTRIUM OXIDES

Dispersion strengthened alloys for aerospace

p 844 A87-53894

Thermal barrier coatings for engine applications

[AD-A172983] p 260 N87-16146

Z

ZINC SULFIDES

The design and manufacture of a large zinc sulphide window for an airborne application

p 245 A87-19684

ZIRCONIUM OXIDES

Dip process thermal barrier coatings for gas turbines

p 322 A87-26114

Ceramic coatings for advanced heat engines - A review and projection

p 379 A87-29571

New ZrO₂-Yb₂O₃ plasma-sprayed coatings for thermal barrier applications

p 843 A87-53623

Thermal barrier coatings for engine applications

[AD-A172983] p 260 N87-16146

ZONAL HARMONICS

Tip vortices of wings in subsonic and transonic flow: A
numerical simulation
[NASA-TM-88334]

p 75 N87-11699

PERSONAL AUTHOR INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography
1987 Cumulative Index

January 1988

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

A

ABASCAL, ROBERTO, JR.

An application in simplicity - The building block technique of terrain data base generation p 270 A87-23071

ABBINK, F. J.

Systems, avionics and instrumentation of transport category helicopters [NLR-MP-85066-U] p 102 N87-11785

Trends in airliner flight deck design

[NLR-MP-85007-U] p 174 N87-13437

ABBOT, JAMES B.

Future flight for composites use in general aviation p 259 A87-20575

ABBOT, R. H.

Laser airborne depth sounding in Australia p 30 A87-12677

ABBOTT, KATHY H.

Traditional versus rule-based programming techniques: Application to the control of optional flight information [NASA-TM-89161] p 795 N87-28275

ABBOTT, TERENCE S.

Integration of altitude and airspeed information into a primary flight display via moving-tape formats [NASA-TM-89064] p 438 N87-20265

Integration of altitude and airspeed information into a primary flight display via moving-tape formats: Evaluation during random tracking task [NASA-TM-4010] p 758 N87-27665

ABBOTT, W. A.

Transmission of inlet distortion through a fan p 594 A87-24475

ABDELWAHAB, MAHMOOD

Full-scale engine demonstration of an advanced sensor failure detection isolation, and accommodation algorithm - Preliminary results [AIAA PAPER 87-2259] p 763 A87-50422

Full-scale engine demonstration of an advanced sensor failure detection, isolation and accommodation algorithm: Preliminary results [NASA-TM-89880] p 536 N87-22097

Measurement uncertainty for the Uniform Engine Testing Program conducted at NASA Lewis Research Center [NASA-TM-88943] p 833 N87-28557

ABDOL-HAMID, KHALED S.

Multiscale turbulence effects in underexpanded supersonic jets [AIAA PAPER 87-1377] p 567 A87-42422

Multiscale turbulence effects in supersonic jets exhausting into still air [NASA-TP-2707] p 614 N87-24672

ABDULHADI, M.

Dynamics of compressible air flow in ducts with heat exchange p 383 A87-29279

ABE, HIROSHI

Fly-by-wire system and control laws of the T-2 control configured vehicle [AIAA PAPER 87-2586] p 774 A87-50549

ABEYRATNE, R. I. R.

Negligence of the aircraft commander and bad airmanship - New frontiers p 549 A87-37015

ABOLHASSANI, JAMSHID S.

Numerical solutions of Navier-Stokes equations for a Butler wing [AIAA PAPER 87-0115] p 228 A87-22755

Grid adaption for hypersonic flow [AIAA PAPER 87-1169] p 561 A87-42114

Numerical solutions of Navier-Stokes equations for a Butler wing [NASA-CR-180331] p 790 N87-27929

ABOU EL LEIL, M. M.

Impact fracture of chemically tempered glass helicopter windshields p 195 A87-17824

ABRAHAMS, I. D.

Scattering of sound by a semi-infinite elastic plate with a soft backing - A matrix Wiener-Hopf problem p 859 A87-52846

ABRAMOVICI, E.

Quantitative fractographic examination of aircraft components tested under a fatigue spectrum loading p 534 A87-38545

ABRAMS, FREDRIC L.

The F-15E R&M challenge p 699 A87-46715

ABRAMSON, B.

Spray combustion: A driving mechanism for ramjet combustion instability p 606 N87-23805

ABSHIRE, JAMES B.

Two-color short-pulse laser altimeter measurements of ocean surface backscatter p 588 A87-39462

ABU EL ATA-DOSS, S.

Parameter estimation of aircraft with fly-by-wire control systems p 113 A87-16186

ABU-ASSAF, H. A.

The lateral dynamic stability and control of a large receiver aircraft during air-to-air refuelling p 36 A87-12268

ABUSAHMEN, ADEL SULTAN MASSAUD

The aerodynamic characteristics of aircraft with strip wing and lifting fuselage p 345 A87-30406

ACHACHE, M.

Higher harmonic control - Flight tests of an experimental system on SA 349 research Gazelle p 170 A87-19263

ACHACHE, MARC

Development of an experimental system for active control of vibrations on helicopters - Development methodology for an airborne system p 448 A87-34856

Development of an experimental system for active control of vibrations on helicopters p 679 A87-43447

ACHARYA, S.

Flow over a trailing flap and its asymmetric wake p 626 A87-43376

ACOSTA, WALDO A.

Liner cooling research at NASA Lewis Research Center [AIAA PAPER 87-1828] p 762 A87-50189

ACREE, C. W.

NASA rotor systems research aircraft: Fixed-wing configuration flight-test results [NASA-TM-86789] p 100 N87-12557

ACREE, C. W., JR.

In-flight measurement of rotor hub drag using the RSRA - A feasibility demonstration p 747 A87-48967

Static calibration of the RSRA active-isolator rotor balance system [NASA-TM-88211] p 588 N87-24459

ACTON, E.

Numerical methods for unsteady transonic flow p 572 N87-24403

ADAIR, D.

Characteristics of a trailing flap flow with small separation p 383 A87-29956
Flow over a trailing flap and its asymmetric wake p 626 A87-43376

ADAM, C. F.

Pilot use of simulator cues for autorotation landings p 192 A87-19252

ADAM, P.

Bonding of superalloys by diffusion welding and diffusion brazing p 324 N87-17059

ADAMCZYK, J. J.

A numerical simulation of the inviscid flow through a counterrotating propeller [ASME PAPER 86-GT-138] p 287 A87-25395

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. 1: Measurement and analysis technique [NASA-TM-88945] p 290 N87-16789

Measurements of the unsteady flow field within the stator row of a transonic axial-flow fan. Part 2: Results and discussion [NASA-TM-88946] p 290 N87-16790

ADAMOWICZ, ANDRZEJ

Analysis of aircraft piston engine failures. I p 305 A87-25969
Analysis of aircraft piston engine failures. II p 305 A87-25973

ADAMS, B. H.

Acquisition and use of data for crashworthiness improvements in U.S. Army aircraft p 78 A87-13686

ADAMS, J. C., JR.

Large perturbation flow field analysis and simulation for supersonic inlets [NASA-CR-174676] p 14 N87-10835

ADAMS, J. Y.

Summary of artificial and natural icing tests conducted on US Army aircraft from 1974 to 1985 [FAA/CT-85/26] p 25 N87-10064

ADAMS, R. D.

Nondestructive inspection of composite structures by low-velocity impact p 45 A87-10765

ADAMS, R. M.

Performance deterioration of a turbofan and a turbojet engine upon exposure to a dust environment [ASME PAPER 87-GT-111] p 759 A87-48707

ADAMS, W. M., JR.

Application of optimization techniques to the design of a flutter suppression control law for the DAST ARW-2 p 115 N87-11736

ADAMS, WILLIAM M., JR.

Nonlinear programming extensions to rational function approximations of unsteady aerodynamics [AIAA PAPER 87-0854] p 412 A87-33694

Active suppression of an 'apparent shock induced instability' [AIAA PAPER 87-0881] p 446 A87-33702

ADAMSON, T. C., JR.

Comment on 'Computation of choked and supersonic turbomachinery flows by a modified potential method' p 71 A87-14129

ADDISON, R. C., JR.

A computer-aided nondestructive inspection system p 44 A87-10720

ADDY, A. L.

Interaction between two compressible, turbulent free shear layers p 278 A87-23654
Turbulent boundary-layer properties downstream of the shock-wave/boundary-layer interaction p 486 A87-37104

ADDY, H. E.

Performance and efficiency evaluation and heat release study of an outboard Marine Corporation Rotary Combustion Engine [NASA-TM-89833] p 442 N87-20282

ADELMAN, HENRY G.

- The thermal environment of transatmospheric vehicles
[AIAA PAPER 87-1514] p 626 A87-43038
Aerothermodynamics of transatmospheric vehicles
p 807 A87-52878

ADELMAN, HOWARD M.

- Sensitivity Analysis in Engineering
[NASA-CP-2457] p 390 N87-18855
Sensitivity derivatives and optimization of nodal point
locations for vibration reduction p 390 N87-18869

ADIBHATLA, SHRIDER

- Performance seeking control for cruise optimization in
fighter aircraft
[AIAA PAPER 87-1929] p 681 A87-45307

ADLER, D.

- Development of a laser interferometric system for
velocity measurements inside a transonic axial flow
compressor stage p 698 A87-46244

ADLER, W. F.

- Nuclear hardness simulation and analysis of composite
aircraft structures. Volume 2: Dust erosion assessment
[AD-A174893] p 363 N87-19378

ADO, SHIGENORI

- A numerical method for subsonic unsteady lifting
surfaces-(BIS). II - Numerical results p 213 A87-20697

ADOLPH, CHARLES E.

- The Air Force Flight Test Center - Now and the future
p 684 A87-45125

AFONINA, N. YE.

- Numerical analysis of heat transfer at surface of delta
wing in hypersonic air stream with large angle of attack
p 233 N87-16183

AGARWAL, R. K.

- Recent advances in prediction methods for jet-induced
effects on V/STOL aircraft p 73 A87-15462
Euler calculations for flowfield of a helicopter rotor in
hover p 430 A87-34506
Navier-Stokes calculations of transonic viscous flow
about wing-body configurations
[AIAA PAPER 87-1200] p 562 A87-42315

AGARWAL, RAMESH K.

- An Euler solver for calculating the flowfield of a helicopter
rotor in hover and forward flight
[AIAA PAPER 87-1427] p 568 A87-42450

AGGARWAL, B.

- AI (Artificial Intelligence) gas turbine rotor diagnostics
[AD-A178996] p 520 N87-22683

AGGARWAL, HANS R.

- Full-potential circular wake solution of a twisted rotor
blade in hover p 287 A87-25723

AGGARWAL, J. K.
